Section 84

Order in Council 570/2017, dated December 6, 2017

(Filed December 7, 2017)

PART 1**Preliminary Matters****Title**

1 These regulations may be cited as *The Management and Reduction of Greenhouse Gases (General and Electricity Producer) Regulations*.

Definitions

2(1) In these regulations:

“Act” means *The Management and Reduction of Greenhouse Gases Act*;

“IPP” or **“independent power producer”** means, subject to section 3, a person who:

(a) produces greenhouse gases in excess of 10 000 tonnes per year by generating electricity from a generator, other than by means of biomass or the burning of:

(i) flare gas;

(ii) vented gas; or

(iii) any other collected or captured gas that would otherwise have been released into the atmosphere; and

(b) sells or otherwise delivers the electricity mentioned in clause (a) to a regulated emitter.

(2) For the purposes of the Act and in these regulations, **“regulated emitter”** means a person who produces greenhouse gases in excess of 1 500 000 tonnes per year by generating electricity from a gas or coal-fired generator.

Application of regulations to IPPs

3(1) In this section, **“cogeneration facility”** means a facility that simultaneously generates electric energy and produces thermal energy for industrial purposes from the same fuel source.

(2) These regulations do not apply to an IPP with respect to emissions by it from a facility that becomes a cogeneration facility after the date on which these regulations come into force.

PART 2**General Provisions respecting Greenhouse Gases and Emissions****Emissions to be measured in tonnes, etc., of CO₂e**

4 For the purposes of the Act and these regulations, greenhouse gas emissions must be measured, calculated and expressed in tonnes (t), kilotonnes (kt) or megatonnes (Mt) of CO₂e.

Certain other greenhouse gases prescribed

5(1) For the purposes of subclause 2(j)(iv) of the Act, the prescribed hydrofluorocarbons are those listed in Part 1 of the Appendix.

(2) For the purposes of subclause 2(j)(v) of the Act, the prescribed perfluorocarbons are those listed in Part 2 of the Appendix.

Global warming potential and CO₂e of greenhouse gases

6(1) The global warming potential for a greenhouse gas is the 100-year time horizon global warming potential value as established in the Fourth Assessment Report (AR4) issued by the Intergovernmental Panel on Climate Change.

(2) The CO₂e for a greenhouse gas must be quantified in accordance with the following formula:

$$\text{CO}_2\text{e} = \text{GHG} \times \text{GWP}$$

where:

GHG is the mass of the greenhouse gas; and

GWP is the 100-year time horizon global warming potential value for the greenhouse gas.

When annual returns must be submitted

7 A regulated emitter shall submit its annual return required by section 19 of the Act on or before June 1 of the year following the year to which the annual return relates.

Administrative penalties

8(1) For the purposes of section 78 of the Act, the minister may assess a penalty for a contravention of a provision of the Act or these regulations set out in Part 3 of the Appendix.

(2) An administrative penalty may be imposed only on:

- (a) a regulated emitter; or
- (b) an IPP.

(3) The maximum penalty the minister may assess with respect to each contravention is \$10,000.

PART 3**Matters respecting Gas and Coal-Fired Generators****Definitions for Part**

9(1) In this Part, “**fleet**” means all facilities owned or operated by a regulated emitter and all its IPPs.

(2) For the purpose of applying the Act to this Part and in this Part, “**facility**” means the physically connected equipment within a gas or coal-fired generator that operates together to produce electricity by thermal means, including boilers and other combustion devices, gasifiers, reactors, turbines and generators.

Qualified person

10 A person is prescribed as a qualified person for the purposes of applying the Act to this Part and for the purposes of this Part if the person:

- (a) is licensed to practise professional engineering or professional geoscience pursuant to *The Engineering and Geoscience Professions Act*; and
- (b) is certified by the Standards Council of Canada (SCC) or the Canadian Standards Association (CSA Group) in Greenhouse Gas Inventory Quantification and Reporting or Greenhouse Gas Verification.

Determining emissions by regulated emitter

11 A regulated emitter shall determine emissions of CO₂ from:

- (a) coal and natural gas burned at a facility by using a fuel-based method described in these regulations; and
- (b) other fossil fuels burned at the facility.

Determining emissions from coal

12(1) A regulated emitter shall determine the quantity of CO₂ emissions from coal burned at a facility by analysing the coal in accordance with the following methods:

- (a) if the fuel-based method used is based on the quantity of carbon in the fossil fuel, the carbon content of the fuel must be determined in accordance with:
 - (i) the current version of ASTM D7582 entitled Standard Test Methods for Proximate Analysis of Coal and Coke by Macro Thermogravimetric Analysis; or
 - (ii) the current version of ASTM D5373 entitled Standard Test Methods for Instrumental Determination of Carbon, Hydrogen and Nitrogen in Laboratory Samples of Coal;

CHAPTER M-34 REG 1*The Municipal Tax Sharing (Potash) Act*

Section 13

Order in Council 577/2017, dated December 6, 2017

(Filed December 7, 2017)

Title

1 These regulations may be cited as *The Municipal Tax Sharing (Potash) Regulations, 2017*.

Definitions

2 In these regulations:

“area of influence” means the area in square miles in Saskatchewan that lies within the circumference of a circle having as its centre the geographic centre of the section on which a potash head frame and mine shaft, or load out and production facility, is located and having a radius of 20 miles;

“eligible municipality” means:

- (a) a rural municipality in which all or a portion of the municipality falls within an area of influence; and
- (b) an urban municipality with a population of less than 5000, any portion of which is within an area of influence;

“head frame” means a piece of mine resource production equipment used to lift items from the subsurface or to send items down to the subsurface;

“load out” means a building with storage tanks inside to hold potash before it is loaded into railway cars;

“mine shaft” means a vertical or sloping passageway made in the earth for finding or mining ore and ventilating underground excavations;

“production facility” means a large group of buildings used for the production of potash from raw ore or the solution brought up from the subsurface in solution mines;

“unit” means the total area for each individual municipality that is found within one or more areas of influence of a potash mine or potash mines.

Divisions within an area of influence

3(1) Each area of influence for any potash mine as determined according to the definition of “area of influence” must consist of 2 distinct portions calculated as follows:

- (a) that portion in square miles in Saskatchewan that lies within the circumference of a circle having as its centre the geographic centre of the section on which the potash head frame and mine shaft, or load out and production facility, is located and having a radius of 10 miles from that centre;
- (b) that portion in square miles in Saskatchewan outside of the area described in clause (a), but within the circumference of a circle having the same centre as described in clause (a), but having a radius of 20 miles from that centre.

(2) If, because of the close proximity of potash mines, there is an overlap of areas within the 10 mile radius or within the 20 mile radius, the area in each case must only be counted once as a unit in calculating the points for both urban and rural municipalities.

Point calculation for rural municipalities in a unit

4(1) The total points for each rural municipality in an area of influence are considered to be a unit and are to be calculated in accordance with the following formula:

$$TP = (RMAa \times 4) + (RMAb \times 1)$$

where:

TP is the total of all points for the rural municipality;

RMAa is the rural municipality's area mentioned in clause 3(1)(a);

RMAb is the rural municipality's area mentioned in clause 3(1)(b).

(2) The total of the points for all units in an area of influence is the total rural points for that area of influence.

(3) Notwithstanding subsections (1) and (2), when a new potash mine enters into production, only the rural municipality's area in which the mine is located in and mentioned in clause 3(1)(a) is to be used in calculating the rural municipality's total points respecting that new potash mine, and the calculation pursuant to subsection (1) is to be made in accordance with the following rules:

(a) for the first year the mine assessment is included with the municipal potash tax sharing calculations, RMAa in the formula mentioned in subsection (1) is to be multiplied by 6;

(b) for the second year the mine assessment is included with the municipal potash tax sharing calculations, RMAa in the formula mentioned in subsection (1) is to be multiplied by 5;

(c) for the third and subsequent years the mine assessment is included with the municipal potash tax sharing calculations, RMAa in the formula mentioned in subsection (1) is to be multiplied by 4.

Point calculation for urban municipalities in a unit

5(1) The board shall record the name of each urban municipality in an area of influence together with its population:

(a) as recorded by Statistics Canada from the most recent Canadian Census; or

(b) as established by the urban municipality in a manner approved by the board.

(2) The total points for an urban municipality in the area of influence must be calculated in accordance with the following formula:

$$P = (A \times 1) + (B \times .5) + (C \times -.5) + (D \times -1)$$

where:

P is the points for the urban municipality;

A is the first 1000 of the urban municipality's population or portion of that 1000;

B is the next 1500 population of the urban municipality's population or portion of the next 1500;

C is the next 1500 population of the urban municipality's population or portion of the next 1500;

D is the next 1000 population of the urban municipality's population or portion of the next 1000.

(3) The total points for the urban municipality is the amount P calculated accordance with subsection (2) multiplied by:

(a) 4 if all or a portion of the urban municipality is located within the 10 mile radius of the section on which the potash head frame and mine shaft, or load out and production facility, is located; or

(b) 1 if all or a portion of the urban municipality is located outside the 10 mile radius but within the 20 mile radius of the section on which the potash head frame and mine shaft, or load out and production facility, is located.

(4) The total of the points for all the urban municipalities in an area of influence represents the total urban points for that area of influence.

Method of raising funds for distribution

6(1) In each year, the administrator of each rural municipality having a potash mine in production shall levy a mill rate for municipal taxation purposes as set by the board or by the Lieutenant Governor in Council pursuant to the Act on the assessment of that potash mine.

(2) After the amount of tax mentioned in subsection (1) is collected and after allowing for statutory municipal discounts, the administrator shall remit the amount to the board:

(a) by September 30 of the year in which the taxes are levied; or

(b) immediately on receipt of by the rural municipality if received after September 30.

(3) The amounts received by the board pursuant to subsection (2):

(a) constitute the funds available for distribution for the year and for expenditures pursuant to section 11; and

(b) must be deposited in the name of the board in a chartered bank or credit union.

(4) In each year, the board shall not make expenditures pursuant to section 11 from the amounts deposited pursuant to subsection (2) in excess of 0.5% of those amounts to a maximum of \$35,000.

Distribution of funds

7(1) For each year, the funds available for distribution to municipalities in each area of influence, less any amounts expended pursuant to section 11, must be disbursed to the municipalities in the area of influence in the following manner:

- (a) 90% to the rural municipalities in the area of influence;
 - (b) 10% to the urban municipalities in the area of influence.
- (2) Subject to subsection (3), for each year, the amount payable to each rural municipality in an area of influence must be calculated in accordance with the following formula:

$$\text{RMAMT} = \frac{\text{RF}}{\text{TRP}} \times \text{RMP}$$

where:

RMAMT is the amount payable to the rural municipality;

RF is the rural funds available for all rural municipalities in the area of influence as determined pursuant to clause (1)(a);

TRP is the total of all rural points for the area of influence in accordance with subsection 4(2);

RMP is the value of total points for the rural municipality as determined pursuant to subsections 4(1) and (3).

(3) The minimum sharing in tax revenue from potash mine assessments to a rural municipality having a potash mine is the greatest of the following:

- (a) \$30,000;
- (b) the amount determined by applying the mill rate set by the board to an assessment of \$1,000,000;
- (c) any amount that may be set by the board.

(4) For each year, the amount payable to each urban municipality in an area of influence must be calculated in accordance with the following formula:

$$\text{UMAMT} = \frac{\text{UF}}{\text{TUP}} \times \text{UMP}$$

where:

UMAMT is the amount payable to the urban municipality;

UF is the urban funds available for all urban municipalities in the area of influence as determined pursuant to clause (1)(b);

TUP is the total of all urban points for the area of influence in accordance with subsections 5(2) and (3);

UMP is the value of total points for the urban municipality as determined pursuant to subsections 5(2) and (3).
