

2018 Hunter Harvest Survey Results

The Ministry of Environment would like to thank all hunters who participated in the 2018 Hunter Harvest Survey. The information you provide is an important part of wildlife management in Saskatchewan, as each survey contributes to a better understanding of how game populations are responding to current management strategies. Please complete your surveys, even if you were unable to hunt or did not harvest an animal.

More than 26,300 surveys were completed in 2018, which was a decrease of over 2,000 surveys from the year before. While response rates for 2018 varied depending on species and licence type, the average for all licence types combined was 23 per cent. Please ensure your HAL profile contains your current email addresses so that you receive survey reminder messages.

Below are the results of the 2018 Hunter Harvest Survey, separated by licence type. We estimate harvest for all hunters based on the survey responses we receive. The potential range of estimated harvest values is indicated in the tables by the lower and upper bounds. The range of uncertainty increases when there is a lower response rate. The more survey responses we receive, the more confident we can be in our harvest estimates. The estimated harvest totals for the proportion of respondents that indicated they purchased a licence but did not hunt and the estimated harvest totals for big game may not equal the sum of males, females and young due to rounding.

For more information about the annual hunter harvest survey, please contact the Ministry of Environment Inquiry Centre at centre.inquiry@gov.sk.ca or 1-800-567-4224.

2018 Hunter Harvest Survey Results for Regular Licences											
Species	Licence Type	Wildlife Management Zones	Licences Sold	Completed Survey	Harvest Success	Estimated Total Harvest	Estimated Harvest Lower Bound (95%)	Estimated Harvest Upper Bound (95%)	Estimated Adult Male Harvest	Estimated Adult Female Harvest	Estimated Young of the Year Harvest

*Note: Some zones allow the hunter to purchase a second antlerless mule deer licence. The hunter harvest survey was restricted to the first antlerless mule deer licence, but reporting included all mule deer harvested on both licences. Therefore, harvest success can be greater than 100 per cent if hunters harvested more than one animal in that zone. Additionally, the lower and upper bounds of estimated harvest are not included due to the unique assumptions required to calculate it for this particular survey.
