

8.0 Release Notes

8.0 – Mineral Ownership Spatial Records Phase 3 (MOSR3) Release Notes

Release Date: April 10, 2021

8.0 Release Notes Publication Date	Notes and Changes Made
April 10, 2021	Initial Release

About

On April 10, 2021, Saskatchewan’s Ministry of Energy and Resources (ER) implemented new features and functionalities into the Integrated Resource Information System (IRIS). These changes to the IRIS functionality will mean that industry can expect quicker turnaround time from the Ministry when responding to specific requests.

A Frequently Asked Question (FAQ) document containing information on the new features and functionalities can be found at the following [link](#) on Saskatchewan.ca.

What’s changed?

The highlights of what’s changed in IRIS as a result of this release are noted below.

Note: Whether a user has access to the functionality or enhancements outlined in these 8.0 Release Notes will depend on the individual’s security access and assigned permissions sets.

Tenure:

- IRIS will provide information regarding mineral ownership, existing disposition and land review at the time the posting request or disposition application is being placed.
- IRIS will use ISC mineral parcels to calculate the amount of land in each request and deemed area will no longer be used.

Well Licences:

- IRIS will use ISC mineral parcels to calculate ownership percentages for the Titled Mineral Ownership fields for each tract of a well completion.
- Trespass checks will be conducted whenever a well licence involving provincial Crown minerals is applied for, amended or upon completion reporting.
- IRIS will be able to determine locations less than one legal subdivision in size.
- Functionality is being added to allow for wells to be licensed that cross unit boundaries.

When will the change be introduced?

These new features were implemented on April 10th, 2021. The Close Date for Posting Requests for Public Offering 402 is April 13, 2021. Any posting requests initiated after April 10, 2021 will use the new automated processes. Public Offering 403 will be entirely completed using the new automated processes.

Security and Permission Sets

The following changes were made to listed IRIS permission sets.

***Note:** If a user is already assigned to the below permission set, they will automatically receive access to the new function.
