

Western Regulators Forum

The Western Regulators Forum (WRF) is an inter-jurisdictional collaboration between the Alberta Energy Regulator, BC Oil and Gas Commission, Saskatchewan Ministry of Energy and Resources, National Energy Board, and Government of the Northwest Territories Office of the Regulator of Oil and Gas Operations. It was established to promote collaboration and pursue mutual priorities among oil and gas regulators in Western Canada.

VISION ► A collaborative approach to oil and gas regulatory excellence

GOALS

Identify, share and develop leading regulatory approaches

Facilitate strategic engagement and communications

Address strategic challenges and opportunities

Share information and resources

WRF MANDATE

Facilitate the exchange of information and discussion of ideas with respect to the regulation of oil and gas activities in Western Canada.

Identify important areas for collaboration in research, program development, standards development and other areas of mutual interest.

Establish working committees, when deemed necessary, to carry out specific tasks.

Link strategic management within member organizations with regulatory initiatives and promote the use of common regulatory tools such as national consensus standards and best practices.

Discuss emerging issues that have the potential to impact oil and gas regulation and, where appropriate, develop common approaches and positions on issues.

Maintain communications with other organizations to enhance understanding of matters of mutual interest.

Develop a home for multi-jurisdictional tools.
