**Special Conditions:** -ECON is granting temporary approval for 6 months from the date of this letter (October 24, 2016) to incinerate 1.2 thousand cubic metres of VRU gas per day at the above mentioned facility. This volume will be updated on the facility license. During the temporary approval period, ECON expects that FCL will continue to monitor the opportunity to conserve the VRU gas from this facility and will submit updates upon request. At the end of the temporary approval period, ECON expects the VRU gas to be conserved. Please note that if ECON has future concerns regarding odour, noise, visible smoke or public complaints, this approval may be withdrawn until a solution satisfactory to ECON is implemented.  
-A permanent dike shall be constructed of sufficient dimensions to prevent migration of fluids into the low areas.

-Economic evaluation of flaring/venting at this site must be re-evaluated annually in accordance with the Saskatchewan Upstream Petroleum Industry Associated Gas Conservation Direction (S-10). Licensees are not required to provide additional copies of evaluations to ECON unless requested. Upon request, the licensee must provide an updated evaluation to ECON within 5 working days. If the results of the associated gas conservation evaluation process indicate that conservation is required, the well or the facility must remain shut-in until conservation is implemented. If ECON receives valid public complaints regarding odour, noise or visible smoke, the facility will be shut-it immediately until conservation is in place.

**Owner:** 12663 - CREW ENERGY INC.  
**Licence #:** 8475      **Area:** 1      **RM:** 472      **Type:** Oily Byproduct Storage  
**Status:** Retro      **Action:** Update/Correction  
**Issued:** 2016/10/27      **Action Date:** 2020/03/19  
**Company Address:** 800,250 - 5TH ST SW, CALGARY, AB, CANADA, T2P0R4  
**Land Location:** 11-33-048-27W3  
**Special Conditions:** -The oily byproduct storage structure (OBSST) shall only be used for the temporary storage of materials contaminated with produced fluids such as unaltered (unrefined) formation crude oil and/or salt water directly from a well, battery, pipeline or flowline. Wastes such as lubricating oil, hazardous substances, refined hydrocarbons and produced water (except where it is not feasible to separate the water from the waste) are prohibited from being put in an OBSST. Materials that are acceptable for temporary storage include the following: Tank bottoms, de-sand pit solids/sludges, produced sand/solids, untreatable emulsions, spill clean-up material from produced oil and/or salt water spills, lease clean-up material (excluding any material from flare pits), drill cuttings containing formation crude (excluding diesel-invert drill cutting).  
-Leakage monitoring and detection criteria shall be incorporated as specified in GL-97-01, Guidelines for the Construction and Monitoring of Oily Byproduct Storage Structures in Saskatchewan.  
-Sampling and Maintenance Criteria shall be incorporated as specified in GL-97-01, Guidelines for the Construction and Monitoring of Oily Byproduct Storage Structures in Saskatchewan.
