

# 2019 Hunter Harvest Survey Results

The Ministry of Environment would like to thank all the hunters who participated in the 2019 Hunter Harvest Survey. The information you provide is an important part of wildlife management in Saskatchewan and each survey contributes to a better understanding of how game populations are responding to current management strategies. The more surveys that are completed, the more certain we can be of outcomes in each management zone. Please complete your Hunter Harvest Surveys even if you were unable to hunt or did not harvest an animal.

Over 24,500 surveys were completed in 2019, which was a decrease of almost 2,000 surveys from last year. While response rates for 2019 varied depending on species and licence type, the average for all licence types combined was 21 per cent. The ministry encourages all hunters to ensure their HAL profile contains their current email address so that reminder messages are delivered. After completing your surveys, reminder messages are suspended.

Below are the results of the 2019 Hunter Harvest Survey, separated by licence type. We estimate harvest for all hunters based on the survey responses we receive. The potential range of estimated harvest values is indicated in the tables by the lower and upper bounds. This range of uncertainty increases when there is a lower response rate. The more survey responses we receive, the more confident we can be in our harvest estimates.

Note that estimated total harvest accounts for the proportion of respondents that indicated they purchased a licence but did not hunt and that estimated harvest totals for big game may not equal the sum of males, females and young due to rounding.

For more information about the annual Hunter Harvest Survey, please contact the Ministry of Environment at [Centre.Inquiry@gov.sk.ca](mailto:Centre.Inquiry@gov.sk.ca) or by calling the Client Service Office toll free at 1-800-567-4224.
