

Release Notes

IRIS Version 5.16

Release Date: October 3, 2018

<i>Release Notes Publication Date</i>	<i>Notes and Changes Made</i>
October 3, 2018	Initial Release

About

This release implemented 47 items including a new generic application (Measurement, Accounting, and Reporting Plans {MARPs}). Multiple enhancements and fixes to known defects have been implemented to the Billing and Reporting, Data Integration, Petroleum Tenure, and Well and Infrastructure modules.

The previous support desk emails and phone numbers will no longer be in service as of October 4, 2018. Please see [Service Desk Contact Information](#) for more information. For all future inquiries, please contact the ER Service Desk at 1-855-219-9373 or ER.ServiceDesk@gov.sk.ca.

What's changed?

The highlights of what's changed in IRIS as a result of this release are noted below.

Note: Whether a user has access to the functionality or enhancements outlined in these *Release Notes* depends on the individual's security access and assigned permissions sets.

Well and Facility Infrastructure Functionality

- Industry users may now access any Incidents reported into IRIS relating to a Facility License by clicking on the “Incidents” link located in the Related Info on the right hand side of the Facilities main details screen.

- The Government of Saskatchewan is implementing a change to avoid a re-entry licence being issued when the original abandoned well is active or suspended in IRIS. [For details see the industry TIP.](#)
- Submission of Lithological Logs format can now include TIFF format, however, the PDF format submission is still required to fulfil the Obligations for Lithological Logs in IRIS. [For details see the industry TIP.](#)
- "Well Licence Applicant Information Request Work Item" functionality will allow Industry to update or add attachments to a well licence application. If an attachment is missing or incorrect, a user will have the ability, for one week, to make the correction before the application goes to a denied status.
- Expanded field size on Generic Authorization searches to twenty-five characters in the “Related to” field for both Application Associated Entities Search and Generic Authorization Advanced Search. [For details see the industry TIP.](#)
- The functionality to determine if a well completion falls within the boundaries of a defined pool in which it is being licenced has been fixed. This functionality references the land locations listed in the pool boundary, and also checks that the stratigraphic unit of the well and pool match. [For details see the industry TIP.](#)
- Measurement, Accounting, and Reporting Plans (MARPs) are now submitted as their own generic application, and not as an attachment with Enhanced Oil Recovery Applications. Requirements for MARPs are unchanged. Please see [Enhanced Oil Recovery Project Application](#) for more information. [For details see the industry TIP.](#)

- The ability to search for cancelled licences has changed. Cancelled licences are now available on the Basic Search screen. All cancelled licences will appear on the Advanced Search screen unless the “Exclude Cancelled Licences?” field is checked.

The screenshot displays the 'Well Licence Search' interface. At the top, there is a title 'Well Licence Search' with a refresh icon. Below the title is a 'Search Criteria' section. This section contains two tabs: 'Basic Search' and 'Advanced Search'. The 'Advanced Search' tab is highlighted with a red circle. Below the tabs are several search fields and dropdown menus:

- 'Licensee BA' and 'Operator BA' are text input fields, each followed by a magnifying glass icon and the text 'Search...'.
- 'Ministry of Energy and Resources Field Office' and 'Well Status' are dropdown menus.
- 'Ministry of Agriculture Region' and 'Ministry of the Environment District' are dropdown menus.
- At the bottom, there is a checkbox labeled 'Exclude Cancelled Licences?' which is also circled in red.

Release Notes

Security and Permission Setse following changes were made to the following IRIS's permission set.

***Note:** If a user is already assigned to the below permission set, they will automatically receive access to the new function.

Industry

New Permissions		
Permission Set Name	Permissions Added:	Function
