Re-Open Saskatchewan

COVID-19 has currently changed the way we live and work – in Saskatchewan, across the country and around the world. It's impacted the way in which we socialize with our family and friends.

Although the challenge is formidable, it's one that we're overcoming by working together. We're resilient people and are not allowing COVID-19 to dampen our spirit or dim our anticipation of the future.

An essential element of our province's plan to battle COVID-19 continues to be widespread testing of residents along with the implementation of preventative measures, such as handwashing and physical distancing. This will enable us to manage and flatten the curve, as well as ensure there is capacity in our health care system. Another important aspect of this approach was to develop a plan that would eventually allow Saskatchewan residents and our provincial economy to emerge from isolation.

Methodical and Phased-In Approach

Re-Open Saskatchewan is a plan built on a methodical and phased-in approach to slowly and responsibly lift restrictions on businesses and services. Flattening the curve and strengthening the system will remain priorities, as will our ability to manage the current COVID-19 pressures by building capacity in the coming weeks and months. Key elements will include increased testing and contact tracing, as well as the preparation of additional space and critical equipment.

Restrictions will be lifted in stages, with consideration given to socioeconomic factors and the risk of transmission. They will be implemented via public health orders, and the timing will be dictated by evidence of transmission.

As restrictions are gradually lifted, the Government of Saskatchewan and its Chief Medical Health Officer, Dr. Saqib Shahab, will carefully monitor the daily number of reported cases and other important indicators. They will also monitor to ensure that:

- Transmission of the virus is controlled;
- The provincial health system has enough capacity to test, isolate and treat every case, as well as trace every contact;
- Outbreak risks are minimized in special settings, such as health care facilities;
- Preventive measures are established in place in workplaces, schools and other essential gathering places;
- The risks of importing the virus from outside the province can be managed; and
- Communities and businesses are educated, engaged and empowered to adjust to the new realities brought about by COVID-19.

Public Health Orders

In response to the public health risks of COVID-19, the Chief Medical Health Officer issues public health orders under the authority of *The Public Health Act, 1994*. The public health orders include measures and restrictions to mitigate the transmission of the virus. As the pandemic evolves, the public health orders will change accordingly. Regional differences in transmission and health care needs may also require some changes to the overall provincial approach, including issuing focused public health orders to mitigate specific transmission risks. If a public health order happens to conflict with the guidelines in the Re-Open Saskatchewan Plan, the requirements in the public health order take precedence.

Below are some general restrictions in place to help prevent the transmission of COVID-19. For a complete list of restrictions and information on the current public health orders, as well as restrictions for specific workplaces, please visit saskatchewan.ca/COVID19.

General Restrictions

- Effective June 20, 2021, private indoor gatherings are permitted up to 15 persons. People in attendance must ensure that physical distancing of at least two metres between households is maintained.
- Effective June 20, 2021, public indoor gatherings are permitted up to 150 people, while public and private outdoor gatherings are permitted up to 150 people.
- Effective May 30, 2021, the total number of people participating in all worship services in Saskatchewan cannot exceed 30 per cent of seating capacity or 150 people (not including clergy and staff).
- Effective June 20, 2021, Casinos and bingo halls are allowed to re-open with up to 150 people, not including employees/staff.
- Effective June 20, 2021, there are no capacity requirements for retail or personal service facilities. Retail services (essential, non-essential and big box stores) may resume operations at full capacity. An occupancy level must be maintained that allows customers to maintain two metres of physical distance.
- All people in Saskatchewan and the City of Lloydminster are required to wear non-medical masks in [indoor public spaces](#) to reduce the risk of COVID-19 transmission.
- Licensed liquor transportation (party buses and limousines) are not permitted.
- Non-essential travel, including interprovincial travel, is strongly discouraged.
- Individuals identified by a Medical Health Officer as having COVID-19 or a close contact to someone with COVID-19 must immediately go into mandatory self-isolation until it is determined they no longer pose a public health threat.
- Individuals who are household members or close contacts of a person or persons with COVID-19 must immediately go into mandatory self-isolation for 14 days from the last date of exposure and call HealthLine 811 if they become symptomatic.
- Individuals who travelled internationally must go into mandatory self-isolation for 14 days from the date of arrival back into Canada, except for the following people if they are supervised by Infection Prevention and Control Officers or Occupational Health and Safety in the workplace:
 - specific health care workers;

- workers who provide emergency health care services;
 - workers who are essential to maintaining essential services;
 - workers who maintain the supply chain; or
 - rail, airline and transport crews.
- Special care homes and personal care homes may allow four visitors indoors and nine visitors outdoors. Visitors will be allowed for both vaccinated and unvaccinated residents. All residents and visitors must continue with precautionary protective measures (masking, physical distancing, hand hygiene etc.)

All businesses permitted to operate shall do so in accordance with the public health order and in a manner that prevents transmission of COVID-19.

Phases of Re-Open Saskatchewan

Re-Open Saskatchewan will consist of five phases. The timing and order of the businesses/workplaces included in each phase is subject to change throughout the process based on a continuous assessment of transmission patterns and other factors.

Phase One: Re-opening previously restricted medical services
Opening of golf courses, parks and campgrounds

Phase Two: Re-opening retail and select personal service facilities

Phase Three: Re-opening restaurants and licensed establishments, gyms and fitness centres, and child care facilities
Re-opening remaining personal service facilities
Re-opening places of worship
Increasing indoor public and private gatherings to 15 people and outdoor gatherings to 30 people

Phase Four: *Part I*

- Child and youth day camps
- Outdoor pools and spray parks
- Seasonal/recreational outdoor sports and activities

Part II

- Indoor pools
- Indoor rinks
- Libraries
- Museums
- Galleries
- Movie theatres
- Casinos
- Bingo halls
- Temporary food vendors
- Racing and rodeo events
- Banquets and conference facilities
- Car and trade shows
- Yard and garage sales
- Door-to-door canvassing and sales

Phase Five: Consider lifting long-term restrictions

The following recommendations should remain in place through all five phases:

- Protective measures for vulnerable populations.
- Individuals should continue working from home if they can do so effectively.
- Physical distancing must be maintained, wherever possible.
- People must stay at home when they are sick.
- Vulnerable individuals, such as seniors and those with underlying health conditions, should continue to exercise caution and minimize high-risk exposures, such as public outings.
- Personal hygiene will continue to be a key prevention measure.
- Enhanced cleaning and disinfection should take place in workplaces, public spaces and recreational facilities.
- Current public and private gathering restrictions must be followed.
- Although the public health order regarding the size of gatherings does not apply to businesses and workplaces, they are expected to follow the recommended public health measures, including:
 - physical distancing for staff and clients;
 - regular cleaning and disinfection;
 - frequent handwashing and sanitizing;
 - use of PPE where available and appropriate; and
 - keeping staff who demonstrate or report COVID-19 symptoms out of the workplace.
- Special care and personal care homes must ensure that each staff member works in only one facility.

Phase One

Re-Opening Medical Services (May 4, 2020)

- Allow public access to the following previously restricted medical services: dentistry, optometry, physical therapy, optician services, podiatry, occupational therapy and chiropractic treatment.
- Allow public access to medical spas for therapeutic services provided by a licensed medical practitioner for Saskatchewan residents. Increased infection controls must be in place. All cosmetic services will be restricted until Phase Three.
- All medical service providers will be required to continue to take precautionary measures as outlined by the Chief Medical Health Officer (provider and client screening, face masks, etc.) when it is not possible to physically distance.
- [Guidelines for medical professionals are available.](#)

Medical services
(previously restricted)

May 4, 2020

Fishing and boat launches

May 4, 2020

Golf courses

May 15, 2020

Parks and campgrounds

June 1, 2020

Boat Launches (May 4, 2020)

- [Guidelines for access to boat launches in provincial parks](#) are available.

Fishing (May 2020)

- A licence may be required to fish in Saskatchewan. Eligibility information is available at saskatchewan.ca/fishing.
- The Saskatchewan fishing season begins on the following dates:
 - Southern Zone – May 5, 2020
 - Central Zone – May 15, 2020
 - Northern Zone – May 25, 2020
- [Guidelines for fishing in provincial parks](#) are available.

Golf Courses (May 15, 2020)

- All golf courses are required to take precautionary measures, including expanding the cleaning and disinfecting of common and high-touch surfaces in accordance with the public health order.
- Physical distancing must be observed at all times, with a minimum of two metres of space between individuals.
- [Guidelines for golf course operators](#) are available.

Drive-In Theatres (May 15, 2020)

- Drive-in theatres will be required to take precautionary measures such as increasing cleaning and disinfection in washrooms, limiting food services to contactless pick up or delivery and ensuring physical distancing.
- [Guidelines for drive-in theatres](#) are available.

Outfitting Camps (May 15, 2020)

- [Guidelines for outfitting operators](#) are available.

Parks and Campgrounds (June 1, 2020)

- Online reservations for provincial parks will launch on May 4, 2020.
- Providing a fixed date and clear guidelines for the opening of parks and campgrounds allows operators to begin preparing for opening. Members of the public can prepare to access these facilities online.
- Precautionary measures must be taken, including expanding the cleaning and disinfecting of common and high-touch surfaces in accordance with the public health order.
- Physical distancing must be observed at all times, with a minimum of two metres of space between individuals.
- Overnight stays prior to June 1, 2020, are permitted for individuals with seasonal long-term sites with self-supporting infrastructure (sewer and water) located in private campgrounds or regional parks.
- [Guidelines for operators of parks and campgrounds](#) are available.

Outdoor Individual Recreation (May 15, 2020)

- The Outdoor Individual Recreation Guidelines have been incorporated under the [Sports and Activities Guidelines](#).

Community Gardens (Currently Allowed)

- Community gardens can be operational, subject to all physical distancing and public gathering restrictions.
- Precautionary measures must include the cleaning and disinfection of commonly touched areas, including water taps, gardening tools and other frequent touch points.

* Other than in an allowable business, the size of public and private gatherings will remain at a maximum of 10 people.

Phase Two

Re-Opening Retail (May 19, 2020)

- Retail businesses that were previously not allowed can begin providing services to the public – subject to the [Clothing and Retail Guidelines](#) – including:
 - clothing stores
 - shoe stores
 - flower shops
 - sporting good/adventure stores
 - vaping supply shops (vaping and consumption of vaping products not permitted in stores)
 - boats, ATV and snowmobile dealers
 - gift, book and stationery stores
 - jewelry and accessory stores
 - toy stores
 - music, electronic and entertainment stores
 - pawn shops
 - thrift stores
 - travel agencies
 - marinas
 - u-pick produce

Retail
May 19, 2020
Select Personal Service
Facilities
May 19, 2020

Shopping Malls (May 19, 2020)

- Shopping malls and their retail tenants may resume business subject to the [Clothing and Retail Guidelines](#).
- Shopping mall operators must implement measures to ensure appropriate physical distancing in the common spaces of the mall, and queues must be managed with a minimum of two metres between people.
- Washrooms may be open to staff and the public, but increased cleaning and disinfection must take place.
- Food court facilities are restricted to pick-up and delivery service only. All seating areas must be closed.

- In order to maintain physical distancing, elevators should contain no more than four people spaced two metres apart (or as far apart as possible, in each corner). Household groups are not required to distance and may use the elevator in groups larger than four if no other individuals are on the elevator at the same time.
- Escalators must be managed to maintain two metres between users.

Re-Opening Select Personal Service Facilities (May 19, 2020)

- Some personal care service businesses can begin providing services to the public – subject to the [Personal Service Facilities Guidelines](#) – including:
 - hairstylist/barber (may wash, cut, style and chemically alter hair)
 - registered massage therapist
 - acupuncturist
 - acupressurist
- Re-opening these businesses will allow many small business owners to bring their businesses back online in a safe and efficient manner.
- All businesses and customers are expected to practise physical distancing. Where it is not possible to provide personal services through physical distancing, service providers will be required to take precautionary measures, such as client screening, wearing eye protection and face masks.
- Retail and personal services workplaces will need to follow guidance that essential businesses are currently following with respect to handwashing, intensive cleaning (particularly high-touch areas) and structuring stores to enable physical distancing. In order to meet these requirements, operators may need to limit the number of customers in the store.
- Garage sales are not permitted at this time and will be re-assessed in later phases.

Public Markets and Farmers Markets (May 19, 2020)

- Public markets and farmers markets may begin operations with the necessary precautionary measures in place, including increased cleaning and disinfecting, restricting the number of people in the market areas and practising physical distancing.
- [Guidelines for public and farmers markets](#) are available.

* Other than in an allowable business, the size of public and private gatherings will remain at a maximum of 10 people.

Phase Three – June 8, 2020

Re-Opening Remaining Personal Service Facilities

- Other personal care service businesses can begin providing services to the public, including:
 - esthetician
 - tattoo artist
 - make-up application
 - electrologist
 - manicurist
 - pedicurist
 - sun tanning parlour
 - facilities in which body piercing, bone grafting or scarification services are provided
 - other personal service facilities

Re-Opening Restaurants and Licensed Establishments – 50 per cent capacity

- Effective June 8, restaurants and licensed establishments will be able to open for service at 50 per cent capacity.
- [Guidelines for the re-opening of restaurants and licensed establishments](#) are available.

Re-Opening Gyms and Fitness Facilities

- Effective June 8, gyms and fitness facilities will be able to open for service.
- [Guidelines for the re-opening of gyms and fitness facilities](#) are available.

Re-Opening Child Care Facilities

- Child care facilities will be able to open for service, effective June 8.
- [Guidelines for the re-opening of child care facilities](#) are available.

Re-Opening Places of Worship

- Effective June 8, places of worship may resume services.
- [Guidelines](#) were developed in consultation with leaders from faith communities in the province.

Re-Opening Parks and Outdoor Playgrounds

- The Parks and Outdoor Playgrounds Guidelines have been incorporated into [the Recreation Guidelines](#).

June 8

Remaining Personal
Service Facilities

Restaurants and Licensed
Establishments
(50 per cent capacity)

Gyms and Fitness Facilities

Child Care Facilities

Places of Worship

Increase the Size of Public
and Private Gatherings:
Indoor – 15 People
Outdoor – 30 People

Re-Opening Beaches

- Beaches will be able to open on June 12.
- [Guidelines for the safe re-opening of beaches](#) are available.

Increase the Size of Public and Private Gatherings: Indoor – 15 People; Outdoor - 30 People

- All businesses and customers are expected to practise physical distancing.
- Restaurants, bars, lounges, food courts, cafeterias, cafes, bistros, and similar facilities are allowed up to 50 per cent capacity of their regular capacity to respect limitations on the size of gatherings and physical distancing. Buffet service is not permitted.
- Recreation areas within restaurants and licensed establishments are not allowed. This includes dance floors, VLTs, pool tables and other areas where it is not possible to practise physical distancing.
- All facilities that provide child care services as defined in *The Child Care Act, 2014*, are limited to a maximum of 25 children per building space to allow parents to return to work. Restricting children to a single facility is mandatory to reduce transmission risks.
- All child care facilities located within a special care or personal care home must have a private entrance and separate space so there are no shared common areas. There must be no interaction between children and residents of the home. The facility may continue to operate subject to any restrictions placed on all child care facilities.
- Re-opening gyms and fitness facilities promotes physical and mental wellness. Physical distancing must be maintained, and stringent cleaning and disinfecting protocols must be established.
- Clients over 40 years of age and those with underlying risk factors should use caution when considering visiting fitness facilities.

* Other than in an allowable business, the size of public and private gatherings will increase to a maximum of 15 people indoors and 30 people outdoors.

Phase Four

Part I – June 22

- Child and youth day camps
- Outdoor pools and spray parks
- Seasonal/recreational outdoor sports and activities

Part II

June 29

- Libraries
- Museums
- Galleries

Part I – June 22

Child and Youth Day
Camps

Outdoor Pools and Spray
Parks

Outdoors Sports and
Activities

- Movie theatres
- Live theatres

July 6

- Indoor sports and activities
- Indoor pools
- Indoor rinks
- Performing arts

July 9

- Casinos
- Bingo halls

July 16

- Racetracks and rodeo-related activities
- Live performances in restaurants, licensed establishments and farmers markets
- Banquet and conference facilities
- Car shows and trade shows

July 21

- Garage and yard sales
- Door-to-door canvassing and sales

Phase Five – Date TBD

Consider Lifting Some Long-Term Restrictions

- Options include limits on the size of public gatherings

Part II

**Libraries, Museums,
Art Galleries**
June 29

Movie, Live Theatres
June 29

Indoor Pools and Rinks
July 6

Indoor Activities
July 6

Performing Arts
July 6

Casinos and Bingo Halls
July 9

**Racetracks and Rodeo-
Related Activities**
July 16

**Banquet and Conference
Facilities**
July 16

Car and Trade Shows
July 16

Garage/Yard Sales
July 21

Door-to-Door Activities
July 21

COVID-19 Workplace Information

Businesses operating in Saskatchewan must operate according to the following COVID-19 response guidelines. This information will apply to all workplaces in Saskatchewan as restrictions are lifted and businesses are brought back into service.

For further information on COVID-19 and a [list of critical public services and allowable businesses](#), please visit saskatchewan.ca/COVID19 or contact the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Working from home should be implemented wherever possible.

General Workplace Information

- Workplaces are exempt from the restriction on indoor and outdoor gatherings. However, two-metre distancing between individuals should still be maintained. If this is not possible, other measures should be used, such as self-monitoring of personal health and supervision by Infection Prevention and Control or Occupational Health and Safety staff in the workplace.
- Operations may need to be altered or postponed to maintain distancing. Where this is not possible (i.e. for safety reasons, transport situations or production lines), staff should wash hands often and practise good coughing/sneezing etiquette (e.g. coughing into elbow).
- Besides customers, limit business-related visitors to essential services only. This may include tradespeople, pest control or compliance officers. Schedule visits to eliminate people gathering in reception areas.
- Customers should be encouraged to use credit or debit cards for payment. Limit contact by allowing customers to scan/tap/swipe their own cards.
- Employees who handle cash or credit cards should practise proper hand hygiene. When hands are not visibly soiled and between customer interactions, hand sanitizers approved by Health Canada (DIN or NPN number) can be used. Employees should wash their hands with soap and water when hands are visibly soiled, before and after any breaks, at the beginning and end of their shift, and before preparing food.
- Conduct business remotely (e.g. conference calls, video conferences, email), whenever possible.
- Limit the exchange of papers (e.g. signing contracts). If documents must be exchanged, leave them on a clean surface while maintaining a two-metre distance. Avoid sharing pens and office equipment. Disinfect after each use.

- In order to maintain physical distancing, elevators should contain no more than four people spaced two metres apart (or as far apart as possible, in each corner).
- When seated alone in a cubicle/office, and the public does not have access to the facility, masks may be removed.
- Household groups are not required to distance and may use the elevator in groups larger than four if no other individuals are on the elevator at the same time.
- Escalators must be managed to maintain two metres between users.
- A response plan should be in place in case a patron or staff member develops COVID-19 symptoms while at the venue.
- Allow and encourage employees to work from home/remotely when they can.

Cleaning, Disinfection and Personal Protective Equipment (PPE)

- The COVID-19 virus can survive for several days on different surfaces. Frequent cleaning and disinfection is necessary.
- Commonly touched areas and shared equipment must be cleaned and disinfected at least twice daily, or when visibly soiled. These include light switches, door handles, toilets, taps, handrails, countertops, mobile devices and keyboards.
- Many chemicals used for COVID-19 cleaning and disinfecting are classified under the Workplace Hazardous Materials Information System (WHMIS) 2015. Look for WHMIS hazard symbols on your products. [Learn more about WHMIS 2015.](#)

- Assign staff to dedicated work areas as much as possible. Discourage them from sharing phones, desks, offices and other tools and equipment.
- Clothing and fabric items should be laundered and dried on the highest temperature setting possible. Ensure items are thoroughly dried.
- [Cleaning and sanitizing information](#) for public facilities is available at saskatchewan.ca/COVID19.

- Employees should be provided access to tissues, no-touch trash receptacles, hand soap, hand sanitizers approved by Health Canada (DIN or NPN number), disinfectants and disposable towels.
- If PPE is required, there must be protocols for donning and doffing the equipment, as well as instructions for disposing of it. Additional [COVID-19 PPE information](#) is available.
- Businesses and employees must adhere to the face coverings (masks) public health order, which requires individuals to wear a face covering that covers the nose and mouth.

Worker Health/Preventative Measures

- All workers must self-monitor for symptoms and use the self-assessment tool at saskatchewan.ca/COVID19.
- Infection Prevention and Control or Occupational Health and Safety staff in the workplace can assist in monitoring employee symptoms and provide advice in line with the provincial public health order.
- Employers should consider daily screening and staff should not attend work if feeling ill.
- Employers should have plans in place for increased worker absences due to illness or isolation.
- All businesses must have a workplace illness policy. If a policy does not currently exist or does not align with COVID-19 recommendations, the following should be included:
 - Sick employees must stay home or be sent home from work;
 - For employees housed in workplace accommodations (i.e. work camps), sick employees must be confined to their rooms until cleared for re-entry into the workforce;
 - Sick employees must use the Government of Saskatchewan's self-assessment tool for COVID-19 and follow the subsequent directions.
 - When employees go home sick, their work areas must be cleaned and disinfected.
- Practise physical distancing at work:
 - Remain two metres apart from others.
 - Avoid large crowds.
 - Avoid handshakes and any other physical contact with others.
- Avoid unnecessary travel.
- Follow proper hand hygiene and coughing/sneezing etiquette:
 - Wash your hands frequently with soap and water. Scrub for 20 seconds.
 - If soap and water are not available, use hand sanitizer approved by Health Canada (DIN or NPN number).

- Avoid touching your face, mouth, nose and eyes.
- Cough/sneeze into the bend of your elbow and then wash your hands with soap and water.

Environmental Cleaning and Disinfection Guidelines

What Do I Need To Know?

- The COVID-19 virus can survive for several days on different surfaces and objects.
- Frequent cleaning and disinfection is important to prevent spread of the disease.
- Many common household and commercial disinfectant products will destroy the COVID-19 virus.
- Some disinfectants will have an eight-digit Drug Identification Number (DIN). These products are approved for use by Health Canada.
- Household bleach (five per cent sodium hypochlorite) may not have a DIN, but may be used following the instructions below.

What Do I Need To Do?

- Clean often. Areas visited by people should be kept clean and free from clutter.
- Commonly touched areas should be cleaned and disinfected twice daily or whenever visibly soiled. This includes light switches, door handles, toilets, taps, hand rails, counter tops, toys, touch screens/mobile devices and keyboards.
- Clothing and fabric items should be laundered and dried on the highest temperature setting possible. Ensure items are thoroughly dried.

Is There a Difference Between Cleaning and Disinfecting?

- Cleaning products remove dirt, dust and oils, but don't always kill germs.
- Disinfectants are applied after cleaning to destroy germs.
- Cleaning is required prior to disinfection to remove soil and ensure the effectiveness of disinfection (unless otherwise indicated by manufacturer).
- Common disinfectants include bleach solutions, quaternary ammonium (QUAT), alcohol (70 per cent) and peroxide. Vinegar, tea tree oil solutions, etc. are not proven to be effective disinfectants.

How Do I Make a Disinfecting Solution?

- Always read product labels and follow the manufacturer's directions. Do not use expired products.
- According to Health Canada, a disinfecting solution can be made by mixing one part of bleach into 50 parts of water. For example, 1 teaspoon (5 mL) bleach into 1 cup (250 mL) water. These directions are based on bleach that is 5 per cent sodium hypochlorite.
- Do not mix soap or other cleaners into the bleach and water solution.
- Apply the disinfecting solution using a spray bottle or a clean wiping cloth.
- Always use appropriate PPE for working with bleach, including protective gloves.
- Food contact surfaces should be rinsed with fresh water after disinfecting.
- Toys that children may put in their mouths must be thoroughly rinsed after disinfecting.
- If using disinfectant wipes, the manufacturer's recommended contact time (i.e. how long the surface remains wet) must be met. Disinfectant wipes are not recommended for heavily soiled surfaces.

For further information on COVID-19, please visit:

- Government of Saskatchewan: saskatchewan.ca/COVID19
- Government of Canada: canada.ca/en/public-health/services/diseases/coronavirus-disease-covid-19.html

Appropriate Use of Personal Protective Equipment (PPE) Guidelines

Information for Employers

Employers who have created PPE policies specifically to protect employees from the COVID-19 virus are encouraged to re-examine these policies to ensure valuable PPE resources are not unnecessarily diverted from the health care system. Please note this is not intended to change established PPE requirements for an employee's day-to-day work activities.

All businesses must develop and implement an exposure control plan. Exposure control plans provide information and identify appropriate precautions to protect workers from COVID-19. Information on the required elements of the plan can be found at worksafesask.ca.

Employers and staff must follow the basic requirements of frequent handwashing, physical distancing and staying home when ill.

A list of authorized medical devices, including approved PPE for uses related to COVID-19, is available from the [Government of Canada](https://www.canada.ca).

PPE Use in the Health Care System

Note: The Saskatchewan Health Authority (SHA) has implemented [Continuous Use Masking Principles and Guidelines](#). The SHA now requires surgical/procedure masks to be worn by all staff and physicians who may come into direct or indirect contact with patients/residents/clients in clinical care areas.

As with other sectors, the health care system uses engineered controls, administrative controls and PPE to address the many hazards faced by health care workers. There are extensive PPE requirements for employees in the health care system.

The appropriate use of PPE to protect against the COVID-19 virus is based on established infection prevention and control measures implemented by health authorities. PPE requirements based on droplet and contact precautions include:

- Gloves, a long-sleeved gown, and facial/eye protection when entering a patient room and in close contact with a COVID-19 patient. Please refer to the [public health order related to face coverings](#) for masking requirements. These items must be removed after leaving the room.

- Gloves, long-sleeved gown, an N95 respirator, and facial/eye protection when in direct contact with a COVID-19 patient and an aerosol generating medical procedure is performed that could result in fluid from the patient's respiratory system becoming airborne (e.g. intubation, CPR).
- Proper hand hygiene, including washing with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) when hands are not visibly soiled.
- Masks and other disposable PPE can be discarded into a plastic-lined garbage container.

PPE Use in Non-Health Care Settings

Most workers in non-health care settings will not require PPE for protection against the COVID-19 virus unless they are in situations similar to health care workers. Non-PPE controls should be put into place by employers as often as possible.

If it is determined that respiratory devices are required PPE in the workplace, employers must purchase approved respiratory protective devices. They must also meet regulatory requirements under section 7-3 of *The Occupational Health and Safety Regulations, 2020*, including ensuring that:

- Workers must be fit tested in an approved manner to the make, model, and size of the respirator.
- Workers wearing respirators are trained, can perform user seal checks, and know how to don and doff the respirator properly;
- Workers complete visual inspections of the respirator before use to check for defects or damage to the straps, nose clip, or filter material; and
- Workers are informed of any limitations of the respirator stated by the manufacturer.

What's the difference between a surgical/procedure mask and an N95 respirator?

A surgical/procedure mask is not a respirator. It is an approved (e.g. ASTM standard F2100), loose-fitting, disposable device that creates an effective physical barrier. It is intended to prevent droplets from an infected source from contaminating the skin and mucous membranes of the nose and mouth of the wearer. These masks can be worn by people infected with the COVID-19 virus to trap droplets expelled when coughing or sneezing. Health care workers routinely use surgical masks as part of their PPE requirements.

Left: Surgical/procedure mask.

Right: N95 respirator

N95 respirators are an approved (e.g. NIOSH) air-purifying, particulate-filtering, disposable, half-face piece respirator. These devices are designed to protect users from inhaling hazardous airborne particles and aerosols, including dusts and infection agents such as the COVID-19 virus. The protective devices are common protective in health care settings and require initial and ongoing training, as well as an approved method for fit-testing to ensure a tight facial seal. Without this training and fit-testing, they may not effectively protect against the COVID-19 virus.

A list of authorized medical devices including surgical/procedure masks and N95 respirators is available from the [Government of Canada](#).

Approved standards for respirators and surgical/procedure masks

To expand the availability of N95 respirators and surgical masks during the pandemic, some alternate standards designated as equivalent by the Government of Canada/Health Canada will be accepted. This includes respirators such as KN95, FFP2, P2, Korea 1st Class, DS and surgical masks such as Type IIR that are approved or certified under standards used in other countries similar to NIOSH and ASTM.

[Public Works and Government Services Canada](#) has information on specifications for approved COVID-19 products.

Certain particulate filter efficiency respirators (PFEs) manufactured in Canada are approved by Health Canada and can be used as PPE. Approved devices will have an IO

authorization number, name and model of the device, name of the manufacturer and the product level of protection stamped directly onto the product. IO authorization numbers can be revoked by Health Canada. Employers are responsible for ensuring the IO authorization number is authentic and current.

A list of devices that have been approved by Health Canada can be found on the [list of authorized medical devices](#). Devices with revoked IO authorization numbers can be found [on the list of products no longer authorized](#).

Are cloth masks considered PPE?

Cloth masks are non-medical masks or face coverings which are NOT considered PPE for use in a workplace setting. They are not regulated like surgical/procedure masks and respirators. Cloth masks are considered an additional or supplementary hygiene measure to further prevent transmission of COVID-19. Instead of protecting workers, they protect others from possible transmission.

If an employer determines that PPE is required to protect the health and safety of workers based on a hazard assessment, then the employer must supply approved PPE to workers. Cloth masks do not replace proven measures such as handwashing and physical distancing. Please refer to the [Cloth Mask Guidelines](#) and [Mask Use in the Workplace](#) for more information.

What are some non-health care occupations that may require PPE to protect against COVID-19?

Many tasks performed by workers in non-health care settings will not require PPE.

Occupations that require workers to come into close contact (less than two metres) with people known or suspected of having COVID-19 need to take extra precautions, including wearing PPE, including:

- First responders (e.g. police and fire officials);
- Corrections officials;
- Group home and personal care home workers responsible for resident care;
- Funeral home staff;
- Public health officials; and
- Personal service facilities.

Cloth Mask Guidelines

All people in Saskatchewan and the City of Lloydminster are required to wear non-medical masks in **indoor public spaces** to reduce the risk of COVID-19 transmission as per the public health order.

Health officials strongly recommend wearing a non-medical mask anywhere outside the home.

While the primary cause of COVID-19 transmission is people who are symptomatic, there is increasing evidence that some COVID-19 infected people never develop symptoms or are not yet sick and are able to transmit the virus.

Wearing non-medical masks (e.g. cloth or other materials) – even if you have no symptoms – is an additional measure you must take to protect yourself and others around you.

Wearing a non-medical mask will not prevent you from getting sick. However, it is another way of covering your mouth and nose to prevent your respiratory droplets from contaminating others or landing on surfaces.

People should also be aware that masks can become contaminated on the outside or when touched by hands.

- Avoid moving the mask around or adjusting it often.
- Masks should not be shared with others.

The best way to prevent the spread of COVID-19 is to continue to:

- Stay home as much as possible.
- Practise two-metre physical distancing.
- Wearing a mask.
- Wash your hands for at least 20 seconds with soap and water.
- Cover your cough or sneezes with tissues or your sleeve.

Individuals choosing to wear a non-medical mask need to understand their limitations and how to safely use them. Information is available on the Public Health Agency of Canada website: [Considerations in the use of homemade masks to protect against COVID-19](#). Information on how to make a non-medical mask and how to properly put on or remove a non-medical mask can be found here - [About non-medical masks and face coverings](#).

Delivery and Mail Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for delivery and mail services.

- Workers who handle mail and deliveries do not require special protection; however, they should wash their hands frequently with soap and water after handling all materials.
- Workers delivering products must minimize contact with people and surfaces at their delivery locations. Contactless drop-off procedures should be implemented.
- Delivery and transport vehicles should be cleaned and disinfected regularly.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Transportation Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for the transportation industry.

- Public transportation, including paratransit, should increase the frequency of cleaning and disinfecting all areas of public contact. Encourage members of the public to practise two-metre separation.
- Taxi and rideshare drivers should carry passengers in the back seats only. As much as possible, passengers should practise physical distancing within the vehicle. If one does not already exist, employers should consider installing a shield or barrier between the front and back seats, or around the driver.
- Please refer to the [public health order related to face covering](#) for masking requirements.
- Limit contact with passengers. Direct passengers to load their own luggage, preferably in the trunk of the vehicle.
- Clean and disinfect taxi/rideshare vehicles regularly, paying close attention to surfaces frequently touched by passengers, such as door handles, arm rests, seatbelts and buttons for windows and locks.
- Air flow in the vehicle should not be set to recirculating. However, if a passenger is being transported to/from a health care facility and/or is displaying respiratory symptoms, keep the windows open.
- Place signage with information on proper coughing/sneezing etiquette and hand hygiene where it is clearly visible to passengers.
- In situations where it is impossible to maintain a two-metre distance between workers in a vehicle, the following adaptations should be made:
 - Encourage the same workers to ride in the same company vehicle every shift.
 - Workers should occupy the same seats in a vehicle for the entire shift.
 - Avoid physical contact and sharing materials or equipment.
 - Vehicles should be frequently cleaned and disinfected during the shift, as well as between each shift. This includes commonly touched surfaces, such as the steering wheel, gear shift, dash, radio, door handles (interior and exterior), rearview mirror, armrest and seatbelts.
- Effective November 19, 2020, entertainment transportation (i.e. party buses, group limousines and recreational vehicles) is no longer permitted.

Child Care Facilities Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of child care facilities.

Child care facilities must follow all of the requirements in the public health order and continue to operate in compliance with all other applicable legislation and licensing requirements, including the Child Care Guidelines and *The Child Care Regulations, 2015*.

COVID-19 infections in children tend to be mild and similar to other viral respiratory infections. Symptoms such as dry cough, fever and gastrointestinal concerns (e.g. nausea, vomiting and diarrhea) may be present. Skin changes and lesions are less common symptoms.

All child care services as defined in *The Child Care Act, 2014*, are limited to a maximum of 25 children per building space. This may mean 25 children per facility or, in the case of larger facilities where area permits, a facility reconfigured to allow a maximum of 25 children in one defined area. These areas must be separate for each group and need to be separated by a barrier (floor to ceiling barriers not necessary) that can prevent children, toys and other items from crossing over. The child-to-adult ratios and usable floor space requirements for the child care areas must align with the Child Care Guidelines for Care and *The Child Care Regulations, 2015*.

Groups of children and the staff members assigned to them must stay together throughout the day and cannot mix with other groups. Staff should remain with the same group. Groups must be within in the same room/space at the same time, including pickups and drop-offs, meal times, playtime and outdoor activities.

Children are restricted to attending a single facility to reduce transmission risks. All child care facilities located within special care or personal care homes are subject to all general restrictions and must have private entrances and separate spaces so there are no shared common areas. There must be no interaction between children and residents of the home.

Guidelines for General Operation

- Please refer to the [public health order related to face coverings](#) for masking requirements.
- Child care operators and parents are expected to take a sensible approach to enforcing masking among children aged 3-12 to limit the spread of COVID-19 while also accommodating children that cannot tolerate masking.
- Staff and parents must encourage and practise physical distancing.
- Staff should minimize the frequency of direct physical contact with children and encourage children to minimize physical contact with each other.
- For younger children, maintaining physical distance is less practical and the focus should be on minimizing physical contact instead.
- Help younger children learn about physical distancing and less physical contact by creating games that include basic principles such as two arms lengths apart.
- Children from the same household (e.g. siblings) do not need to maintain physical distance from each other.
- Avoid close greetings like hugs or handshakes, and encourage physically distant greetings such as 'air fives' and waves.
- Plan for reduced contact activities such as shadow tag and, where possible, avoid activities that require clustering around a particular item or small area.
- The use of play areas should be limited to one group at a time, unless physical distancing can be maintained at all times between groups and play areas are not being shared. This may include having a barrier in place. Ensure hand hygiene occurs for staff and children before, during and after outdoor play.
- Wherever possible, physical distancing should be maintained, even within the same group. Consider modifying room configurations (e.g. separating tables) to promote physical distancing. Incorporate more individual activities or activities that encourage more space between children and staff.
- Where possible, remove or reduce play with toys that encourage group play in close proximity or increase the likelihood of physical contact. Keep toys that encourage individual play.
- Parents and caregivers should only bring personal comfort items (e.g. stuffed animals) if they are clean and can be laundered at the end of each day.
- Children and staff should not share food, drinks, soothers, bottles, sippy cups, toothbrushes, facecloths and other personal items. Label personal items with the child's name to discourage accidental sharing.
- Where possible, child care operators and staff should use telephone or video conferencing when possible to meet with staff and parents.

Drop-Off and Pickup Guidelines

- Checking temperatures, detailed screening or requiring COVID-19 testing of children and staff are not required or recommended at this time based on current evidence.
- Modify procedures for drop-off and pickup that support physical distancing and separate groups to the greatest extent possible. Possible strategies include separate group entrances, limit pickups and drop-offs to one parent/guardian, staggering entry or limiting the number of people in entry areas. Ensure parents are informed of all procedures.
- Please refer to the [public health order related to face coverings](#) for masking requirements.
- Where possible, the pickup and drop-off of children may occur outside the child care setting, unless there is a need for the parent or caregiver to enter the facility (e.g. very young children). If a parent must enter the facility, they must maintain physical distance from staff and other children, and be reminded to practise diligent hand hygiene.
- Parents and caregivers should use their own pens and avoid touching the sign-in/out sheet directly. They should practise hand hygiene before and after touching the sign-in/out sheet. Consider switching to a contactless or electronic sign-in/out method.
- Parents picking up children from more than one group should not be allowed to intermingle with children in the groups.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors for use by staff, parents and other essential visitors. Make disinfectant wipes available for wiping down diaper bags and strollers, as well as trash bins for disposing of the wipes.
- Hand sanitizer dispensers should not be in locations that can be accessed by young children, as hand sanitizers are not generally recommended for use by young children.
- Vehicles used by child care facilities for transporting children should be cleaned and disinfected as per transportation guidance in the [COVID-19 workplace guidelines](#). Transportation should be limited to the transport of children to and from care. Recreational travel requiring vehicles, such as field trips, is not permitted at this time.
- Neighbourhood walks are permitted as long as they are limited to a single group, with physical distancing maintained from members of the public.

Guidelines for Illness in Care

- Children who are ill are not permitted to attend child care. Staff can remind parents and guardians of this at drop-off to confirm that the child does not have symptoms of COVID-19. All parents, guardians, children and staff who

are under mandatory self-isolation must not attend the child care facility. Instead, they must stay home and self-isolate. Children can return to care once they are cleared by public health.

- Parents and caregivers must assess their children daily for symptoms of the common cold, influenza, COVID-19 or other infectious respiratory diseases before sending them to child care.
- Signage may be used to remind parents and guardians not to enter the facility if they are sick. Signs should be posted at the entrances to child care facilities.
- If a parent or guardian is unsure if they or a child should self-isolate, they should be directed to use the [online Saskatchewan COVID-19 self-assessment tool](#) or contact HealthLine 811 prior to attending the child care facility.
- If a child develops symptoms at the facility, the child should be isolated from other children and the parent or guardian should be notified to pick up the child immediately. If a separate room is not available, the child needs to be kept at least two metres away from other children.
- If the sick child is young and requires close contact and care, staff can continue to care for the child until the parent is able to pick up the child. Staff must wear eye protection during all interactions with the sick child, and should try to avoid contact with the child's respiratory secretions. Please refer to the [public health order related to face coverings](#) for masking requirements. Once the child leaves, staff must wash their hands and ensure all areas that the sick child touched are cleaned and disinfected. All items used by the child while isolated should be cleaned and disinfected as soon as the child is picked up. Items that cannot be cleaned and disinfected (e.g. paper, books and cardboard puzzles) should be removed from the program and stored in a sealed container for a minimum of three days.

Guidelines for Employees

- Non-essential visitors to facilities are not permitted at this time. Parents or guardians, essential services, and persons supporting a child in care (e.g. referring professionals, inspectors, etc.) are permitted.
- If staff are unable to maintain two-metre distancing from other staff, other measures must be used, such as self-monitoring of personal health, supervision by Infection Prevention and Control Officers or Occupational Health and Safety staff in the workplace, or implementing appropriate measures such as:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room, wherever possible.
 - Altering shift and break times to minimize the number of staff working in close quarters.

- Using markings or dividers in common areas to ensure physical distancing.
- Wearing personal protective equipment.
- Proper and frequent hand hygiene by staff and children is a vital component in preventing the transmission of illnesses. Ensure staff and children are practising proper hand hygiene and coughing/sneezing etiquette. Parents and staff can teach and reinforce these practices.
 - Hand hygiene stations should be set up at the entrance, so that children can clean their hands when they enter. If a sink with soap and water is not available, provide hand sanitizer approved by Health Canada (DIN or NPN number). Keep hand sanitizer out of the reach of children and supervise its use.
 - Incorporate additional hand hygiene opportunities into the daily schedule.
 - Ensure the child care facility is well stocked with handwashing supplies at all times, including soap, paper towels, waste bins and, where appropriate, hand sanitizer approved by Health Canada (DIN or NPN number).
 - Children regularly forget about proper handwashing. Staff and children should practise often, with staff modelling washing hands properly in a fun and relaxed way.
- All workers must self-monitor for symptoms and use the [online Saskatchewan COVID-19 self-assessment tool](#).
- Infection Prevention and Control or Occupational Health and Safety staff in the workplace can assist in monitoring employee symptoms and provide advice in line with the provincial public health order.
- It is recommended that child care facilities review their employee illness policies to ensure staff are able to remain home when ill (as is required).
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, facilities should ensure that all sick employees must stay home or be sent home from work.
- If employees go home sick, their group areas and any areas they had contact with must be cleaned and disinfected.

Cleaning and Sanitization Guidelines

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spread of the disease.
- Maintain a cleaning schedule and ensure staff are adequately assigned and trained for additional cleaning, sanitizing and disinfection required for COVID-19 transmission mitigation.
- Increase cleaning and disinfection of commonly contacted areas. Common touch areas include those accessed by children, parents and/or employees.

Examples of common touch surfaces include table tops, light switches, telephones (including personal cell phones), door knobs, sink taps, toilet handles, kitchen counter tops, gates, hand rails, hand sanitizer bottles/dispensers, toys, sleep cots/mats and cribs.

- Due to the increased amount of cleaning required during an outbreak situation, it is best practice to decrease the number of toys available to children.
- All items (bedding, toys, etc.) used by children that day must be removed from the play area and disinfected, or disinfected in place.
- Indoor shared spaces and structures that cannot be cleaned and disinfected between groups should not be used. If play structures are to be used by more than one group, the structures can only be used by one group at a time and must be cleaned and disinfected before and after use by each group.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses and is approved by Health Canada (DIN).
- Any food contact surfaces must be disinfected with a product safe for food surfaces or immediately rinsed following disinfection.
- Ensure washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Clean and disinfect diapering stations after each use.
- Garbage bins should be emptied frequently.
- Remove toys and other items that cannot be easily cleaned and disinfected. Launder plush/stuffed toys following use.
- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Wash hands before wearing and after removing gloves.
- Clean and disinfect cots and cribs after each use, and launder crib linens between children. If parents are providing their own crib linen, the linens should be laundered and placed in a sealed plastic or washable bag before bringing to the child care facility. Do not shake the linens.
- Programs that utilize a space with other user groups (e.g. programs in museums, community centres, etc.) must ensure the space is cleaned and disinfected before and after using the space.

Program Operator Guidelines

- No self-serve or family-style meal service. There should be no common food items (e.g. salt and pepper shakers). Meals should be served in individual portions to each child by a designated staff member.
- Utensils should be used to serve food items (not fingers).
- If meals or snacks are provided, ensure all children have their own individual meals or snacks. Reusable utensils must be cleaned and sanitized after each use.

- Food provided by the family should be stored with the child's belongings or, if refrigeration is required, should be kept in an area designated for the child's group and should not be handled by staff from other groups. Food from home must not be shared with other children.
- Children are not allowed to participate in food preparation.
- Where possible, children should practise physical distancing while eating. Consider staggering snack or meal times to allow spacing between children during meals.
- Consider using books and individual games as a part of learning, so children can sit independently and distanced from each other.
- Where possible, sensory play should be discontinued. If necessary, sensory play should be conducted as an individual activity (e.g. each child gets a ball of playdough and tools, one at a time at the sand table). Handwashing must occur before and after using shared sensory items, children must be supervised and discouraged from touching their faces, and items must be disinfected or discarded between uses by different groups.
- Play activities that encourage the creation of respiratory droplets, such as blowing bubbles, must be discontinued.
- When possible, increase the distance between nap mats. If space is tight, place children head to toe.
- Each group should have designated equipment (e.g. balls, loose equipment) or clean and disinfect equipment between group uses.
- Establish a plan to prevent mingling of groups in washrooms, and to minimize the number of shared surfaces in washrooms.

Personal Protective Equipment

- If in contact with a sick child, wear personal protective equipment as per regular precautions for hazards normally encountered in the workplace.
- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Gloves must be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- Other than the above situations, glove use is not required nor recommended.
- For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Places of Worship Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for places of worship.

The Government of Saskatchewan, in consultation with leaders from faith communities in the province, developed guidelines for places of worship to resume service. These guidelines apply to indoor and outdoor gatherings.

These guidelines are intended to support a return to in-person services for places of worship. The guidelines are intended to allow places of worship that choose to return to service to do so safely and guard against the transmission of COVID-19.

Places of worship should only return to service once they are able to safely implement the controls identified in these guidelines.

Drive-In or Remote Worship Guidelines

- When possible, it's recommended that services are delivered online (via Zoom, YouTube, etc.).
- They may also be delivered as drive-in services, but individuals are encouraged to remain in their vehicles as much as possible. Only individuals from the same household may occupy the same vehicle.
- Drive-in services must be held in designated parking lots or staging areas, and must meet the following conditions:
 - Event organizers must have measures in place to ensure people maintain two metres of separation if they need to leave their vehicles. However, attendees should be encouraged to remain in their vehicles.
 - Vehicles must be separated by a minimum of two metres.
 - Access to washroom facilities must be limited. Where washroom access is provided, frequent cleaning and disinfection must take place throughout the event.
 - People leaving their vehicles to use the washrooms must maintain a minimum of two metres of separation from others at all times.
 - No food or beverage service is allowed.
 - All other services must be suspended, including picnic and play areas.
 - Anyone who is feeling sick or symptomatic must remain at home.

- Organizers must provide proposals for any events to local public health officials, as well as be available to answer any questions, to ensure the event does not pose a risk of spreading COVID-19.

Guidelines for Accommodating Worship

Places of worship may resume services providing physical distancing of two metres can be maintained between each individual household.

- Delivering services virtually or through remote delivery such as drive-in service is recommended.
- Effective May 30, 2021, the total number of people participating in all worship services in Saskatchewan cannot exceed 30 per cent of seating capacity or 150 people, whichever is less. These guidelines apply to all worship services, including celebrations of life, weddings and outdoor ceremonies. However, these guidelines do not apply to receptions or non-ceremonial gatherings.
- Services must be held in their usual location. Concurrent services are permitted in other rooms in the facility, as long as the overall number does not exceed 150 for the entire facility.
- Graveside services must not exceed 150 people. Maintain two metres distancing between non-household/close contact groups. Wear masks when distancing can't be maintained.
- Seating (or designated worship space) must be arranged so that physical distancing can be observed at all times. Consideration must be given to how people enter and exit pews and other seating areas. A minimum of two metres must be maintained between household groups.
- No food and beverage may be present or served (food and beverage as part of a faith-based ceremony or ritual are not restricted).
- To help ensure safety, individuals must be separated by two metres, unless they are part of the same household group.
- These guidelines do not apply to receptions or non-ceremonial gatherings.
- Where possible, registration of participants is encouraged to effectively manage the number of individuals attending. Registration should be facilitated to discourage attendees from common-use items such as pens and pencils.
- Use visual cues to support physical distancing.
- Implement one-way traffic flow to promote physical distancing (i.e. enter through one door and exit through another).
- Attendees who are medically vulnerable are strongly encouraged to delay their return to services and continue to participate in services online, where possible.
- Attendees, employees and volunteers are required to stay home if sick or symptomatic.

- Places of worship will be required to identify measures by which entry and exit is managed to ensure physical distancing is maintained.
- Promote physical distancing by marking the directional flow of people through buildings and areas. Mark seating areas and post visual reminders to observe physical distancing.
- Individuals from the same household may be seated together and should remain in place once they are seated.
- If multiple gatherings are held on a single day, the start and end times must allow those who attend one gathering to exit safely, avoiding contact with those arriving for the next gathering. Time is needed to clean and disinfect common surfaces between services. They must not be held concurrently.
- Dismissal of gatherings should be done in a way that supports physical distancing.
- All ancillary events, such as social events, should be postponed for the immediate future.
- Where possible, consider managing parking lot assignments to ensure physical distancing is maintained.
- Everyone in attendance at a place of worship must wear a mask except clergy members or religious leaders who are leading a service or ceremony while speaking from a podium, lectern, platform, stage, desk or other standing or seating area dedicated to speaking.
- While unmasked and speaking, clergy members and religious leaders should increase their physical distance from others to at least three metres.
- For the purposes of contact tracing, places of worship are required to collect and maintain a list of people that are present within their facilities for any purposes. Contact details must include date, time, name, address, and phone number or email address.
- When collecting contact details, avoid the sharing of pens or other common touch instruments unless disinfected between each use.
- Contact registration lists must be maintained confidentially by the place of worship and destroyed after 30 days.

Non-ceremonial meetings

- Non-ceremonial meetings are permitted in groups no larger than 150 or 30 per cent capacity, whichever is less, as long as physical distancing can be maintained.
- No food or beverage is allowed.
- No concurrent meetings or meetings taking place at the same time as worship services.
- Allow enough time for entry and exit, as well as cleaning and disinfection.
- Seating must be arranged so that two metres of physical distancing can be maintained between non-household members.

- Attendees to remain seated except for entering and exiting, as well as using the washroom.
- If tables are being used, there must not be more than four per table.

Guidelines for Hygiene and Cleaning

As part of the return to service, places of worship will be required to enhance cleaning and disinfection practices.

- Review [cleaning and disinfection practices](#).
- Increase cleaning and disinfection of commonly contacted areas, including seating areas, doorknobs, handles, ceremonial objects, elevator buttons, railings and light switches.
- Encourage everyone to practise proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer when hands are not visibly dirty and handwashing isn't available.
 - Using hand sanitizer approved by Health Canada (DIN and NPN number).
 - Avoiding touching your face, mouth, nose and eyes.
- Manage access to washrooms in a way to promote physical distancing and increase cleaning and disinfection. Ensure washrooms are always well stocked with liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or provide handwashing stations near doors and other high-traffic areas.

Guidelines for Higher-Risk Activities

- All physical contact, such as handshaking or passing objects between individuals, is not permitted. Ushers, greeters or other guest services must maintain physical distancing and avoid contact with worshippers.
- Microphones cannot be shared between individuals due to the difficulty of cleaning and disinfecting these devices. Minimize the number of attendees providing readings or performing other activities that would require the use of a microphone.
- While choirs and singing by congregation members are permitted in places of worship, caution is advised as singing is a high-risk. Refer to the [Performing Arts Guidelines](#) for guidance on choirs/group vocals, including masking and physical distancing requirements.

- Singers and performers, including singing members of congregation, must wear a face covering or mask that covers the nose and mouth (i.e. non-medical masks). Please refer to the [public health order related to face coverings](#) for masking requirements.
- A two-metre separation is required between musicians, measured from either the person or the bell-end of an instrument, whichever is greater. Musicians within the same household are not required to maintain physical distance, but must be separated from patrons and performers from outside of their household.
- When indoors, all musicians must wear a non-medical mask at all times during the performance, except for musicians playing a woodwind, brass or other instrument operated by breath. All musicians must maintain a distance of three metres from others while playing.
- Instrument bell covers made of a tightly woven fabric with at least two layers are recommended but not required.
- Musicians playing instruments other than brass or woodwind (e.g. guitar or percussion players) must maintain two metres of separation or utilize a barrier device (i.e. Plexiglas) if distancing cannot be maintained.
- Performers must use their own microphones. Instruments, drum sticks/mallets, music stands and other items must not be shared between participants, unless cleaned and disinfected between uses. Items that can't be disinfected (e.g. sheet music) must not be shared, laminated to allow for disinfection, or held for 24 hours before sharing. Hand hygiene must be completed prior to handling common items.
- When conducting religious rituals, they must be conducted in a way that safeguards the health of congregants.
- Passing of offering baskets will not be permitted. Alternatives are encouraged, such as online giving options or a depository to accept offerings.
- Objects that cannot be disinfected between uses should not be distributed. If objects cannot be disinfected, the place of worship must determine the means by which they can be discarded after use to prevent contamination, such as paper bulletins or other single-use materials.
- Books and other common-use items should be removed from use, if possible. Projecting materials or distribution of single-use materials can be considered. Books or items that can't be disinfected should be removed and held for 24 hours before being brought back into use.
- Food and beverage service must be suspended at this time.

Primary and Secondary Educational Institution Guidelines

To help school divisions prepare for the return of students and staff, the guidelines below have been developed to inform local planning.

For younger children, maintaining physical distance is less practical and the focus should be on minimizing physical contact instead. The precautionary measures within these guidelines will be implemented to reduce risk, and include standards for cleaning and sanitization along with measures for general operations, facilities, transportation and programming.

To provide provincial-level direction on operational matters resulting from the pandemic, an Education Response Planning Team (RPT) was formed with representation from the Ministry of Education, Saskatchewan School Boards Association, Saskatchewan Teachers' Federation, League of Educational Administrators, Directors and Superintendents, and Saskatchewan Association of School Business Officials. The RPT has developed additional information on operationalizing these guidelines, which will be made available for school division personnel.

Guidelines for General Operation

Hygiene

- Promote proper hand hygiene practices for staff and children. Practices must include using soap and water when hands are soiled and hand sanitizer approved by Health Canada (DIN or NPN number) when visibly clean. Although general use containers need to be available, where possible, students and staff should have their own hand sanitizer. Supervise the use of hand sanitizer with young children.
- All students, parents, staff and visitors in all schools must wear a mask (except while seated consuming food or beverage or engaging in aquatic fitness activities).
- Please refer to the [public health order related to face coverings](#) for masking requirements.

Limiting Physical Contact

- For younger children, maintaining physical distance is less practical and the focus should be on minimizing physical contact instead.
- Staff, parents and students must encourage and practise preventative measures, such as limiting physical contact, throughout the school day (i.e.

during instruction, recess, nutrition programs, extra-curricular) and avoiding close greetings (i.e. hugs, handshakes).

- Help younger children learn about physical distancing and less physical contact by creating games that include basic principles such as two arms lengths apart and avoid close greetings like hugs or handshakes. Encourage physically distant greetings such as 'air fives' and waves.
- Plan for reduced physical contact activities and, where possible, avoid activities that require clustering around a particular item or small area.
- Modify procedures for entering the building to support physical distancing. Possible strategies include staggered entry into classes and schools, separate group entrances, limiting pickups and drop-offs to one parent/guardian, etc.
- Stagger recess/snack, lunch and class transition times to provide a greater amount of space for everyone.
- Children from the same household (e.g. siblings) do not need to maintain physical distance from each other.
- Wherever possible, physical distancing should be maintained, even within the same group. Consider modifying room configurations (e.g. separating tables) to promote physical distancing.
- Incorporate more individual activities or activities that encourage more space between students and staff. Activities that require physical contact should be avoided.
- Groups of students and the staff members assigned to them should stay together throughout the day and not mix with other groups. Staff should remain with the same group whenever possible. Strive to minimize the number of different teachers and educational assistants that interact with groups of students throughout the day.
- Modifications may be needed for all shared spaces, including boot rooms, hallways, waiting areas, etc. Thought can be given to establishing visual cues and direction flow plans.
- Specific responses for Prekindergarten and Kindergarten environments will be developed by school divisions, taking into account the unique nature of the learning programs and student development.
- Where possible, school division administrators and staff should use telephone or video conferencing to meet with staff and parents.

Limiting Shared Materials and Equipment

- Establish clear protocols for bringing materials (i.e. bags, school supplies) into and out of schools.
- Where possible, remove or reduce play with toys that encourage group play in close proximity or increase the likelihood of physical contact. Keep toys that encourage individual play.
- Students and staff should not share food and drinks and other personal items. Label personal items with the student's name to discourage accidental sharing.
- Strategically limit the number of touch points per day on electronic devices.
- Classroom activities and recess times should not include equipment that might be touched by multiple students. Due to the increased cleaning required, it is best to decrease the number of toys/equipment available to children. Remove toys and other items that cannot be easily cleaned and disinfected.

Extracurricular

- Extracurricular activities can be developed and implemented in accordance with school division plans. Wherever possible, activities should follow applicable Re-Open Saskatchewan Guidelines.

Facilities

- Consider modifying room configurations to promote physical distancing. Where practical, the use of physical barriers (i.e. engineered controls) may be established where distancing cannot be achieved.
- Ensure adequate soap and hand sanitizer approved by Health Canada (DIN or NPN number) in each building, especially near entrances. Make disinfectant wipes available for wiping down frequently used surfaces.
- Signage may be used to remind parents and guardians not to enter the facility if they are sick. Signs should be posted at school entrances.
- Signs and markings in hallways should be considered to limit cross-exposure.
- Establish a plan to prevent mingling of groups in washrooms, and to minimize the number of shared surfaces.

Cleaning, Disinfection and Sanitization Guidelines

- Frequent cleaning and disinfection is important to prevent the spread of the disease.
- All disinfectants used must be approved by Health Canada (DIN). All label instructions for disinfectants, including contact time, should be followed.
- A school-wide plan for enhanced cleaning and disinfection should be established using the current provincial guidance. Roles and responsibilities, staff training where needed, and a maintenance schedule are recommended. Items/objects that cannot be effectively cleaned/disinfected daily or between classes should be removed for the time being.
- Increase cleaning and disinfection of commonly contacted areas.
- Any food contact surfaces, including water fountains/dispensing equipment, must be disinfected with a product safe for food surfaces or immediately rinsed following disinfection.
- Garbage bins should be emptied frequently.
- Sanitation/cleaning procedures will need to be implemented to support multiple users accessing technology.
- Indoor shared spaces and structures that cannot be cleaned and disinfected between groups should not be used.
- Wear disposable gloves when cleaning blood or body fluids. Wash hands before wearing and after removing gloves. They must be changed after every interaction and when changing tasks. Beyond this situation, glove use is not required nor recommended.
- Ensure the school is well stocked with handwashing supplies at all times, including soap, paper towels, waste bins and, where appropriate, hand sanitizer approved by Health Canada (DIN or NPN number).
- Store hand sanitizer out of the reach of young children and supervise its use.

Guidelines for Illness in Care

- Promote proper hand hygiene practices for staff and students. Practices must include using soap and water when hands are soiled and hand sanitizer approved by Health Canada (DIN or NPN number) when visibly clean. Although general use containers need to be available, where possible, students and staff should have their own hand sanitizer. Supervise the use of hand sanitizer with young children.
- Checking temperatures, detailed screening or requiring COVID-19 testing of students and staff are not required or recommended at this time, based on current evidence.
- An illness administrative procedure with precautions specific to COVID-19 will be created by school divisions. Symptoms of illness that are not consistent with COVID-19 should continue to be managed per existing policies.

- Students and staff who are sick should be advised to stay home. Not all symptoms of illness need to be subject to this requirement (i.e. headaches, cramps, etc.). Staff would not be required to enter the school when sick to create plans for substitute teachers.
- All parents, guardians, students and staff who are confirmed to be COVID-19 positive and/or under mandatory self-isolation must not enter the school. Instead, they must stay home and self-isolate. Students and staff can return to school once they are cleared by public health.
- Schools should identify an appropriate isolation area for anyone with COVID-19 symptoms who are not able to immediately leave the facility. If a student develops symptoms at school or upon arrival at school, the student should be isolated from other students and the parent or guardian should be notified to pick up the student immediately. Provision for supervision of the student must be in place.
 - If a separate room is not available, the student needs to be kept at least two metres away from other students and staff.
 - If the student requires close contact and care, staff must wear eye protection during all interactions with the sick child, and should try to avoid contact with the student's respiratory secretions. Please refer to the [public health order related to face coverings](#) for masking requirements.
- Once the student leaves, staff must wash their hands and ensure all areas that the sick student touched are cleaned and disinfected. Items that cannot be cleaned and disinfected should be removed from the area and stored in a sealed container for a minimum of three days.
- All staff must self-monitor for symptoms and use the online Saskatchewan COVID-19 Self-Assessment Tool.
- If staff is in contact with a sick child, wear personal protective equipment as per regular precautions for hazards normally encountered in the workplace.

Nutrition Programs

- Proper hand hygiene must be practised before and after eating.
- School-supplied food should be delivered directly to the classroom. Students should eat lunches in their classrooms.
- No self-serve or family-style meal service. There should be no common food items. Food should be served in individual portions to each child by a designated staff member.
- Utensils should be used to serve food items. Reusable utensils must be cleaned and sanitized after each use.
- Food from home must not be shared with other students and should be stored with the student's belongings.
- Students are not allowed to participate in food preparation.

Mental Health and Social-Emotional Supports

- Supports for the health and wellness of students and staff will be provided, including helping students understand the importance of preventative measures that are in place and practising proper hand hygiene and coughing/sneezing etiquette.
- School divisions and school leaders are encouraged to implement trauma-informed practice to support students, staff and families. Trauma-informed practice includes: providing inclusive and compassionate learning environments; understanding coping strategies; supporting independence; and helping to minimize additional stress or trauma by addressing individual student needs.
- The Ministry of Education will continue to offer supports for mental wellness, including but not limited to:
 - a resource posted on saskatchewan.ca to assist parents and caregivers;
 - working with Kids Help Phone to promote their professional counselling services, which are available 24 hours a day via phone, online chat or text, as well as their database of local community resources;
 - working with SaskTel to prevent and respond to bullying, cyberbullying and promote healthy relationships through the Be Kind Online website, which includes a number of resources and tools;
 - providing a provincial licence for Respect in Schools training for all staff; and
 - offering grants to school divisions to support mental health and student safety training initiatives.
- Saskatchewan's provincial curricula provide opportunities for students to learn about health, well-being and student safety.

Students with Intensive Needs

- Students with additional needs may require updated assessments and revised individual goals.
- For personal interactions, conditions must be created to allow for the provision of supports within a safe and secure environment, which may include the school setting or other appropriate spaces.
- All health and safety measures must be in place and communicated with the relevant staff and family prior to the provision of the service.
- All engagements will occur in a supervised setting, which may include the school or other appropriate spaces, and staff will not enter into private residences or provide personal transportation.

- Other methods of providing service or additional precautions may be suggested for those with compromised immune systems, in consultation with a medical professional.
- Consideration will be given to the directions given by the professional governing body of the staff providing the supports.
- It may not be possible to support all students with intensive needs in-person due to health and safety guidelines.

Transportation

- The following transportation protocols could be considered for implementation:
 - Students should be assigned seats and a record of this seating plan should be kept in order to assist with contact tracing in the case of a student being confirmed with a case of COVID-19. Students who live in the same household should be seated together.
 - Partitions around drivers can be considered.
 - Cleaning and disinfection of buses or other vehicles used to transport students is required between each run. Recreational travel requiring vehicles, such as field trips, is not permitted at this time.
 - Parents will be asked to transport their own children where possible.
 - Encourage pickup and drop-off of students outside of the building, unless there is a need for the parent or guardian to enter the school.
 - If parents or guardians must enter the school, they should maintain physical distancing from staff and other children, and be reminded to practise diligent hand hygiene.

Graduation Guidelines

The information below provides schools, families and communities with guidelines for conducting safe graduation ceremonies in Saskatchewan.

Whenever possible, virtual or live-streamed events are recommended instead of in-person events. Other options include:

Drive-In Ceremonies

- Drive-in graduations must ensure the following public health measures are enforced:
 - Anyone who is sick or symptomatic must remain home.
 - Must be held in designated parking lots or staging areas (with owner consent).
 - Multiple ceremonies may be needed depending on the size of the graduating class.
 - Vehicles must be separated by at least five metres.
 - Individuals are required to remain inside or within arm's reach of their vehicles, and are not permitted to move to other vehicles (i.e. not go sit with friends).
 - No objects may be passed between vehicles.
 - Organizers must implement adequate measures to keep people from unnecessarily leaving their vehicles during the event.
 - Vehicle occupants must be limited to members from the same household.
 - Where washroom access is provided, provisions are made to ensure the facilities are fully stocked for handwashing and there is frequent cleaning and disinfection throughout the event.
 - Appropriate physical distancing is maintained at all times between people who need to leave the vehicle to access the washroom or other facilities.
 - No food and beverage service is permitted.
 - Individuals using other modes of transportation to attend the event (e.g. walking, biking, public transportation) shall maintain two metres of physical distancing and join the vehicles with people from the same household as soon as they arrive. If these individuals are not joining a vehicle, they are limited to no more than public gathering restrictions allow while observing all physical distancing protocols.

Outdoor/Indoor Ceremonies

- All public ceremonies must be outside and a minimum of two metres of physical distancing must be maintained between household groups. No food or beverages are permitted.
- Step One - Step One of the Saskatchewan Re-Opening Roadmap permits 30 people at public indoor gatherings and up to 150 people at public outdoor gatherings. As a result, beginning May 30, 2021 outdoor graduations may have up to 150 people, including graduates and guests. Indoor graduations may have up to 30 people, which also includes graduates and guests. Teachers and school staff required to host the events are not included in the totals.
- Step Two - In Step Two, effective June 20, 2021, outdoor and indoor graduations will be limited to 150 people, including graduates and guests. Teachers and school staff required to host the event are not included in this total.
- Step Three - Most remaining restrictions will be removed. Guidance for large events is under development.
- During all steps of the Re-Opening Roadmap, drive-in graduations and virtual graduations are also available options.
- Use visual cues to support physical distancing.
- Implement one-way traffic flow to promote physical distancing (i.e. enter through one door and exit through another).
- Ceremonies must ensure:
 - Anyone who is sick or symptomatic must remain home.
 - Multiple ceremonies may be needed depending on the size of the graduating class.
 - No objects may be passed between participants.
 - Organizers must implement adequate measures to support physical distancing.
 - Where washroom access is provided, provisions are made to ensure the facilities are fully stocked for handwashing and there is frequent cleaning and disinfection throughout the event.
 - No food and beverage service is permitted.

Virtual Ceremonies

- Virtual indoor graduations are permitted. All other public health measures must be followed, including maintaining physical distancing of two metres.

If a graduation event is held, it must comply with the requirements in the public health order. Further questions can be directed to local public health officials to ensure the event does not risk transmission of COVID-19.

Drive-In Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of drive-in theatres.

Drive-in theatres must meet the following conditions:

- There are no capacity requirements as long as two metres of physical distance can be maintained between non-household groups.
- Physical distancing should be observed at all times, with a minimum of two metres between individuals when outside of vehicles.
- Vehicles must be separated by a minimum of two metres. Only individuals from the same household may occupy the same vehicle.
- If customers are required to have contact with any equipment (e.g. speaker), the equipment must be cleaned and disinfected after each use. Please refer to the [Environmental Cleaning and Disinfection Guidelines](#).
- Where possible, payments should be accepted through contactless methods (e.g. tap or e-transfer).
- Access to washroom facilities must be limited.
 - Where washroom access is provided, frequent cleaning and disinfection must take place throughout the movie.
 - Physical distancing of two metres must be maintained for those waiting for washroom facilities.
- Food/concession services are limited to contactless pickup or delivery only and must ensure physical distancing.
 - Delivery services are recommended to reduce crowding and queuing.
 - While waiting for food pickup, physical distancing must be observed.
 - Provide soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) for customers and staff to use.
 - All common touch items should be removed from service, such as removing bottles/pumps. Self-contained condiment packets should be distributed by staff.
- When food and beverage is available, seating must be removed or follow [Restaurant and Licensed Establishment Guidelines](#).
- Playgrounds are permitted and should follow the [Recreation Guidelines](#).
- Employees must have access to soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) for hand hygiene and appropriate

cleaners and disinfectants per [COVID-19 Cleaning and Disinfection of Public Facilities guidelines](#).

- Employees are required to stay home if they are sick or symptomatic.
- Patrons should be reminded that anyone who is feeling sick or symptomatic must remain at home.

Workplace Food and Accommodations (including Work Camps) Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of workplaces offering food and accommodation services.

- In businesses where meals are provided to employees, meal service in common eating areas should occur in rotations to minimize the number of people in the room. Physical distancing must be practised at all times. Food services staff should serve all food, and common touch items should be removed.
- Lunchrooms and break rooms must be arranged to follow physical distancing practices. Consider staggered lunch and break times to reduce the number of employees gathering.
- Where workplaces provide accommodations, such as work camps, shared facilities (e.g. workout facilities, common rooms and game rooms) must be closed.
- Businesses should increase the cleaning and disinfecting of essential shared facilities, such as telephones, computers, washrooms and laundry rooms.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Restaurants and Licensed Establishments Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of restaurants and taverns.

These guidelines apply to indoor and outdoor seating areas. In addition to these guidelines, all other applicable provincial regulations and standards must be followed.

Guidelines for General Operation

- For indoor dining, two metres of physical distancing must be maintained between tables or a structural barrier must be in place between tables when two metres of distance is not possible.
- No physical barriers are required for outdoor seating (e.g. patio) areas, as long as dining groups are spaced two metres apart. For specific requirements on outdoor seating areas, please see the [public health order – food, beverage and liquor serving premises](#).
- Effective, June 20, 2021, there is no limit on table capacity. An occupancy level must be maintained that allows tables of customers to maintain two metres of physical distance.
- Aisles must be wide enough to allow room for people to maintain two metres of physical distancing. Consider using one-way traffic flow to help maintain distancing.
- Operators must have a plan in place to accommodate patio patrons in the event of inclement weather to ensure physical distancing is maintained.
- All restaurants and licensed establishments must collect names and contact information from all patrons that dine in for the purposes of contact tracing. This information must be held for 30 days and provided to the Saskatchewan Health Authority upon request.
- Operators must promote physical distancing wherever possible – for customers and staff – including waiting areas, bar seating, food pickup areas, washrooms and payment lines.
- Physical line controls are required such as crowd control cordons, barriers or stanchions at entrances and pickup lines. Place markers (e.g. tape or cones) every two metres as visible cues to support physical distancing.
- Consider modifying or eliminating in-person meetings and shift huddles.

- Consider having customers seat themselves by displaying table numbers. The host/hostess must maintain two metres where impermeable barriers are used or three metres when impermeable barriers are not used.
- The operation of coat checks is not permitted at this time.
- Dance floors and karaoke are not currently permitted.
- Video lottery terminals (VLTs) are permitted subject to the [Casino and Bingo Hall Guidelines](#). Arcade games (e.g. pinball) must follow the same guidelines.
- Recreation areas, such as dart boards and pool tables, are permitted subject to the [Sports and Activities Guidelines](#).
- Music (including live music) and announcement volume levels must be kept at 80 decibels or lower.

Music and Live performances:

- Live DJs are permitted, but must ensure physical distancing at all times. Written requests cannot be accepted at this time.
- Singing and shouting can spread droplets further than regular conversation, so they present an increased risk.
- Please refer to the [public health order related to face coverings](#) for masking requirements.
- People in the band/orchestra must be four metres from patrons.
- Everyone else in the band that is not a woodwind or brass must be two metres apart or utilize a barrier (e.g. Plexiglass) if distancing cannot be maintained.
- Musicians within the same household are not required to maintain physical distance, but must be separated from patrons and other performers from outside of their household.
- Instrument bell covers made of a tightly woven fabric with at least two layers are recommended but not required.
- Performers must use their own microphones. Instruments, drum sticks/mallets, music stands and other items must not be shared between participants, unless cleaned and disinfected between uses. Items that can't be disinfected (e.g. sheet music) must not be shared, laminated to allow for disinfection, or held for 24 hours before sharing. Hand hygiene must be completed prior to handling common items.
- Music, televisions and other background sounds should be played at a volume that allows patrons and staff to speak at the volume of a normal conversation (about 80 decibels).
- Banquet halls and similar facilities must follow the [Banquet and Conference Facilities Guidelines](#).

Guidelines for Employees

Whenever possible, staff must maintain two metres of separation from other staff and customers. However, physical distancing in certain work environments may be difficult, such as kitchens. If staff are unable to maintain two metres away from co-workers, other measures must be in place to prevent the transmission of COVID-19. This may include, but is not limited to, self-monitoring of personal health and supervision by Infection Prevention and Control Officers or Occupational Health and Safety or implementing measures such as:

- Staggering activities to limit the number of staff in a confined area during the same period.
- Moving activities to another room whenever possible. For example, separating duties into unused dining areas may be an option for preparation and packaging.
- Altering shift and break times to minimize the number of staff working in close quarters.
- Using markings or dividers in the kitchen to ensure physical distancing.
- Considering directional arrows on the floor in the kitchen to control the flow of traffic, and clearly mark exit and entrance doors from the kitchen to service areas.
- Wearing personal protective equipment.

Proper and frequent hand hygiene by staff is a vital component in preventing the transmission of illnesses. Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:

- Washing hands often with soap and water for at least 20 seconds.
- Using hand sanitizer only when appropriate in a food service situation.
- Only using hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoiding touching their faces, mouths, noses and eyes.
- Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing hands. If a tissue is not available, cough or sneeze into the elbow – not the hands.
- It is recommended that older staff/seniors or those with a weakened immune system wear a procedure/surgical mask.
- Glove use is not required nor recommended. If staff are using gloves, they must be changed after every interaction, as well as when changing tasks. Hand hygiene must be performed between every glove change. This includes handwashing with soap and water or hand sanitizer approved by Health Canada – (DIN or NPN number).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the self-assessment tool available at

saskatchewan.ca/COVID19.

- It is recommended that facilities review their employee illness policies to ensure staff are able to remain home when ill (as is required). Facilities are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure that all sick employees must stay home or be sent home from work.
- If employees go home sick, their work areas and any areas they had contact with must be cleaned and sanitized.

Cleaning and Sanitization Guidelines

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent the spread of the disease.
- Maintain a cleaning schedule and ensure staff are adequately assigned and trained for additional cleaning, sanitizing and disinfection duties to help reduce transmission of COVID-19.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, pay stations, washrooms and other high-touch locations for customers.
- Customers should be encouraged to wash or sanitize their hands prior to and following eating.
- Increase cleaning and sanitization of commonly contacted areas, including doorknobs, handles, counters, chairs, payment machine terminals and/or self-pay stations, and light switches. Common touch areas include those accessed by customers and employees.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses and approved by Health Canada (DIN).
- Thoroughly clean and sanitize tables after each customer. Tablecloths must be removed and discarded or laundered between customers. Any food contact surfaces must be disinfected as per the Provincial Public Eating Establishment Standards (100 ppm bleach, 200 ppm QUAT) or immediately rinsed following disinfection.
- Remove common touch items from tables, including condiments, salt, pepper, napkin holders and special displays/decor.
- Menus (electronic or laminated) are permitted on tables provided they are cleaned and disinfected between dining groups.
- If menus cannot be cleaned and sanitized (e.g. paper menus), they must be discarded after each use. Where possible, consider using alternative menus,

such as digital menu boards, online menus, large chalkboards or online pre-ordering.

- Ensure employee and public washrooms are cleaned and disinfected with increased frequency, are always well stocked with liquid soap and paper towels, and that warm running water is available. Garbage bins should be emptied frequently.

Food and Beverage Service Guidelines

- Call ahead or make reservations to help manage numbers. Rearrange waiting areas to ensure physical distancing can be maintained. Post signs indicating waiting protocols and best practices.
- Provide clear signage and markings for take-out vs. dine-in services.
- Use markings or one-way traffic flow within the restaurant.
- Develop measures for servers to limit contact with customers, including:
 - Having guests pour their own beverages (e.g. providing water, coffee or other beverages at the table) or have staff pre-pour beverages before delivering them to the table;
 - Removing one chair per table and use that space as a designated place for the server to stand at the table, similar to the open end of a booth;
 - Leaving food and drinks at the front of the table;
 - Avoiding touching cups and glasses for refills; and
 - Providing packaging for customers to pack their own unfinished food items.
- Monitor the number of customers entering and exiting the establishment. Once the maximum number is reached, allow one person to enter for every person who leaves.
- Buffets and self-serve food lines remain closed at this time. Do not provide open self-serve food to customers (including refill stations, condiment stations, etc.). Pre-packaged foods are acceptable, but must be handled by employees only.
- Self-serve beverages are permitted with increased cleaning, sanitization and supervision.
- Cafeteria-style food facilities, where staff serve to customers, are allowed. Food must be protected from customer contact and cross-contamination.
- If a bar or food preparation area is open to seating, seating areas or any public area, utensils, garnishes, glassware, etc. must be two metres away from members of the public or protected from cross-contamination.
- Customers can sit at bar areas, as long as two metres of physical distancing is maintained between members of a dining party where a physical barrier separates them from other parties. Physical distancing between parties must

increase to three metres where physical barriers are absent. All items behind the bar (e.g. glassware, dishware, garnishes) must be protected from exposure to customers and cross-contamination.

- There should be no movement of customers between bars and eating areas.
- Where possible, continue to offer and encourage online or telephone orders with delivery, drive-thru or pickup services.
- Where possible, use rolled silverware where napkins cover utensils. Do not pre-set tables. Staff should hand out tableware or utensils to customers.
- Provide clean bags for take-out foods. Customers should be encouraged not to use their own containers, reusable bags or boxes for take-out orders.
- Post signs indicating that no customer items (e.g. wallet, purse, jacket) are to be placed on take-out or payment counters.
- Customers who are sick or on self-isolation must not be admitted.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Hotels and Motels Guidelines (including Guests Self-Isolating)

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for hotel/motel and short-term rental operators.

- It is recommended that hotel/motel guests book in advance.
- Where physical distancing cannot be maintained, consider the use of physical barriers.
- Where possible, schedule agents so that consistent groups (cohorts) work together exclusively to prevent the risk of broader transmission through the workplace.
- Consider using every other workstation to ensure two metres of physical distance between front desk agents.
- Where physical distancing cannot be maintained, consider the use of physical barriers.
- Reconfigure public seating areas to promote physical distancing.

Operations

- Increase cleaning and disinfection of commonly touched areas. Common touch areas include counters, light switches, telephones (including personal cell phones), remote controls, door knobs, sink taps, toilet handles, hand rails, buttons and hand sanitizer bottles/dispensers.
- Bedding, towels and fabric items must be washed at the hottest settings possible.
- For shared laundry services, staff must only allow one guest at a time. The laundry room must be cleaned and disinfected after every use.
- The disinfectant used in the facility must be adequate for the elimination of viruses and approved by Health Canada (DIN).
- Washrooms must be cleaned and disinfected, always well stocked with liquid soap and paper towels, and warm running water must be available.
- Garbage bins must be emptied frequently.
- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Wash hands before wearing and after removing gloves.

Guests Self-Isolating in Rooms

- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Wash hands before wearing and after removing gloves.
- Regular housekeeping services should not be provided to rooms where individuals are isolating. Advise staff to leave linens, toiletries, cleaning supplies (including garbage bags) and food/meals outside the door. Staff should not enter these rooms.
- Staff should wear disposable gloves and wash their hands with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) after handling soiled items from rooms (e.g. linens, tableware and garbage bags).
- Clothing and fabric items should be washed and dried in mechanical laundry machines at the hottest settings possible.
- Steam cleaning can be used for areas that may be contaminated, but cannot be laundered (e.g. armchairs).
- In a commercial dishwasher, properly wash and disinfect any reusable glassware or dishes in rooms between guests. Or, consider providing disposable dishes and utensils in rooms.
- If possible, isolate guests in rooms with an independent HVAC unit.
- Guests who are in isolation must not enter common areas of the hotel.
- After guests are done isolating in a room, staff, wearing appropriate personal protection equipment, must thoroughly clean and disinfect all surfaces that may be contaminated, including laundering all clothing and fabric items. [Cleaning and Disinfection information](#) is available at [Saskatchewan.ca/COVID19](https://saskatchewan.ca/COVID19).
- Hotel management should share the latest travel advisories and isolation recommendations with staff and guests - travel.gc.ca/travelling/health-safety/travel-health-notice.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Medical Professionals Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for medical professionals.

Patient and Client Considerations

- Initial patient and client bookings will need to be limited to maintain necessary public health measures, but may need to be prioritized by urgency.
- Patient and client bookings should be scheduled in a manner that ensures no more patients/clients gather in waiting areas than are allowed under the public and private gathering restrictions, while still ensuring physical distancing.
- If clients must attend with children or other family members, those individuals must be included in the maximum number of people allowed in the area. Should scheduling errors result in more people than are permitted under the public and private gathering restrictions while still ensuring physical distancing, alternate waiting areas should be planned.
- Alternative solutions to waiting in the office should be considered, such as asking people to wait in vehicles and text messaging or calling when appointments are ready.
- At the time of booking or in advance of an appointment, clinic staff should call patients/clients to inform them of the public health measures. Staff should also ask if patients/clients have been experiencing symptoms of illness consistent with COVID-19.
- Seats in waiting areas must be spaced to maintain a minimum physical distance of two metres. Household contacts are not required to separate.
- Visual cues for areas where patients/clients are required to queue should be marked and a directional flow through the facility established.
- Non-essential items should be removed from client waiting areas, including magazines, toys and remote controls.
- Staff should screen all patients/clients for visible symptoms consistent with COVID-19. Anyone who is symptomatic should be asked to wear a surgical/procedure mask. Note: Medical professionals may determine if appointments for symptomatic clients should be cancelled.
- Common areas and other high-touch surfaces and objects should be cleaned and disinfected after each use, including reception counters, seating areas (including clinic room seats), doors, handrails and objects or machines used in therapies.
- All medical and health professionals must practise effective hand hygiene after each client - washing their hands with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number).

- Employers should carefully consider the appropriate use of personal protective equipment for staff and patients/clients. [Guidelines for personal protective equipment](#) are available.
- Carefully consider any COVID-19 safe return-to-work recommendations provided by professional associations or regulatory bodies.

Cleaning and Disinfecting

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spread of the disease.
- Workplaces should implement enhanced environmental cleaning. Commonly touched areas and shared equipment should be cleaned and disinfected at least twice daily or whenever visibly soiled.
- Wherever possible, discourage workers from sharing phones, desks, offices and other tools and equipment.
- Commonly touched areas include light switches, door handles, toilets, taps, hand rails, counter tops, touch screens/mobile devices and keyboards.
- Clothing and fabric items should be laundered and dried on the highest temperature setting possible. Ensure items are thoroughly dried.
- [Cleaning and sanitizing information](#) is available at saskatchewan.ca/COVID19.
- Hand sanitizers must be approved by Health Canada (DIN or NPN number) to ensure they are effective.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Grocery Store Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of grocery stores.

As the COVID-19 pandemic continues and people are increasingly concerned about personal protection, it is essential for retail food and grocery stores to ensure safe and reliable access to food, supplies and other provisions – and to take measures aimed at preventing further transmission of the virus. Below are some key steps for the sector to implement during the pandemic.

While food retailers are considered essential and allowed to remain open under the public health order, precautions should be taken to protect the health of workers, customers and the general public.

Effective June 20, 2021, there are no capacity limits for retailers. An occupancy level must be maintained that allows staff and customers to maintain two metres of physical distance. Please refer to the [public health order related to face coverings](#) for masking requirements.

Requirements for Store Operations

Enhance the store's sanitization plan and schedule. Check that the disinfectant used in the store is appropriate for the elimination of viruses. Increase cleaning and disinfection of commonly contacted areas, including door handles, cooler and freezer handles, till conveyances, keyboards, scales, bathroom surfaces, countertops, PIN pads, self-pay stations, hand baskets and light switches. Common touch surfaces include those in areas accessed by customers and employees.

Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:

- Washing hands often with soap and water for at least 20 seconds.
- Using hand sanitizer when hands are not visibly dirty and handwashing isn't available.
- Only using hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoiding touching your face, mouth, nose and eyes.
- Coughing or sneezing into a tissue, then immediately disposing of the tissue and wash hands. If a tissue is not available, cough or sneeze into your elbow, not your hands.
- Ensuring employee and public washrooms are always well stocked with

- liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently. Antibacterial soap is not recommended and has no additional benefit in preventing the spread of COVID-19.
- Providing clean carry-out bags for purchased food and grocery products. Customers should be encouraged not to use their own containers, reusable bags or boxes.
- Posting signs indicating that no customer packaging is to be used or placed on checkout counters.
- Not selling bulk items, except via gravity feed bins, where staff dispense the bulk items or where an alternative plan has been reviewed and accepted by health officials. If used, gravity feed bins should be supervised and wiped down between uses.
- Placing hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, pay stations and other high-touch locations for customers and staff. Make wipes and trash bins available for wiping down shopping carts and disposing of the wipes.
- No food or drink sampling is permitted at this time.

Promote physical distancing of customers:

- Use physical line controls, such as crowd control cordons at entrances and checkout lines. Place markers (e.g. tape or cones) every two metres as visible cues to support physical distancing.
- Implement one-way aisles to promote physical distancing and communicate the information through signage and announcements.
- Make announcements at regular intervals over the store speaker reminding customers to stay two metres away from each other.
- Post clear signs in multiple locations indicating the maximum number of customers and staff the store can accommodate at one time.
- Consider monitoring the number of customers and staff entering and leaving the store. Once the maximum number is reached, allow one person to enter for every one person who exits.
- Offer online or telephone orders with delivery or pickup services as alternatives to in-person shopping.
- Glove use is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks after coming into contact with commonly touched areas/surfaces. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- Ask customers who arrive with cold, influenza or COVID-19-like symptoms (fever, cough or breathing issues) to return home and use a delivery service instead.

- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the self-assessment tool available at saskatchewan.ca/COVID19.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Public and Farmers Market Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of public markets and farmers markets.

It is essential for operators of public and farmers markets to modify their practices and take measures to protect their customers and vendors from contracting COVID-19.

Similar to other businesses where food is purchased, market operators must take measures to ensure physical distancing and restrictions on activities, as well as comply with the public health order and follow the applicable guidelines in this plan. Preventative measures include:

- Limiting the number of people present in an area to ensure safe physical distancing (minimum space of two metres) can be maintained. Capacity is limited to the public health order.
- Providing facilities for people to wash their hands with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number).
- Increasing cleaning and disinfection in all areas, particularly those with common touch points.

Market operators must ensure all measures are in place and followed at all times. Please note municipalities are responsible for issuing business licences and may impose further restrictions.

Physical Distancing

- Limit entry to the market to allow for physical distancing of two metres between individuals and family groups. Cordon off areas to control access.
- Minimize the number of entrances and exits to control the number of customers. A single entrance and exit may be the best way to manage the number of customers, but this must comply with all other code requirements (e.g. fire code).
- Manage lineups into the market to meet physical distancing requirements of two metres between individuals. Direct traffic flow through the market using chalk or tape markings on the ground, ropes, barriers or other markers as required. Where possible, implement one-direction traffic flow to promote physical distancing.
- Vendors must set up with adequate distance between booths to ensure physical distancing can be maintained.

- Manage physical distancing for food vendors providing take-away service (e.g. when ordering and picking up food). Whenever possible, place take-out food vendors in one area of the market to minimize traffic volume.
- If seating is provided, it should be arranged in a way that ensures:
 - At least two metres of physical distancing between tables or a structural barrier must be in place between tables.
- Food and drink consumption outside of designated seated area is prohibited.
- Create an environment where customers and vendors can practise safe physical distancing of at least two metres. Provide signage at entrances, exits and throughout the market reminding vendors and customers of distancing requirements.

Restricted Activities, Enhanced Hygiene and Additional Measures

Markets may only sell take-away food (fresh, frozen and prepared foods) from food carts and food trucks, as well as pre-packaged liquor. Vendors must be considered essential services or an allowable business. The [list of essential services and allowable businesses](#) is available on saskatchewan.ca/COVID19. All vendors and products must meet existing Saskatchewan legislation and regulations.

Vendors are allowed to sell permitted foods as per the provincial guidelines. In addition:

- Liquor is only allowed in sealed retail containers (e.g. bottles, cans).
- Only take-away meals can be provided from food carts and food trucks.
- Edible plants and seedlings are permitted for sale.
- No self-serve bulk foods are permitted.

Handling of foods:

- Vendors are encouraged to pre-package prepared foods to minimize direct contact by customers.
- Prepared foods (e.g. breads, muffins) that are not pre-packaged at the time of sale must be stored away from customers. The product can be packaged at time of sale.
- Customers must not use or provide their own containers, including reusable cups and containers.
- Vendors are encouraged to provide clean carry-out bags for purchased food and grocery products. Customers should be encouraged not to use their own reusable bags or boxes.
- Vendors must dispense all food products.

Additional requirements and restrictions:

- Vendors must discontinue all food sampling, including by-the-glass sales of wine and other alcohols.
- Singing and shouting can spread droplets further than regular conversation, so

they present an increased risk. Please refer to the music and live performances section in the [Restaurants and Licensed Establishment Guidelines](#).

- Vendors selling ready-to-eat foods must package them into take-away containers or brown bags. They must also post signs advising customers they are not allowed to eat foods in the markets, as per physical distancing requirements.
- Markets and vendors must increase the frequency of cleaning and disinfection of high-touch surfaces within the market. Please refer to the [Environmental Cleaning and Disinfection Guidelines](#).
- Members of the public who are sick or symptomatic must not visit the market.
- Customers who arrive with cold, influenza or COVID-19-like symptoms (fever, cough or breathing issues) must be asked to return home.
- Vendors who are sick or symptomatic should not be allowed to vend at the market while they are ill.
- All vendors, especially those in constant contact with the public, should self-monitor for symptoms and use the self-assessment tool available at saskatchewan.ca/COVID19. If they develop symptoms, they should leave the market immediately.
- Establish pickup locations for online orders (e.g. drive-thru pickup).
- Where possible, create cashless payment systems through online orders and point-of-sale devices in vendor booths.
- If washroom facilities are provided, they must be cleaned and disinfected frequently throughout the duration of the market and be set up to promote physical distancing. They must be fully stocked with soap, water and paper towels. Portable toilets may be stocked with hand sanitizer approved by Health Canada (DIN or NPN number).

Clothing and Retail Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of clothing and retail stores.

As the COVID-19 pandemic continues and people are increasingly concerned about personal protection, it is essential for retail stores to ensure safe and reliable access to retail goods – and to take measures aimed at preventing further transmission of the virus. This document outlines key steps for the sector to implement during the pandemic.

The guidance listed below is targeted at all retail operators outside of grocery stores.

Effective June 20, 2021, there are no capacity limits for retailers. An occupancy level must be maintained that allows staff and customers to maintain two metres of physical distance. Please refer to the [public health order related to face coverings](#) for masking requirements.

Requirements for Store Operations

Enhance the store's sanitization plan and schedule. Check that the disinfectant used in the store is appropriate for elimination of viruses and is approved by Health Canada (DIN). Increase cleaning and disinfection of commonly contacted areas, including doorknobs, handles, display racks, checkout areas, change rooms, keyboards, bathroom surfaces, counters, PIN pads and/or self-pay stations, hand baskets/shopping carts and light switches. Common touch areas include those accessed by customers and employees.

Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:

- Washing hands often with soap and water for at least 20 seconds.
- Using hand sanitizer when hands are not visibly dirty and handwashing isn't available.
- Only using hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoiding touching your face, mouth, nose and eyes.
- Coughing or sneezing into a tissue, then immediately dispose of the tissue and wash hands. If a tissue is not available, cough or sneeze into your elbow, not your hands.

Ensure employee and public washrooms are always well stocked with liquid soap and paper towels, and that warm running water is available. Garbage bins should be emptied frequently. Antibacterial soap is not recommended and has no additional benefit in preventing the spread of COVID-19.

Provide clean carry-out bags for purchased goods.

Post signs indicating that no customer packaging is to be used or placed on checkout counters.

No food or beverage sampling is permitted.

If bulk sales areas are being used (i.e. small accessories), ensure areas are cleaned and disinfected between uses or have staff dispense the items.

If the retail operations include rentals, enhanced cleaning and disinfection must occur between all rentals.

Customers should be encouraged to minimize touching merchandise. Post signs requesting them to only touch items they intend to buy.

Change rooms can be used at 100 per cent occupancy. However, they must be cleaned and disinfected after each use.

Discourage the exchange or return of goods. If goods are returned:

- When possible, clean and disinfect all surfaces of the merchandise; or
- If items cannot be cleaned and disinfected, isolate goods in a separate bin (labelled with return date) for at least 24 hours before being returned to store shelves. Employees must wash their hands after handling.

For thrift stores and other businesses selling second-hand goods, launder donated/used items and dry on the hottest setting possible. For items that cannot be laundered, clean and disinfect all surfaces or isolate items in a separate bin for at least 24 hours before placing on store shelves/racks. Employees must wash their hands after handling.

Where items are kept behind counters and provided to customers to try on and handle, such as jewelry and electronics, customers must clean their hands with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) prior to handling the items. Items placed on or near customer faces will be cleaned/disinfected.

Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, pay stations, change rooms and other high-touch locations for customers and staff. Make wipes

and trash bins available for wiping down shopping carts and disposing of the wipes.

Promote physical distancing of staff and customers:

- Physical line controls are required, such as crowd control cordons or stanchions at entrances and checkout lines. Place markers (e.g. tape or cones) every two metres as visible cues to support physical distancing.
- Make announcements at regular intervals over the store speaker reminding customers to stay two metres apart.
- Post clear signs in multiple locations that indicate the maximum number of customers and staff allowed in the store at one time.
- Monitor the number of customers and staff entering and exiting the store. Once the maximum number of persons is reached, allow one person to enter for every one person who leaves.

Offer and encourage online or telephone orders with delivery or pick-up services as alternatives to in-person shopping.

Glove use is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks after coming into contact with commonly touched areas/surfaces. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).

Ask customers who arrive with cold, influenza or COVID-19-like symptoms (fever, cough or breathing issues) to return home and use a delivery service instead.

All workers, especially those in constant contact with the public, must self-monitor for symptoms and use the self-assessment tool available at saskatchewan.ca/COVID19.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Personal Service Facilities

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for personal service facilities.

Facilities must continue to be in compliance with all applicable provincial regulations and standard work requirements, including those outlined in the Personal Service Facility Best Management Practice (PSFBMP) document. This guidance is for all personal services mentioned in Re-Open Saskatchewan.

Effective June 20, 2021, there are no capacity limits for personal care facilities. An occupancy level must be maintained that allows customers to maintain two metres of physical distance. Please refer to the [public health order related to face coverings](#) for masking requirements.

General Information

Certain personal service facilities may need to be altered or postponed to maintain two metres of physical distancing between clients. However, some employees will not be able to maintain this separation during the provision of service. Therefore, measures such as correct personal protective equipment (PPE) and self-monitoring shall be applied.

Clients should attend appointments alone and not bring along friends or children.

Clients should arrive no more than five minutes before the expected appointments, and any waiting area should be set up so clients are at least two metres apart. Remove unnecessary communal items, such as candy, magazines and complimentary phone chargers. Waiting chairs must be cleaned and disinfected after each client.

In order to accommodate physical distancing, appointment times may need to be staggered. During appointments and services, clients must be seated at least two metres from each other.

Alternative solutions to waiting in the office should be considered, such as asking people to wait in vehicles and text messaging or calling when appointments are ready.

During transactions, if possible, limit the exchange of papers such as receipts. Where possible, payments should be accepted through contactless methods (e.g. tap or e-transfer).

Beverages (coffee, tea, water) must not be offered at this time.

Handwashing stations and/or approved hand sanitizers should be available, and clients should be encouraged to use them upon entering and exiting. They should also be available at each station. Hand sanitizers must be approved by Health Canada (DIN or NPN number).

Staffrooms and break rooms should be arranged to follow physical distancing practices. Consider staggered break times to reduce employee gathering numbers.

Essential shared facilities, such as telephones, computers, washrooms and laundry rooms, must receive increased cleaning and disinfection. Shared spaces used by multiple clients must be cleaned and disinfected between clients.

Retail space should be modified to implement physical distancing requirements. This may include direction for customers on distancing in lines, limiting the number of patrons in the store, etc. Where possible, discourage browsing of retail products and support online or telephone purchases with front of store pickup and strict no return policies. Remove samples and testers.

When booking appointments, clients should be reminded to reschedule if they become sick or are placed on self-isolation. Clients should be screened prior to sitting for appointments by asking if they are ill or symptomatic. No services should be performed on ill or symptomatic clients.

Since many facilities have been closed for a prolonged period of time, service providers must ensure that all tools and equipment receive proper maintenance and testing to ensure safe usage, including autoclaves and sterilizers.

Cleaning and Disinfecting

The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spread of the disease.

Workplaces must implement enhanced environmental cleaning. Commonly touched surfaces and shared equipment must be cleaned and disinfected after contact between individuals, even when not visibly soiled. This includes tanning beds, foot tubs, client chairs, mirror handles and wash sink chairs.

Commonly touched surfaces by employees must also be cleaned and disinfected regularly. Wherever possible, each employee should use their own products. If product bottles are shared, they must be cleaned and disinfected between uses.

Towels or any other items contacting a client must be discarded or properly laundered between each use.

Clothing and fabric items should be laundered and dried on the highest temperature setting possible. Ensure items are thoroughly dried.

[Cleaning and sanitizing information](#) is available.

All label instructions for disinfectants, including contact time, should be followed.

Workplaces should provide employees with resources such as tissues, no-touch trash receptacles, hand soap, hand sanitizers, disinfectants, and disposable towels to promote a safe and hygienic work environment.

Hand sanitizers must be approved by Health Canada (DIN or NPN number).

Personal Protective Equipment

Please refer to the [public health order related to face coverings](#) for masking requirements. Employees working in close contact with clients must wear, eye protection and an apron to protect clothes. It is recommended that older staff/seniors or those with a weakened immune system wear a procedure/surgical mask.

Glove use is not required (unless needed for specific services per the PSFBMP). If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change – hand sanitizer or handwashing with soap and water.

Workplaces should have protocols for donning and doffing PPE, as well as instructions for proper disposal of it. [More information on PPE](#) is available.

All workers, especially those in contact with the public, should self-monitor for symptoms and use the self-assessment tool available at saskatchewan.ca/COVID19.

Where available, Infection Prevention and Control or Occupational Health and Safety staff in the workplace can assist in monitoring employee symptoms and provide advice in line with the public health order.

Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation. It is recommended that facilities review their employee illness policies to ensure staff are able to remain home when sick (as is required). If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:

- Sick employees must stay home or be sent home from work if symptoms present.
- Sick employees housed in workplace accommodations (i.e. work camps) should be confined to their rooms while ill until cleared for re-entry into the workforce.
- Sick employees should use the Government of Saskatchewan's [online self-assessment tool](#) to help determine if the illness may be COVID-19. The tool provides people with next steps depending on their responses.
- If an employee has gone home sick, their work areas must be cleaned and disinfected.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Greenhouse and Landscaping Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of greenhouses and landscaping businesses.

Effective June 20, 2021, there are no capacity limits for retailers. An occupancy level must be maintained that allows staff and customers to maintain two metres of physical distance. Please refer to the: [Clothing and Retail Guidelines and the public health order related to face coverings](#) for masking requirements.

Greenhouse and landscaping retailers can be considered an allowable business under the following mandatory conditions:

1. Operate with delivery or curbside pickup.
- AND/OR
2. Comply with the [guidelines for retail operations](#), including:
 - Use physical line controls, such as crowd control cordons at entrances and checkout lines. Place markers (e.g. tape or cones) every two metres as visible cues to support physical distancing.
 - Implement one-way aisles to promote physical distancing and communicate the information through signage and announcements.
 - Post clear signs in multiple locations indicating the maximum number of customers and staff the store can accommodate at one time.
 - Monitoring the number of customers and staff entering and leaving the store. Once the maximum number is reached, allow one person to enter for every one person who exits.
 - Offer online or telephone orders with delivery or pickup services as alternatives to in-person shopping.
 - Glove use is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change - wash hands with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number).
 - Ask customers who arrive with cold, influenza or COVID-19-like symptoms (fever, cough or breathing issues) to return home and use a delivery service instead.
 - All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the self-assessment tool available at saskatchewan.ca/COVID19.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Gyms and Fitness Facilities Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of gyms and fitness facilities.

General Information

- Where possible, gyms and fitness centres should only be open when at least one staff member is present. If patrons have uncontrolled access, it is not possible to ensure physical distancing rules are followed or disinfection of equipment is being performed after each use.
- If 24-hour unrestricted access is available without staff present, operators must have a mechanism to keep track of attendees at all times. Clients must check in and check out, including name and contact information via fob use or sign-in sheets to support contact tracing if required.
- Clients should be screened upon arrival by asking if they are sick or symptomatic. If they answer in the affirmative, they should not be allowed to enter.
- Contact information must be collected for all patrons to assist Public Health with contact tracing if required.
- Anyone with COVID-19 symptoms should go straight home and contact HealthLine 811 for further guidance. If a patron is severely sick (e.g. difficulty breathing, chest pain, etc.), call 911.
- Staff experiencing symptoms of the illness (fever, cough or difficulty breathing) must be sent home. Workplaces should have an employee illness policy to encourage staff who are sick to stay home.
- Whenever possible, use contactless forms of payment and check-in.
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
 - Masks may be removed while in a pool, but must be worn in common areas of aquatic facilities, including the pool deck.

Physical Distancing

- The number of patrons allowed into the facility at one time should be limited to:
 - Ensure there is sufficient space to allow patrons to remain at least two metres apart in common areas;

- Ensure other distancing requirements are met based on activities occurring;
 - Prevent congregating; and
 - Allow staff time to clean and disinfect equipment and other surfaces frequently.
- Consider using a booking system that allows a limited number of patrons to book and attend a specified time slot. Ensure there is sufficient time between time slots for cleaning and disinfection of the facility and equipment, as well as to reduce crowding (e.g. at check-in counter).
 - Limit the number of members in the facility at one time. Only people working out should be in the facility.
 - Place markers such as tape or cones every two metres to provide clients with visible queues that encourage physical distancing.
 - Signage should be on display throughout the facility reinforcing key messages of physical distancing, wiping equipment and hygiene protocols.
 - Consider directing traffic within the facility with one-way flow (where possible) using floor markers/stickers. Clearly mark entrances and exits.
 - Physical distancing must be observed at all times. Equipment should be spaced at least three metres apart. If removal of equipment or erection of barriers is not possible, equipment closer than three metres apart should be closed to use.
 - Effective May 30, 2021, high-intensity fitness activities and group fitness classes (e.g. Zumba, spin, cross-fit, Pilates, etc.) are permitted, for all ages with no capacity limits as long as physical distancing of at least three metres is maintained.
 - Effective May 30, 2021, lower-intensity activities and group fitness classes (e.g. yoga, tai chi, etc.) are permitted, with no capacity limits as long as physical distancing of at least two metres is maintained.
 - Consider creating set groupings of classes by assigning specific times for the same people to participate.
 - All classes must occur in a space that permits increased ventilation and non-turbulent air circulation. High-powered fans are not permitted as they may increase dispersion of respiratory droplets.
 - Operators must ensure that classes are scheduled at intervals that allow the space to be cleaned, disinfected and ventilated between classes.
 - Individual fitness and exercise activities are permitted provided:
 - Separation between equipment/individuals is at least three metres.
 - They occur in a space that allows for increased ventilation and non-turbulent air circulation. High-powered fans are not permitted as they may result in greater dispersion of droplets.

- To ensure people maintain appropriate separation, use tape, markers, paint and signage. When possible, offer these services online or in an outdoor space. If group classes are offered, they should be scheduled to allow staff enough time to disinfect equipment and surfaces between classes.
- Encourage customers to bring their own personal equipment, such as yoga mats, etc.
- Minimize congestion in the facility by managing flow of clients, including the entrance. Consider developing online sign-up systems, with set durations for workouts.
- Operators must promote physical distancing and discourage congregating. Clients should be encouraged to conduct their workouts and exit the facility without unnecessary delays.
- Equipment should not be shared or used simultaneously (e.g. working in sets).
- Postpone or cancel events that encourage people to congregate.
- Licensed pools and whirlpools may operate per the [Recreation Guidelines](#). Saunas and steam rooms may operate with three metres of physical distancing, and enhanced cleaning and disinfection.
- Use of showers and locker rooms is permitted provided two metres of physical distancing is maintained; however, patrons should be encouraged to arrive in their workout clothes.
- Food and beverage services are permitted subject to the [Restaurants and Licensed Establishments Guidelines](#). Where facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be present in the activity area.
- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- Consider developing online fitness participation, where practical, until physical distancing recommendations are suspended.
- Handwashing stations and/or approved hand sanitizers should be available and clients should be encouraged to use them upon entering and exiting. They should also be available throughout the facility. Hand sanitizer must be approved by Health Canada (DIN or NPN).
- Essential shared facilities, such as telephones, computers, washrooms and laundry rooms, should receive increased cleaning and disinfection.

Cleaning and Disinfection

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spreading the disease.
- Workplaces should implement enhanced environmental cleaning.
- Commonly touched surfaces and shared equipment should be cleaned and disinfected after contact between individuals, even when not visibly soiled. This includes fitness equipment and machines, door handles, etc.
- Consider displaying a 'disinfected' sign on equipment so customers can be confident it's ready for use.
- Disinfectants for clients should be conveniently located. Patrons and employees should be required to wipe down the equipment before and after use. Discontinue the use of re-usable towels and cloths.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses.
- Workplaces should provide employees with resources such as tissues, no-touch trash receptacles, hand soap, hand sanitizers, disinfectants and disposable towels to promote a safe and hygienic work environment.
- Provide adequate bins for the safe disposal of paper towels that have been used for cleaning and personal use. The bins should be lined with plastic bags, which are tied and disposed of regularly according to local refuse storage and collection requirements.
- [Cleaning and sanitizing information for public facilities and workplaces](#) is available.

Personal Protective Equipment (PPE)

- Personal training is permitted, with three metres of physical distancing being observed whenever possible. Trainers and trainees must wear a non-medical mask (e.g. cloth or other materials) or surgical/procedure mask.
- It is recommended that older staff/seniors or those with a weakened immune system wear a procedure/surgical mask.
- [Additional information on the appropriate use of PPE](#) that can be used to mitigate transmission is available.
- All workers, especially those in contact with the public, should self-monitor for symptom, stay home if sick, and use the self-assessment tool available at saskatchewan.ca/COVID19.
- Infection Prevention and Control or Occupational Health and Safety staff in the workplace, where available, can assist in monitoring employee symptoms and provide advice in line with the provincial public health order.

- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.
 - Sick employees should use the Government of Saskatchewan's [online self-assessment tool](#) to help determine if the illness may be COVID-19. The tool provides people with next steps depending on their responses.
 - If an employee has gone home sick, their work areas should be cleaned and disinfected.

Employees

- Employees are required to practise physical distancing at work. Avoid handshakes and any other physical contact with others. Remain at least two metres apart from others whenever possible.
- Employees who have a fever or feel unwell should be instructed to stay home.
- Employees should wash their hands upon arrival at work and frequently throughout the day. They should wash their hands with soap and water for at least 20 seconds.
- Use hand sanitizer when hands are not visibly dirty and handwashing isn't available.
- Only use hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoid touching your face, mouth, nose and eyes.
- Cough or sneeze into a tissue, then immediately disposing of the tissue and wash your hands. If a tissue is not available, cough or sneeze into your elbow, not your hands.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Golf Course Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for golf courses.

- Expand cleaning and disinfection of common/high-touch surfaces in accordance with the public health order.
- Physical distancing must be observed at all times, with a minimum of two metres between individuals.
- Employees must have access to gloves and sanitizing wipes, and are required to stay home if they are unwell or symptomatic.
- Signage must be posted to caution players about the risks of COVID-19.
- Players exhibiting signs of illness will not be permitted to play.
- A maximum of four players per group is permitted.
- Tee times must be a minimum of eight minutes apart to avoid congestion on the course.
- Flags must remain in place and measures must be taken to prevent the ball from dropping in the hole, eliminating the need for players to contact the pin or cup. This may include such measures as levelling the cup, elevating the cup or installing a touch-free ball removal mechanism.
- All rakes and ball washers must be removed from the course.
- Washrooms may be open, but increased cleaning and disinfection must take place. Handwashing facilities (soap and water or hand sanitizer approved by Health Canada) must be provided.
- Driving ranges and practice putting/chipping greens can open if physical distancing (minimum of two metres) is maintained. Range balls must be cleaned and disinfected between customers. For the practice putting/chipping greens, flags must remain in place and measures must be taken to prevent the ball from dropping in the hole. This may include such measures as levelling the cup, elevating the cup or installing a touch-free ball removal mechanism.
- Walking is encouraged.
- Rental golf carts (motorized or pull carts) must be extensively cleaned and disinfected after each rental.
- Golf club rentals are permitted, but must be thoroughly cleaned and disinfected after each rental.
- Remove bulk scorecard, pencil and tee holders from starter areas.
- Pro shops and retail sales must follow the [Clothing and Retail Guidelines](#).
- Ensure washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm

running water is available. Manage access to washrooms in a way to promote physical distancing and increase cleaning and disinfection.

- Food and beverage services are subject to the [Restaurants and Licensed Establishments Guidelines](#).
- Beverage carts are permitted.
- Locker rooms are permitted with increased cleaning and disinfection. However, players can still be encouraged to change their footwear in the parking lot.
- League play and lessons may occur if all other criteria are met, including the requirement to maintain physical distancing.
- Tournaments are permitted. However, awards presentations and receptions must be done virtually. Shotgun play is permitted with only one group per tee box. (i.e. more than one group can't be at the tee box at one time).

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Sports and Activities Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). Operators of sports and recreation facilities (multiplexes, gymnasiums, courts, rinks, training facilities, indoor playgrounds, etc.) in Saskatchewan must be in compliance with these guidelines. The information below provides guidelines for sports and activities.

GROUP AND INDIVIDUAL ACTIVITIES

Operators must implement measures to prevent the transmission of COVID-19. Note: this guideline is not intended to be used for animal competitions. For competitive and show events involving animals, please refer to the [Racing and Rodeo Guidelines](#).

COVID-19 droplet transmission is much more likely when individuals are in close contact. The likelihood of transmission between individuals participating in sport, physical activity and recreation in an indoor setting is significantly higher. Transmission is less likely in an outdoor setting, where air flow is greater and there is more space for individuals to keep physically distanced.

COVID-19 can also be transmitted if someone touches a contaminated surface and then touches their face without washing their hands. Many activities involve shared equipment among participants, coaches/staff, instructors, officials or volunteers. The virus does not enter the body through skin; it enters through the eyes, nose or mouth when an individual touches their face. This is why regular hand hygiene and cleaning of high-touch surfaces are so important.

Each sports organization and/or facility must establish a plan for how to avoid physical contact and the risk of COVID-19 transmission between participants. The guidance should align with provincial and national sporting bodies for each activity and be at least as restrictive as provincial guidelines.

Guidelines for General Operation

- Effective June 20, 2021, the restrictions on group sizes will be lifted.
 - Competition including tournaments are permitted.
 - Interprovincial play is not permitted.
 - Masking is required (indoor sports). Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.

- 150 spectators per facility, not including participants, staff, coaches and officials.
- Outdoor sports and activities will be allowed beginning May 30, 2021, in Step One of the Saskatchewan Re-Opening Roadmap.
- Contactless fundraising activities are permitted.
- Staff and participants should be given information on physical distancing and other requirements prior to attending. Staff should discourage gathering.
- Signage must be posted to caution patrons about the risks of COVID-19.
- Encourage participants to arrive no more than five to 10 minutes before the scheduled activity to reduce people gathering in groups.
- Wherever possible, activities should be relocated to outdoor settings.
- When participating in any indoor sport or activity, contact must be avoided.
- Facility ventilation systems should be operational and appropriate for the activities being practised in them.
- Facilities may need to consider:
 - Increasing air circulation and ventilation, while preventing turbulent air flow.
 - Providing natural ventilation by opening windows and doors, wherever possible, to increase air flow.
- Remove unnecessary common items, such as magazines, brochures, etc.
- Encourage patrons to limit their time spent in the facility, as well as maintain physical distancing when returning to their vehicles or homes.
- Registration processes should be completed online whenever possible; however, if in-person registration is required, physical distancing and disinfecting pens between uses is required.
- Indoor play spaces are permitted; however, increased cleaning and disinfection are required. Operators must put measures in place to ensure physical distancing of non-household members and provide access to handwashing facilities or hand sanitizer approved by Health Canada (DIN or NPN number). Encourage operators to post signage.
- All food and beverage service and consumption must be separated (i.e. cordoned off) from the primary activity/games area. Food or drink is not permitted in the activity/game area.
- Team celebrations, banquets, gatherings and/or awards should be done virtually whenever possible. In-person events must follow the [Banquet and Conference Centre Guidelines](#), unless being held in a restaurant or licensed establishment where the [Restaurants and Licensed Establishments Guidelines](#) apply.
- Drinking fountains must be closed. Water bottle filling stations are acceptable if appropriately and frequently disinfected.
- Contactless payment is preferred; however, cash may be accepted where necessary.

- Instruction is permitted with no contact, appropriate physical distancing and mask use.
- Spectators should be limited as much as possible and priority given to parents and others needed to support the players, particularly for sports involving young children.
- Discourage gatherings of spectators in common areas.
- Spectators (excluding parents and guardians where necessary for player support) should be kept out of participant spaces (e.g. fields of play, courts, bench areas, change rooms). Refer to additional spectator requirements below.
- Where rental equipment is provided, it should be assigned to one person only and be laundered or cleaned and disinfected upon return.
- Masks in accordance with the [Public Health Order – Face Coverings](#) are required during all indoor sporting activities, with aquatic activities the only exception.
- For music, art, dance and drama, please refer to the [Performing Arts Guidelines](#).

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Indoor Sports Competition

- Effective June 20, 2021, the restrictions on group sizes will be lifted.
 - No limits on group sizes.
 - Competition including tournaments are permitted.
 - Interprovincial play is not permitted.
 - Masking is required (indoor sports). Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
 - 150 spectators per facility, not including participants, staff, coaches and officials.
- Face coverings (see: [public health order](#)) are not required for the following:
 - Players and on-court referees of the Canadian Elite Basketball League (CEBL), while participating in a basketball game or practice related to the CEBL for the duration of that activity only.
 - Athletes identified as potential competitors at the Olympic or Paralympic Games by Sport Canada (carded) or the National Sport Organization (i.e. NSO identified or long listed).

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Outdoor Individual Non-Contact Sports (e.g. tennis, pickle ball, disc golf)

Preparing to play

- Do not play if you or your playing partner(s) are feeling unwell or exhibiting any symptoms, such as fever, cough or difficulty breathing.
- Wash your hands with soap and water, and bring hand sanitizer approved by Health Canada (DIN or NPN) with you.
- Clean your equipment.
- Avoid commonly touched surfaces, however when you must, wash your hands and disinfect any surfaces you have been in contact with, including door handles, gates and benches.

Play

- Be sure to arrive just before your scheduled time to prevent queuing or gathering.
- No sharing of equipment (e.g. racquets, discs).
- Respect physical distancing of two metres with other players at all times – on and off the playing surface.

After Play

- Wash your hands with soap and water. If soap and water are not available, use hand sanitizer approved by Health Canada (DIN or NPN).
- Leave the playing area immediately after you complete play.

Organizers

- Stagger booking times to ensure a buffer between participants.
- When possible, online reservations and payments are recommended.
- Encourage physical distancing of two metres. When possible, keep a record of participants using the facility.

Indoor Leisure Activities (e.g. bowling, darts, billiards, golf)

- Masks must be worn in accordance with the [Public Health Order – Face Coverings](#).
- Recreational play is permitted.
- Activity areas must be arranged in a way that ensures three metres of physical distancing between non-household groups.
- Reservations are recommended and scheduled times should be put in place to avoid queuing in common areas.
- Signage regarding all COVID-19 procedures and policies that are in place must be posted around the facility to remind patrons and staff of precautions.

- In the case of bowling, staff should direct patrons to their designated lane and explain the system for receiving shoes, balls and the scoring system.
- Items such as bowling balls, shoes and bowling areas are to be cleaned and sanitized after each use and left in a drop zone as determined by management/staff.
- Facilities should install Plexiglas or provide other barriers at service counters to ensure staff and guests can remain physically distanced.
- Maintain two metres of physical distance between non-household members; however, during activities where space is inadequate, bookings must be limited to four persons or less.
- Hand sanitizer approved by Health Canada (DIN or NPN) or soap and water handwashing stations should be made available in visible locations throughout the facility, including at all entry points, pay stations and other high-touch locations for customers and staff.
- In addition to routine cleaning, and disinfecting of customer areas between groups, common area surfaces that have frequent contact with hands should be cleaned and disinfected several times per day and when visibly dirty. Items being used for an activity (e.g. scoring system buttons, ball returns, seating, pool cues, billiards tables, balls, golf balls, clubs, darts, and boards, etc.) must be cleaned and disinfected between each group of patrons.
- Special attention should be paid to commonly touched surfaces in such as doorknobs, light switches, toilet handles, counters, hand rails, touch screen surfaces, POS terminals, keypads, and workstations, etc. Please see the [Cleaning and Disinfection Guidelines](#) for more information.
- Guest contact information must be obtained for all guests on the property daily for contact tracing purposes, and kept for a 30-day period.
- During the activity, no food and beverage is permitted. Food and beverages must be consumed prior to or after the activity.
- Food or beverage may be served if there is an area designated for the consumption of food or beverage that is separate and apart from an event or any other activity, taking place in the facility, and the food or beverage is only consumed in the designated area. Please see the [Restaurants and Licensed Establishments Guidelines](#).

Outdoor Team Sport Competition

- Beginning May 30, 2021, in Step One of the Saskatchewan Re-Opening Roadmap, competition and game play for outdoor team sports may proceed if the following requirements are met:
 - Participants may not compete if they are feeling unwell.
 - Players and coaches should be encouraged to screen for COVID-19 symptoms prior to arriving to practice and play, using the self-assessment tool at saskatchewan.ca/COVID19.

- League play is allowed to resume; however, tournaments are not permitted at this time. This will be revisited in Step Two of the Re-Opening Roadmap.
- No interprovincial travel. Teams competing in regional interprovincial leagues need to contact the Business Response Team prior to beginning play.
- Capacity must be in compliance with the [public health order](#) for public outdoor gatherings for each playing surface or game area. Public outdoor gatherings are set to expand to a limit of 150 people on May 30 as part of the Re-Opening Roadmap. Common areas, such as those where there are multiple playing surfaces, must also be in compliance with gathering limits in the public health order.
- Individual and protective equipment should not be shared. When helmets and bats or other equipment are shared, cleaning and disinfecting must occur between each use.
- Commonly touched equipment used for game play (e.g. game ball, football) is routinely replaced or disinfected during the course of practice or play.
- Coaches, officials, umpires, referees and players who are not on the field are not required to wear masks outdoors under the public health order. However, masks may be worn if they are more comfortable with that layer of protection.
- No shaking hands, high-fives, etc.
- Spectators not from the same household should maintain two metres of physical distancing.
- Spectators must remain in designated areas. Masks are not required to be worn outdoors under the public health order, but they may be worn if spectators are more comfortable with that layer of protection.
- Hand sanitizer approved by Health Canada (DIN or NPN) or soap and water handwashing stations should be available for participants and spectators.
- No sharing of water bottles.
- Public washrooms, when available, are cleaned and disinfected regularly, and soap and water or hand sanitizer is available.
- Contact information of the coaches, officials and players should be recorded by the home team and maintained in order to assist with contact tracing for 30 days in the case of a confirmed case of COVID-19.

Winter Activities

- Ski Resorts
 - Guests must be advised to arrive dressed appropriately to ski or snowboard minimizing the use of indoor space. No personal belongings,

or food, may be stored within the chalet at any time.

- As per the public health order, public mask use is mandatory for all indoor spaces.
- There are currently no capacity requirements for ski hills, as long as two metres of physical distance can be maintained between non-household groups.
- Please see the [Cleaning and Disinfection Guidelines](#) for more information.
- Special attention must be taken to ensure physical distancing inside lodges and warm-up shacks, rental areas, lift line-ups, and concessions. Additional staff may be required to ensure mitigation measures are maintained.
- Guest contact information will be obtained for all guests on the property daily for contact tracing purposes and kept for a four-week period.
- Tickets and all products and services should be available for pre-purchase online.
- Touchless payment options are encouraged.
- All lift ticket redemptions, retail product redemptions etc. are provided at outside ticket windows, where possible.
- Equipment rentals are permitted. Rental equipment must be thoroughly cleaned and disinfected between patrons.
- Parking areas must be monitored to prevent congregation of patrons and vehicles must be spaced a minimum of two metres apart.
- All instructors and participants will be screened for COVID-19 symptoms prior to beginning the lesson.
- One-on-one or small group lessons consisting of household members are permitted as long as physical distancing is maintained between the instructor and participants.
- Group lessons that are not one-on-one are permitted as long as physical distancing is maintained between the instructor and participants, and between non-household participants. Groups must not have more than eight participants.
- Pre-registration is required for all lessons. Contact information must be gathered to provide, as needed, to public health for contact tracing purposes.
- Instructors can refer to resources from the Canadian Ski Instructors Alliance or Canadian Association of Snowboard Instructors to obtain additional information specific to COVID-19 mitigation measures and instruction.
- Food or beverage may be served if there is an area designated for the consumption of food or beverage that is separate and apart from an event or any other activity, taking place in the facility, and the food or beverage is only consumed in the designated area.
- Food and beverage areas must follow the [Restaurants and Licensed Establishments Guidelines](#) in the Re-Open Saskatchewan Plan.

- Outdoor dining area should be provided and encouraged. Consider installing a take-out window for guests to dine outside.
- Indoor warm-up areas must be reduced to 50 per cent capacity or two metres distance between household groups, whichever is less. Consider using alternate methods, such as using your vehicle to warm up. The capacity is limited by seating and spacing restrictions as outlined in the [Restaurant and Licensed Establishment Guidelines](#). These areas must undergo increased cleaning and disinfection.
- Patrons must be masked in warm-up areas.
- [COVID-19 Workplace Information](#) in the Re-Open Saskatchewan Plan must be followed.
- All staff should undergo a health-screening questionnaire prior to the start of their shift.
- Staff areas, including lunchrooms, must ensure appropriate guidelines are followed (e.g. physical distancing requirements, hand hygiene, cleaning and disinfection, etc.).
- Outdoor Recreation Areas
 - This includes motocross, cycling, hiking, outdoor rinks, tobogganing hills, cross-country ski trails, snowmobile trails and similar facilities.
 - Every person who visits an outdoor recreation area must follow public health orders in order to prevent the transmission of COVID-19.
 - People exhibiting signs of illness should not enter outdoor recreation areas. If you think you may be sick, use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
 - The maximum number of people permitted at any one time on outdoor rinks or skating surfaces will not exceed 30, as long as a physical distance of two metres is maintained between non-household groups.
 - Avoid gathering with other individuals or groups.
 - For larger organized outdoor skating surfaces (e.g. flooded fields at football stadiums and skating ovals/loops), a plan must be provided to the [Business Response Team](#). Capacity allowances will be determined based on the plan for these larger specialty ice surfaces.
 - People not from the same household must maintain two metres of physical distancing at all times. Limit gathering with other people when entering and leaving the outdoor recreation area and supervising children.
 - Group sizes must comply with the outdoor public gathering restrictions in the public health order.
 - Ensure frequent hand hygiene for everyone before, during and after outdoor play.

- It is recommended to carry and use hand sanitizers approved by Health Canada (DIN or NPN number) before and after using recreational areas and equipment.
- If rink surfaces or recreational areas are busy, come back when it's not as busy or use another area.
- Do not share toys or sports equipment between groups.
- Consider limiting children and other members of your household to only visiting outdoor recreational areas close to your home. This will help limit the number of people your family may come into contact with during the visit.
- Signage must be posted near recreational facility entrances and in shacks to caution about the risks of COVID-19, as well as educate users in following the guidelines. Signage should include the following reminders:
 - Individuals who are sick should stay home.
 - A physical distance of two metres must be maintained between people not from the same household.
 - Individuals should wash their hands before and after using parks and playgrounds.
 - Avoid overcrowding. Individual groups must not exceed the restrictions on public gatherings.
- Washroom facilities must have an increased cleaning and disinfecting schedule, ensuring soap and water or a hand sanitizer approved by Health Canada (DIN or NPN number) is available, as well as the proper disposal of paper hand towels.
- Garbage bins should be emptied frequently.

Participant Health and Illness

- Patrons/staff who are sick or symptomatic must not enter/participate. Participants, spectators and volunteers should use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
- Participants, coaches, instructors and spectators should continuously self-monitor.
- Organizers must keep a record of attendees. All players, spectators, staff and volunteers should be provided with a sign-in on arrival option, with name, phone number and/or email to facilitate contact tracing, if necessary. Records of attendance must be retained for a minimum of one month. Where possible, do not use a common pen. Providing this information is voluntary for attendees and can only be used for the purposes of COVID-19 contact tracing.
- If a person becomes sick, they should immediately stop participating and return home.

- If a person becomes sick or injured, and first aid or further care is required:
 - Try to limit the number of individuals in contact with the sick person.
 - Place a mask over the individual's mouth and nose if they are not able to do so. Maintain a safe distance until the mask is in place.
- First aid providers caring for people should follow standard precautions. Those who provide direct care requiring close or direct contact should wear a mask.
- Following care, first aid providers should discard the mask and gloves following standard procedures and perform hand hygiene.

Physical Distancing

- Physical distancing must be observed at all times, with a minimum of two metres of space between individuals and spectator groups from different households.
- Areas of congregation (e.g. benches, bleachers) must be set up and used in a way that adheres to physical distancing requirements (i.e. only allow every other row in bleachers, use visual cues, etc.).
- Pylons or other markers should define the group space.
- Schedules should be staggered and the duration of the activity should be specified to promote physical distancing and allow for adequate cleaning and disinfection between uses.
- Wherever possible, promote physical distancing by:
 - Promoting one-way traffic flow to avoid individuals from inadvertently interacting.
 - Placing stickers or signage on the wall/floor every two metres.
 - Limiting lane use on indoor tracks to every other lane to promote physical distancing.
 - Spacing seats or assigning seating at two-metre distances.
 - Reducing capacity in each room, venue, court or ice surface in the facility.
- Common area chairs and tables should be stacked, roped off or removed from the area to promote distancing.
- Consider physical barriers (e.g. Plexiglas) at patron contact points.

Cleaning, Disinfection and Hand Hygiene

- [Cleaning and disinfection information](#) for public facilities and workplaces is available.
- Increase the frequency of cleaning and disinfecting of commonly touched surfaces and shared equipment, such as vending machines, water fountain handles, doorknobs, handrails, light switches, countertops, tables, equipment handles and consoles.

- All frequently touched surfaces should be cleaned and disinfected prior to a new group being provided access to field space, including benches, dugouts, bleachers, railings, picnic areas, gates, etc.
- Increase the frequency of cleaning gymnasium floors to reduce the risk of transmission from shared objects (e.g. balls) and those who use wheelchairs.
- Encourage participants to bring their own equipment to the facility.
- Participant-owned equipment, including sport gloves, should be visibly clean.
- Shared equipment (e.g. tennis balls, basketballs, bats, etc.) must be cleaned and disinfected frequently.
- Participants should clean their hands before and after using shared equipment (e.g. climbing and gymnastics equipment).
- Ensure that handwashing sinks are fully stocked with soap and paper towels.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, common use equipment, washrooms/locker rooms, courtside and team areas, and other high-touch locations for patrons and staff. Patrons should be encouraged to bring their own hand sanitizer when possible.
- Hand hygiene should be performed prior to play and contacting shared equipment, as well as through the duration of the activity (i.e. intermissions, breaks, etc.) and at the end.

Conduct

- Spitting (includes seeds, tobacco and fluids) and other similar activities increase the risk of transmission of COVID-19 and are not permitted.
- Individuals must not share personal items (i.e. equipment or beverage containers).
- Congratulatory gestures such as high fives and handshakes are not permitted.
- Spectators, participants and players, staff, coaches and volunteers should try to minimize cheering and whistling as much as possible to control the spread of COVID-19.
- Consider how to adapt activities to take place outdoors and modify play to avoid physical contact, whenever possible.
- Intentional contact during sport or activity must be avoided. Modifications to activities that avoid physical contact are recommended.

Guidelines for Employees

- Limit the sharing of objects and tools by staff (e.g. equipment, gloves) or disinfect between uses.
- Hand hygiene must be performed between tasks.
- Encourage staff to launder uniforms/work clothes between shifts.

- Employees are required to practice physical distancing at work. Avoid handshakes and any other physical contact with others. Remain at least two metres apart from others whenever possible.
- If staff are unable to maintain two-metre distancing from co-workers, other measures must be in place to prevent the transmission of COVID-19. This may include, but is not limited to, self-monitoring of personal health and supervision by Infection Prevention and Control Officers or Occupational Health and Safety. Other appropriate measures include:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room whenever possible.
 - Altering break times to minimize the number of staff working in close quarters.
- Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer approved by Health Canada (DIN or NPN) when hands are not visibly dirty and handwashing isn't available.
 - Avoiding touching their face, mouth, nose and eyes.
 - Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing their hands. If a tissue is not available, they should cough or sneeze into their elbow, not their hands.
- Additional glove use for COVID-19 transmission mitigation is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions. Facilities should review their employee illness policies to ensure staff are able to remain home when ill (as is required).
- Stagger staff arrival and departure times, lunch times, breaks and meetings to reduce the number of individuals in one place at a given time. Designate lockers and storage spaces for individual workers.
- Ensure staff are adequately trained in new policies and protocols.
- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.

- Sick employees use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
- If an employee has gone home sick, their work areas should be cleaned and disinfected.

Arena Facility Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). Operators of arenas and recreation facilities (multiplexes, rinks, etc.) in Saskatchewan must be in compliance with these guidelines.

- Organizations that use arenas for their activities will work with member associations, facilities and local municipalities to ensure the necessary public health measures are taking place at facilities.
- The COVID representative for each organization/association/league will be the primary liaison with the local municipality for COVID-19 health and safety matters at each facility.
- Facility operators are responsible for implementing measures to prevent the transmission of COVID-19.
- Each facility must establish a plan to ensure two metres of physical distancing and minimize the risk of COVID-19 transmission between attendees – inside and outside the facility.

General Operation

- Designate one or more people to be responsible for ensuring compliance with these guidelines. This should not be someone engaged in other critical duties (e.g. referee, cashier).
- Staff and participants should be given information on physical distancing and other requirements prior to attending. Staff must proactively manage gatherings.
- Attendees are expected to limit their time spent in the facility, and leave promptly following their event. Attendees must maintain two metres of physical distancing when returning to their vehicles or homes.
- Physical distancing of two metres must be accommodated and maintained in all areas of the facility, including washrooms, concourses, lobbies, smoking areas, etc.
- Limit the duration of the event. Organizers should provide attendees a suitable timeframe for arrival and ensure crowds/line-ups are minimized. Attendees should leave immediately following the event/gathering to discourage gathering in common areas.
- Ticket sales should be completed online whenever possible; however, if in-person ticket sales are required, physical distancing and sanitizing of common touch items between customers is required.

- Contactless payment is preferred; however, cash may be accepted where necessary.
- Contactless fundraising activities are permitted.
 - Program sales, 50/50 tickets sales, etc. should be managed in a way that will ensure physical distancing. The cleaning and disinfecting of common-touch items must take place between customers.
- Facilities that house a team store must adhere to the following:
 - Limit the number of people allowed inside the store based on the ability to maintain proper physical distancing.
 - Stanchions, spacing markers, directional arrows, etc. must be placed inside and outside the team store to maintain physical distancing.
- Signage must be posted to caution patrons about the risks of COVID-19 and expectations to observe required public health measures.
- Facility ventilation systems should be operational and appropriate for the activities being practised in them.
- Facilities may need to consider:
 - Increasing air circulation and ventilation, while preventing turbulent air flow.
 - Providing natural ventilation by opening windows and doors, wherever possible, to increase air flow.
- Facilities should remove unnecessary common items, such as magazines, brochures, etc.
- Increased cleaning and disinfection is required. Operators must put measures in place to ensure physical distancing of non-household members and provide access to handwashing facilities or a hand sanitizer approved by Health Canada (DIN or NPN number).
- Drinking fountains must be closed. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- The facility shall establish a response plan should a patron or staff/volunteer become ill and display COVID-19 symptoms while at the venue.
- Responsible persons must collect attendee names and contact information, such as a phone number and/or email address. Where possible, this information should be collected prior to the event to prevent line-ups. Information will be requested by the Saskatchewan Health Authority only for the purposes of contact tracing if a COVID-19 exposure is linked to the event.
- Attendee records should be retained for at least four weeks after the event ends.
- Facility operators must establish facility/area plans, including visual markers such as cordons, floor markers, signage, etc. to encourage and support proper physical distancing. Areas of concerns include common areas, food and beverage service areas, seating, walkways and washrooms.
- Lineups at washrooms and food/beverage service areas, and gatherings outside the building during breaks at events pose a serious challenge. Facility

operators must manage these areas to prevent gatherings and ensure physical distancing is maintained to mitigate risks to attendees.

- Facility operators must:
 - Manage crowds in common areas before, after and during breaks in play;
 - Manage crowds as they exit an event area so physical distancing can be maintained. This may be done through visual markings and calling areas/sections to limit the numbers of persons exiting at a time;
 - Limit the duration of an event and/or limit participants; and
 - Barriers may be installed as an additional measure, but physical distancing must be maintained. (e.g. Plexiglas window at a booth/kiosk/cubicle higher than head-height).
- Where possible, event access areas should also be controlled (e.g. parking areas, erect barriers, set maximum occupancy, signage).
- Where possible, facilities should utilize multiple entry and exits points.
- Participation in provincially endorsed COVID Alert tracing app that protects user privacy is strongly recommended.
- Food and beverage services that have a designated and defined area are subject to the [Restaurants and Licensed Establishments Guidelines](#) in the Re-Open Saskatchewan Plan.
- Food and beverage services without a defined and designated seating area are limited to take away or delivery only. Patrons are expected to remain masked except while eating or drinking in the designated seating area.

Spectator Capacity

- Maximum capacity in Saskatchewan arenas and rinks is 150 spectators provided there is enough room to maintain physical distancing in all areas of the arena. In Step Two of the Saskatchewan Re-Opening Roadmap, effective June 20, 2021, public indoor gatherings increase to 150.
- Members of household groups must sit together, with a minimum of two metres between household groups – side to side and front to back.
 - All facilities must determine a way to establish fixed/static seating, even where there is no individual seating or seat numbers available. For example, seating/standing areas should be taped or cordoned off.
 - Spectator visiting, moving around and congregating is strongly discouraged.
 - Spectators should not be within two metres of players as they enter/exit the ice surface or dressing rooms.
 - Spectators (excluding parents and guardians where necessary for player support) must be kept out of player spaces (e.g. locker room, bench, etc.).

- The number of staff and volunteers should be adequate for the event; however, event organizers may not assign attendees as volunteers or other staff members in order to circumvent event capacity restrictions.
- Spectator numbers are subject to change according to the direction of the Chief Medical Health Officer.
- All players, coaches, team officials and spectators are strongly encouraged to use the Government of Canada's proximity tracking app.
- Food and beverage service and consumption must be separated (i.e. cordoned off) from the primary activity area. Food or drink is not permitted in the activity area. Increases to spectator capacity will depend on COVID-19 transmission levels within Saskatchewan and approval from the Chief Medical Health Officer.

Participant Health and Illness

- Spectators and staff who are sick or symptomatic must not enter the facility. Participants, spectators and volunteers should use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
- If a person becomes sick, they should immediately stop participating and return home.
- If a person becomes sick or injured and first aid or further care is required:
 - Try to limit the number of individuals in contact with the sick person.
 - Place a mask over the individual's mouth and nose if they are not able to do so. Maintain a safe distance until the mask is in place.
- First aid providers caring for people should follow standard precautions. Those who provide direct care requiring close or direct contact should wear a mask.
- Following care, first aid providers should discard the mask and gloves following standard procedures and perform hand hygiene.

Cleaning, Disinfection and Hand Hygiene

- [Cleaning and disinfection information](#) for public facilities and workplaces is available.
- Increase the frequency of cleaning and disinfecting of commonly touched surfaces and shared equipment, such as vending machines, water refill handles, doorknobs, handrails, light switches, countertops, tables, equipment handles and consoles.
- All frequently touched surfaces should be cleaned and disinfected prior to a new group being provided access to arena/rink area, including benches, bleachers, railings, gates, etc.
- Ensure that handwashing sinks are fully stocked with soap and paper towels.
- Place a hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, common use

equipment, washrooms/locker rooms, rink side and team areas, and other high-touch locations for patrons and staff. Patrons should be encouraged to bring their own hand sanitizer when possible.

- Hand hygiene should be performed prior to play and contacting shared equipment, as well as through the duration of the activity (i.e. intermissions, breaks, etc.) and at the end.

Conduct

- Spectators, participants staff, coaches and volunteers should try to minimize cheering, shouting, singing and whistling as much as possible to control the spread of COVID-19.
- Facility operators are expected to make announcements and/or post signs to remind spectators to observe minimum distancing of two metres and refrain from shouting, singing, and whistling.
- Individuals not in the same household must not share personal items (i.e. food, beverage containers, equipment, etc.).
- Congratulatory gestures such as high fives and handshakes are not permitted.
- Intentional contact during sport or activity is prohibited.

Guidelines for Employees

- Limit the sharing of objects and tools by staff (e.g. equipment, gloves) or disinfect between uses.
- Hand hygiene must be performed between tasks.
- Encourage staff to launder uniforms/work clothes between shifts.
- Employees are required to practice physical distancing at work. Avoid handshakes and any other physical contact with others. Remain two metres apart from others whenever possible.
- If staff are unable to maintain two metres distancing from co-workers, other measures should be implemented, such as self-monitoring of personal health, supervision by Infection Prevention and Control Officers or Occupational Health and Safety in the workplace. Other appropriate measures include:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room whenever possible.
 - Altering break times to minimize the number of staff working in close quarters.
 - Please refer to the [Public Health Order related to Face Coverings](#) for masking requirements.

- Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer approved by Health Canada (DIN or NPN) when hands are not visibly dirty and handwashing isn't available.
 - Avoiding touching their face, mouth, nose and eyes.
 - Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing their hands. If a tissue is not available, they should cough or sneeze into their elbow, not their hands.
- Glove use for COVID-19 transmission mitigation is not required nor recommended. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions. Facilities should review their employee illness policies to ensure staff are able to remain home when ill (as is required).
- Stagger staff arrival and departure times, breaks and meetings to reduce the number of individuals in one place at a given time. Designate lockers and storage spaces for individual workers.
- Ensure staff are adequately trained in new policies and protocols.
- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.
 - Sick employees use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
 - If an employee has gone home sick, their work areas should be cleaned and disinfected.

Recreation Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for recreation activities/organizations in Saskatchewan. Refer to the [Sports and Activities Guidelines](#) for indoor playgrounds and recreational facilities. For provincial, regional and private parks and campgrounds, please refer to the [Parks and Campgrounds Guidelines](#).

PARKS AND OUTDOOR PLAYGROUNDS

Every person who visits a park or outdoor playground must follow public health orders in order to prevent the transmission of COVID-19.

People exhibiting signs of illness should not enter parks or playgrounds. If you think you may be sick, use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.

People not from the same household must maintain two metres of physical distancing at all times. Limit gathering with other people when entering and leaving the park/playground and supervising children playing (e.g. paths, benches, picnic areas).

[See: public health order for outdoor gathering sizes.](#)

Ensure frequent hand hygiene for everyone before, during and after outdoor play.

If an area is busy, such as playground equipment or park space, come back when it's not as busy or use another play area.

Do not share toys or sports equipment between groups.

Practise proper hand hygiene:

- Wash your hands frequently with soap and warm water or, when unavailable, with hand sanitizer.
- Refrain from touching your face.
- Carry and use hand sanitizers approved by Health Canada (DIN or NPN number) before and after using playground and other recreational equipment.

Consider limiting children and other members of your household to only visiting playgrounds close to your home. This will help limit the number of people your family may come into contact with during the visit.

Mask use is not required, but non-medical masks (e.g. cloth or other materials) are an additional measure you can take to protect people around you when physical distancing cannot be maintained or is unpredictable. [Guidelines for cloth masks](#) are available.

Facilities

Enhanced cleaning and disinfecting of public areas and shared spaces must be conducted in accordance with the public health order and follow the [guidelines for environmental cleaning and disinfection](#).

Employees must have access to proper cleaning and disinfecting supplies and personal protective equipment. Staff are required to stay home if they are unwell or symptomatic.

Signage must be posted in re-opened parks and outdoor playgrounds to caution about the risks of COVID-19, as well as educate users in following the guidelines. Signage should include the following reminders:

- Individuals who are sick should stay home.
- A physical distance of two metres must be maintained between people not from the same household.
- Individuals should wash their hands before and after using parks and playgrounds.
- Avoid overcrowding. Individual groups must not exceed the restrictions on public gatherings.

Drinking water fountains may not operate. Washroom facilities must be open with an increased cleaning and disinfecting schedule, ensuring soap and water or hand sanitizer approved by Health Canada (DIN or NPN number) is available, as well as the proper disposal of paper hand towels.

Community Programming

Children and youth day camps are permitted subject to the [Child and Youth Camp Guidelines](#).

- Individuals should wash their hands before and after using parks and playgrounds.
- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres in all areas.
- Group sizes are limited to eight participants per group, not including facilitators or staff.
- Consider hosting online or virtual activities.
- Sensory play and sharing materials must be discontinued. If necessary, sensory play should be conducted as an individual activity.

- Place hand sanitizer approved by Health Canada (DIN or NPN) in dispensers or soap and water handwashing stations near doors, pay stations, washrooms and other high-touch locations for customers.
- Increase cleaning and disinfection of commonly contacted areas, including doorknobs, handles, counters, railings, stations, display fronts, PIN pads and/or self-pay stations, and light switches. Common touch areas include those accessed by customers and employees.
- Where provided, washrooms must be cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and warm running water is available.
- Garbage bins must be emptied frequently.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

AQUATIC FACILITIES

Outdoor and indoor public aquatic facilities, outdoor swimming pools, fill and drain paddling pools, and spray/splash parks must follow all requirements in the current public health order, as well as the following guidelines.

These guidelines apply to all outdoor and indoor public swimming pools, including those operated by hotels and motels. All public swimming pools must be operated in a safe manner and are subject to *The Swimming Pool Regulations, 1999* and The Saskatchewan Swimming Pool Design/Operational Standards.

Guidelines for General Operation

- Staff and members of the public who are sick or symptomatic must stay home. Review employee illness policies to support staff that need to stay home when ill.
- Proper and frequent hand hygiene by public and staff is a vital component in preventing the transmission of illnesses. Public and staff must wash hands often with soap and water for at least 20 seconds or use hand sanitizer approved by Health Canada (DIN or NPN number). Avoid touching your face, mouth, nose and eyes.
- Facilities must post signage to inform the public about COVID-19 precautions and restrictions.
- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres in all areas, including the swimming pool(s).
- Physical barriers and directional flow markings should be located throughout the facility, including change rooms and pool deck areas.

- Enhanced cleaning and disinfection is required in public and staff areas, including, but not limited to, change rooms, door handles/knobs, flotation aids, handrails, light switches, payment devices, play structures, shared workstations, shower areas, slides, tables and toys. Refer to the [Environmental Cleaning and Disinfection Guidelines](#) for further information.
- Towels and other linens provided by the facility must be laundered and dried on the highest possible temperature setting.
- Drinking fountains must be closed. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- Patrons can only remove their face masks prior to entering the pool.
- Children should be accompanied by an adult to ensure compliance with physical distancing.
- All swimmers must take a cleansing shower prior to entering the swimming pool.

Information for Facility Operators

- Aquatic facilities must contact their local Saskatchewan Health Authority Public Health Inspection Office prior to opening to the public.
- Effective June 20, 2021, indoor aquatic facilities increase capacity from 100 to 150 people.
- Outdoor pools are limited to a maximum of 150 within the facility (e.g. pool, pool deck, grass areas, stands, washrooms, shower facilities, etc.), and does not include pool staff.
- Whirlpools/hot tubs may need to be closed if physical distancing is not possible. Saunas and steam rooms may operate with adequate physical distancing precautions and enhanced cleaning and disinfection.
- Facilities are encouraged to use booking systems to manage public admission. During transactions, if possible, limit the exchange of papers such as receipts. Where possible, payments should be accepted through contactless methods (e.g. tap or e-transfer).
- For general workplace guidelines, please refer to the [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines.
- Mechanical ventilation systems must be operating properly in all indoor facilities.

Lifeguarding and Supervision

- Facility operators shall review first aid and lifesaving procedures in their current safety plans, which must be made available to public health inspectors upon request.
- Staff training is required for any new COVID-19-specific first aid and lifesaving

procedures.

- Facility operators can contact the Life Saving Society and/or Red Cross to obtain additional resources for lifeguards specific to COVID-19.
- Lifeguards need to focus on the health and safety of swimmers in a facility. Therefore, they should not be required to enforce public health measures such as physical distancing and occupancy. Facilities will need to ensure there are sufficient staff to monitor compliance with these guidelines.

Diving Boards, Slides, Play Structures, Toys and Flotation Aids

- Diving boards, slides and play structures such as climbing walls are permitted, but they are subject to enhanced cleaning and disinfection, as well as physical distancing requirements. Active supervision may be required to ensure compliance.
- Flotation aids, such as flutter boards, life jackets, noodles and other items, are permitted subject to enhanced cleaning and disinfection. Usage is at the discretion of the facility. These items must not be shared between non-household contacts.
- Toys and other objects are subject to the same requirements as flotation aids. Facilities may choose not to allow toys at this time.

Change Rooms

- Wherever possible, members of the public should enter and exit the facility in their swim clothes to minimize crowding in change room areas.
- Reduce the number of lockers available to coincide with the capacity of the facility to reduce cleaning and disinfection demands.
- Ensure an adequate supply of soap is provided for washroom and shower facilities.

Seating Areas

- Seating areas are permitted on the pool deck, but are subject to the physical distancing requirements of two metres, facility capacity limits and enhanced cleaning and disinfection. Facilities may choose to close off seating areas or reduce the amount of seating available.

Classes, Swimming Lessons and Training

- Group activities, such as swimming lessons, fitness classes, competitive swim team training, competition and game play requirements in the [Sports and Activities Guidelines](#) must be followed, where applicable.
- Swimmers should arrive as close to the start time as possible and exit the facility immediately after practice/lessons are over to reduce the number of people gathering in a facility.

- Coaches and training staff must maintain physical distancing.
- Team workouts and other fitness activities on the pool deck or in another area of the facility are subject to the [Gyms and Fitness Facility Guidelines](#).
- Team members must avoid physical contact where possible, such as high-fives, etc.
- Lane swimming activities must be altered to ensure physical distancing of three metres is maintained between swimmers. For instance, one-way swimming is encouraged where swimmers use the adjacent lane to return.
- Lifeguard courses and training are permitted subject to the gathering restrictions. Physical distancing is recommended where possible; however, for those training procedures that require close physical contact, consult with the Lifesaving Society and/or Red Cross for more information on how to do it safely.

Splash Pads, Fill and Drain Paddling Pools

- Water features must be flushed thoroughly prior to re-opening to remove stagnant water.
- Anyone using splash pad facilities must practise proper hand hygiene.
- Children should be supervised at all times by a parent or guardian, and reminded not to touch or contact others.
- Reduce physical contact with spray features wherever possible. For instance, consider using spray features that do not require physical interaction to activate (i.e. pressing buttons, switches).
- Signage must be posted at splash pads to caution about the risks of COVID-19, as well as educate users in following the guidelines. Signage should include the following reminders:
 - Individuals who are sick should stay home.
 - A physical distance of three metres should be maintained between people not from the same household.
 - Individuals should wash their hands before and after using the facility.
 - Avoid overcrowding. Individual groups must not exceed the restrictions on public gatherings.
- Fill and drain paddling pools should be closed at this time unless supervision is provided.

Food Services

- Food services are permitted subject to the [Restaurants and Licensed Establishments Guidelines](#). Where any of these facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be in the activity area.

Child and Youth Camp Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of child and youth camps in Saskatchewan.

Day camps are permitted to open, and must follow all requirements in the public health order and operate in compliance with all other applicable legislation and licensing requirements. Activities at the camps must align with the allowable services permitted within the Re-Open Saskatchewan plan. Overnight camps are permitted in Step Two of the Saskatchewan Re-Opening Roadmap on June 20, 2021.

All sport, music, art, dance, drama and educational program day camp services shall follow capacity and distancing restrictions as per their respective sections in the [Sport and Activity Guidelines and Performing Arts Guidelines](#).

Groups of children and staff members assigned to them must stay together throughout the day and cannot mix with other groups. Staff should remain with the same group. Groups must be within in the same room/space at the same time, including pickups and drop-offs, meal times, playtime, outdoor activities, etc.

If a day camp is located within another facility (i.e. special care or personal care home), they are subject to all general restrictions for that facility and must ensure there is no interaction between children and staff/individuals in the other facility.

Day Camps

Guidelines for General Operation

- Staff and parents must encourage and practise physical distancing.
- Staff and participants must wear masks in line with the requirements in the public health order.
- Staff should minimize the frequency of direct physical contact with children and encourage children to minimize physical contact with each other.
- For younger children, maintaining physical distance is less practical and the focus should be on minimizing physical contact instead.
- Help younger children learn about physical distancing and less physical contact by creating games that include basic principles such as two arms lengths apart.
- Children from the same household (e.g. siblings) do not need to maintain physical distance from each other.

- Avoid close greetings like hugs or handshakes, and encourage physically distant greetings such as 'air fives' and waves.
- Day camps must consider the type of activity and the level of risk it presents.
- Consider how to adapt activities to take place outdoors when possible.
- Individual or group activities that have close, prolonged contact are higher risk. Measures should be taken to modify activities to minimize contact and allow for physical distancing whenever possible.
- Competition and game play during sport camps are not permitted at this time.
- Plan for reduced contact activities such as shadow tag and, where possible, avoid activities that require clustering around a particular item or small area.
- Singing is a high-risk activity because the virus can be transmitted through saliva or respiratory droplets. Therefore, singing is not recommended at this time.
- The use of playgrounds and outdoor recreation space use should be limited to one group at a time. Ensure hand hygiene occurs for staff and children before, during and after outdoor play.
- Consider the need to modify room configurations (e.g. separating tables) to promote physical distancing. Incorporate more individual activities or activities that encourage more space between children and staff.
- Where possible, remove or reduce play with toys that encourage group play in close proximity or increase the likelihood of physical contact. Keep toys that encourage individual play.
- Camp organizers should provide parents with a list of items that children need to bring with them. Parents and caregivers should avoid bringing any unnecessary items.
- Children and staff should not share food, drinks, facecloths and other personal items. Label personal items with the child's name to discourage accidental sharing.
- Where possible, operators and staff should communicate with parents electronically (e.g. phone, text, email).
- Modify procedures for drop-off and pickup that support physical distancing and separate groups to the greatest extent possible. Possible strategies include separate group entrances, limit pickups and drop-offs to one parent/guardian, staggering entry or limiting the number of people in entry areas. Ensure parents are informed of all procedures.
- Where possible, the pickup and drop-off of children may occur outside the facility, unless there is a need for the parent or caregiver to enter (e.g. very young children). If a parent must enter the facility, they should maintain physical distance from staff and other children and be reminded to practise diligent hand hygiene.

- Parents and caregivers should use their own pens and avoid touching the sign-in/out sheet directly. They should practise hand hygiene before and after touching the sign-in/out sheet. Consider switching to a contactless or electronic sign-in/out method.
- Parents picking up children from more than one group should not be allowed to intermingle with children in the groups.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors for use by staff and parents. Make disinfectant wipes and trash bins available.
- Children should be encouraged to wash hands with soap and water. Hand sanitizer is not generally recommended for use by young children. If soap and water are unavailable and hand sanitizer is used, keep it out of children's reach and supervise its use.
- Parents and caregivers must assess their child daily for symptoms of the common cold, influenza, COVID-19 or other infectious respiratory diseases before sending them to day camps.
- Children who are ill are not permitted to attend. Staff can remind parents and guardians of this at drop-off to confirm that the child does not have symptoms of COVID-19. All parents, guardians, children and staff who are under mandatory self-isolation must not attend—stay home and self-isolate.
- Signage may be used to remind parents and guardians not to enter the facility if they are sick and should be posted at facility entrances.
- Checking temperatures, detailed screening or requiring COVID-19 testing are not required or recommended.
- If a child develops symptoms consistent with COVID-19 while at the program, the child should be isolated from other children and the parent or guardian should pick up the child immediately. If a separate room is not available, the child needs to be kept at least two metres away from other children.
- If the sick child requires close contact and care, staff can continue to care for the child until the parent arrives. Staff must wear eye protection during all interactions with the child and should try to avoid contact with the child's respiratory secretions. Please refer to the [Public Health Order - Face Coverings](#) for masking requirements. Once the child has left, staff must wash their hands and ensure all areas that the sick child occupied are cleaned and disinfected.
- All items used by the child while isolated should be cleaned and disinfected as soon as the child has been picked up. Items that cannot be cleaned and disinfected (e.g. paper, books, cardboard puzzles) should be removed from the program and stored in a sealed container for a minimum of three days.
- Vehicles used by the day camp for transporting children should be cleaned and disinfected as per transportation guidance. Transportation should be limited to the transport of children to and from care. Recreational travel, such as field trips, is not permitted at this time.

Guidelines for Employees

- If staff are unable to maintain two-metre distancing from other staff, other measures should be used, such as self-monitoring of personal health, supervision by Infection Prevention and Control Officers or Occupational Health and Safety staff in the workplace, or implementing appropriate measures such as:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room, wherever possible.
 - Altering shift and break times to minimize the number of staff working in close quarters.
 - Wearing personal protective equipment.
- Proper and frequent hand hygiene by staff and children is a vital component in preventing the transmission of illnesses. Ensure staff and children are practising proper hand hygiene and coughing/sneezing etiquette. Parents and staff can teach and reinforce these practices.
 - Hand hygiene stations should be set up at the entrance, so that children can clean their hands when they enter. If a sink with soap and water is not available, provide hand sanitizer approved by Health Canada (DIN or NPN number). Keep hand sanitizer out of the reach of children and supervise its use.
 - Incorporate additional hand hygiene opportunities into the daily schedule.
 - Ensure the facility is well stocked with handwashing supplies at all times, including soap, paper towels, waste bins and, where appropriate, Health Canada approved hand sanitizer.
 - Children regularly forget about proper handwashing. Staff and children should practise often, with staff modelling washing hands properly in a fun and relaxed way.
- It is recommended that facilities review their employee illness policies to ensure staff are able to remain home when ill (as is required).

Overnight Camps

- Overnight camps will be allowed beginning in Step Two of the Saskatchewan Re-Opening Roadmap, effective June 20, 2021.

Before Camp

- Staff, volunteers and campers should not attend camp if they are sick, experiencing COVID-19 symptoms or considered a close contact of someone with COVID-19.
- Staff, volunteers and campers should be screened prior to arriving at camp by completing the online [self-assessment tool](#).

- Campers must ensure they have an adequate supply of masks, disinfecting wipes and hand sanitizer approved by Health Canada (DIN or NPN number).
- Testing for COVID-19 is recommended for participants at the start of camp. (Camp directors and organizers can contact the SHA's Antigen Testing Intake Team at antigentestingintake@saskhealthauthority.ca for more information about rapid antigen testing to support overnight summer camps.)
- Develop a plan in the event of an outbreak. This plan should be communicated with staff, families and campers upon registration and start of camp. Procedures must be in place to help sick campers return home safely.

During Camp

- Create two metres of physical distance between campers while being transported (e.g. seat children one child per row, every second row) when possible. Campers who live in the same household may be seated together. Masks are required in vehicles being used for camp transportation.
- Consideration should be given to creating cohorts of eight or less campers who are similar in age.
- Consider campers and staff who are staying together in a cabin, bunkhouse or shared space part of the same household cohort. Members of the same household cohort do not need to wear masks or physically distance when they are together without non-household cohort members nearby.
- Limit the sharing of items between cohorts (e.g. balls, frisbees, art supplies, etc.) or clean and disinfect items between use.
- The use of playgrounds and outdoor recreation space should be limited to one cohort at a time. Ensure hand hygiene occurs before, during and after outdoor play – for staff and children.
- Commonly touched areas should be cleaned and disinfected twice daily or whenever visibly soiled. This includes light switches, door handles, toilets and handrails.
- Place soap and water handwashing stations or dispensers of hand sanitizer approved by Health Canada (DIN or NPN number) around camp for use by staff and campers. Make disinfectant wipes available for wiping down soiled surfaces.
- As much as possible, campers and staff should eat meals and snacks outdoors or in well-ventilated spaces within their own cohort, while maintaining physical distance from other cohorts. When indoors, maintain two metres separation between cohorts.
- Masks must be available for campers and worn in all indoor public spaces (e.g. gyms, washrooms, art rooms, etc.).
- An isolation room or separate area must be available for anyone who exhibits COVID-like symptoms. The individual must be taken into isolation immediately, with staff safely providing care using proper PPE until

parents/guardians arrive. The room must be cleaned and disinfected after use.

- Staff should be provided with and trained on the proper use of PPE (i.e. donning and doffing, etc.).
- If the camp has a nurse, staff member or other healthcare provider, they must be provided and wear appropriate PPE.

After Camp

- After travelling home from camp, staff and campers should [self-monitor](#) for any symptoms of COVID-19 and call 811 if symptoms develop.

Cleaning and Sanitization Guidelines

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spread of the disease.
- Maintain a cleaning schedule and ensure staff are adequately assigned and trained for additional cleaning, sanitizing and disinfection required for COVID-19 transmission mitigation.
- Increase cleaning and disinfection of commonly contacted areas. Common touch areas include those accessed by children, parents and/or employees. Examples of common touch surfaces include table tops, light switches, telephones (including personal cell phones), door knobs, sink taps, toilet handles, kitchen counter tops, gates, hand rails, hand sanitizer bottles/dispensers, toys, sleep cots/mats and cribs.
- Due to the increased amount of cleaning required during an outbreak situation, it is best practice to decrease the number of common use items available to children.
- Indoor shared spaces and structures that cannot be cleaned and disinfected between groups should not be used. If play structures are to be used by more than one group, the structures can only be used by one group at a time and must be cleaned and disinfected before and after use by each group.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses and is approved by Health Canada (DIN).
- If meals or snacks are provided, any food contact surfaces must be sanitized as per the Provincial Public Eating Establishment Standards.
- Ensure washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently.
- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Wash hands before wearing and after removing gloves.

- Programs that utilize a space with other user groups (e.g. programs in libraries, museums, community centres) must ensure the space is cleaned and disinfected before and after using the space.

Program Operator Guidelines

- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- No self-serve or family-style meal service. There should be no common food items (e.g. salt and pepper shakers). Meals should be served in individual portions to each child by a designated staff member.
- Utensils should be used to serve food items (not fingers).
- If meals or snacks are provided, ensure all children have their own individual meals or snacks. Reusable utensils must be cleaned and sanitized after each use.
- Food provided by the family should be stored with the child's belongings or, if refrigeration is required, should be kept in an area designated for the child's group and should not be handled by staff from other groups. Food from home must not be shared with other children.
- Children are not allowed to participate in food preparation.
- Where possible, children should practise physical distancing while eating. Consider staggering snack or meal times to allow spacing between children during meals.
- Consider using books and individual games as a part of learning, so children can sit independently and distanced from each other.
- Each group should have designated equipment (e.g. balls, loose equipment) or clean and disinfect equipment between group uses.
- Establish a plan to prevent mingling of groups in washrooms, and to minimize the number of shared surfaces in washrooms.

Personal Protective Equipment

- If in contact with a sick child, wear PPE as per regular precautions for hazards normally encountered in the workplace. They should only be used when all other controls have been fully explored.
- Wear disposable gloves when cleaning blood or body fluids (e.g. runny nose, vomit, stool, urine). Gloves must be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- Other than the above situations, glove use is not required nor recommended.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Beach Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All operators in Saskatchewan must be in compliance with these guidelines. The information below provides guidelines for beaches in Saskatchewan.

- People exhibiting signs of illness should not enter beach areas. If you think you may be sick, use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
- Individuals from different groups must maintain a physical distance of two metres outdoors, indoors, on the beach and in the water. Towels and beach gear should be set up with four metres between groups to allow physical distancing to be maintained for those entering or exiting the area.
- There must be no more individuals per group than allowed under the private and public gathering restrictions.
- Towels, beach toys, food and other items should not be shared between members of different groups.
- If the beach area is full, please use adjacent grass areas, where available, to ensure group and individual physical distancing is maintained.
- Bring your own picnic table covers, cleaning supplies, hand hygiene supplies and other personal items.
- Common contact areas and surfaces must be cleaned and disinfected by park or beach staff regularly. For unstaffed beaches, it's recommended that users clean and disinfect surfaces before and after using (e.g. picnic tables), and practise frequent hand hygiene, especially before and after consuming food.
- Frequently wash your hands with soap and water or use hand sanitizer approved by Health Canada (DIN or NPN number) if you come into contact with public or common touch surfaces (e.g. washroom facilities, shower taps, benches, tables, playground equipment).
- Where possible, access to beaches should be controlled and occupancy limited (e.g. limit parking, erect barriers, set maximum occupancy, signage).
- Display posters in common spaces reminding beach users of physical distancing and beach rules (e.g. parking lot, beaches, picnic areas, trailheads).
- Advise users that if an area is busy, such as an outdoor shower facility, picnic shelter or beach, come back when it's not busy or use another area.

- Shower facilities and change rooms are permitted.
- Washroom facilities must be open with increased cleaning and disinfecting. Operators must ensure washrooms are stocked with soap and water or hand sanitizer approved by Health Canada (DIN or NPN number).
- Food and beverage services are permitted subject to the [Restaurants and Licensed Establishments Guidelines](#).
- Events are not permitted on beaches at this time.
- Recreation rentals (e.g. kayaks, paddle boats, life jackets) are permitted. Rental equipment must be cleaned and disinfected after each use and should only be shared among members of the same household.
- Publicly accessible in-water play equipment (e.g. slides, floating docks, inflatable play structures) are permitted. Water playground operators (e.g. inflatable water playground businesses) must put measures in place to limit the number of patrons to support physical distancing.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Parks and Campground Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The information below provides specific guidelines for operators of parks and campgrounds.

The online reservation system for campsites in Saskatchewan provincial parks will open on April 12, 2021.

Campgrounds

- Overnight and limited-term campsites may be occupied at 100 per cent capacity, subject to change based on public health orders.
 - Contactless transactions must be used when possible (delivery of fire wood, etc.).
 - Group camping and camping in overflow areas are permitted, subject to change based on public health orders.
- Laundry facilities are permitted in campgrounds using the following guidelines:
 - Enhanced cleaning and disinfection of public laundry facilities is required with a focus on common-touch surfaces.
 - Provide hand sanitizer approved by Health Canada (DIN or NPN number).
 - Remove all unnecessary, common-touch items from laundry facilities.
- Signage must be posted in public laundry facilities informing users of the following:
 - Maintain a two-metre physical distance from others while using these facilities. See: [Public Health Order – Face Coverings](#).
 - Clean and disinfect laundry hampers or other items that are brought into the laundry area.
 - Avoid shaking dirty laundry as this can increase the chance of spreading the COVID-19 virus.
 - Use dryers on the highest temperature setting possible. Follow manufacturers' recommendations to ensure fabric items are not damaged.
- Campground operators will be required to undertake the following actions:
 - Enhanced cleaning and disinfection practices are undertaken at central dump stations and water fill stations.
 - Drinking water fountains should be closed.

- Enhanced cleaning and disinfecting efforts are undertaken in campground sites and in all public/shared spaces and equipment (e.g. picnic tables, garbage cans, hydrants and other high-touch surfaces).
- The maintenance of public areas/shared spaces must be conducted in accordance with the public health order and follow the [guidelines for environmental cleaning and disinfection](#).
- Some shared facilities must remain closed (e.g. cookhouses). Shared laundry facilities may open.
- Beach and picnic area access is permitted according to the [guidelines for beaches](#) and increased cleaning and disinfection practices of common touch areas.
- Park, playground and aquatic access is permitted according to the [Recreation Guidelines](#).
- Food and beverage services are permitted subject to the [Restaurants and Licensed Establishments Guidelines](#).
- Grocery stores must enact enhanced cleaning and disinfecting practices, as well as physical distancing guidelines.
- Community events must comply with the current public health order.
- Employees must have access to proper cleaning and disinfecting supplies, as well as personal protective equipment. Staff are required to stay home if they are unwell or symptomatic.
- Signage must be posted to caution campers about the risks of COVID-19.
- Campers exhibiting signs of illness will not be permitted.
- The rental of temporary tents is not permitted. The rental of semi-permanent and permanent tents, as well as yurts, is permitted.
- Children and youth day camps are permitted subject to the [Child and Youth Camp Guidelines](#).

Fishing Access

- Provincial parks will allow access to boat launches and shorelines.
- A licence may be required to fish in Saskatchewan.
- Complete information on fishing in Saskatchewan is available at saskatchewan.ca/fishing.
- Passengers in boats do not have to be from the same household, but must maintain as much separation as possible.
- Shoreline anglers must adhere to a strict two-metre distance between individuals.
- Fishing off public docks, dams, jetties or marinas is prohibited.
- Parks will provide limited access to bathroom facilities for day-use only, with enhanced sanitization protocols and increased frequency of maintenance.
- Access to shower facilities is permitted.

Ice Fishing, Filleting Shacks and Tables

- When more than one individual is in an ice fishing shack, two metres of physical distance must be maintained between non-household groups. Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- Outdoor tables for filleting fish must be set up to maintain a minimum of two metres between tables.
- Users must be instructed to clean up after themselves, and facilities must include fish filleting stations in their cleaning and disinfection practices.
- Filleting shacks should only be occupied by a single group at a time, and physical distancing should be practised where possible. Temporary filleting stations can be established to promote distancing between groups.
- Common-use filleting equipment, such as knives, scrub brushes, etc., should be thoroughly cleaned and disinfected after every use.

For additional information, please call the Business Response Team at 1-844-800-8688 or email supportforbusiness@gov.sk.ca.

Outfitting Guidelines

For general workplace guidelines, please refer [COVID-19 Workplace Information](#). All businesses operating in Saskatchewan must be in compliance with these guidelines. The guidelines below provide specific information for outfitters.

Public Health Orders

- Outfitting operations must comply with all public health orders.
- Outfitters shall not accept international travellers who have not completed the federal government's travel restrictions regarding self-isolation, which cannot be completed in an outfitting camp/accommodation.

Basic Public Health Measures

- People planning to visit or work at an outfitting camp who are sick or symptomatic must stay home. Anyone who becomes ill while at an outfitting camp should self-isolate and call HealthLine 811 for further direction. Operators should plan for managing staff or guests who become ill.
- Staff from local areas who work in outfitting camps should consider remaining on site for the duration of the season.
- Frequent and effective handwashing must be practised by all outfitting camp occupants. Soap and water must be provided or hand sanitizer approved by Health Canada (DIN or NPN number).
- Physical distancing must be observed between staff and guests at all times, or whenever practical.
- Enhanced cleaning and disinfection is required in all common areas, as well as any shared items or equipment.

Lodges, Cabins and Outcamps

- Cabins and rooms are not restricted to members of the same household; however, individuals should maintain as much separation as possible.
- When physical distancing cannot be maintained, measures such as reducing capacity in cabins and rooms should be implemented.
- Enhanced cleaning and disinfection is required between occupants, including outcamps, bathroom facilities, laundry facilities and any shared spaces.
- Consideration should be given to designating an accommodation for self-isolation when a guest or staff member cannot immediately seek medical

attention (e.g. fly-in camps). A plan should be in place to transport guests to medical facilities when necessary.

- Picnic area access is permitted according to the recommended public health measures, including increased cleaning and disinfection of common touch areas. Non-essential shared facilities, such as game rooms and common rooms, must be closed.
- Common eating areas that are open to the public in operations accessible by road are subject to the same restrictions as restaurants and other public eating establishments.
- Where meals are provided to outfitting clients and employees only (i.e. no public service), meal service in common eating areas should occur in rotations to minimize the number of people in the room. Physical distancing must be practised at all times. Wherever possible, guests and staff should eat in their accommodations. Food services staff must serve all food and common touch items should be removed.
- Outfitting camps that are not staffed at all times need to ensure basic public health measures, such as cleaning and disinfecting. This may require temporary staffing.

Staff Accommodation

- Please refer to the [Workplace Food and Accommodations Guidelines](#).

Campgrounds

- Please refer to the [Parks and Campground Guidelines](#).

Guides

- Guides must be assigned to the same client group for the entire duration of their stay, as well as all activities.
- Guides must maintain appropriate physical distancing while interacting with clients. Different guided groups should be kept separate.
- When fishing from shore, anglers must remain two metres apart. Fishing from public docks, marinas, etc. is not permitted at this time.
- Individual instruction is permitted with no contact and appropriate physical distancing. No group instruction is allowed.
- Shore lunches must be cancelled unless prepackaged, prepared items are provided (i.e. bag lunches).

Filleting Shacks or Tables

- Outdoor tables for filleting fish must be set up to maintain a minimum of two metres between tables. They must be thoroughly cleaned between uses by different groups.

- Filleting shacks should only be occupied by a single group at a time, and physical distancing should be practised where possible. Temporary filleting stations can be established to promote distancing between groups.
- Common-use filleting equipment, such as knives, scrub brushes, etc., should be thoroughly cleaned and disinfected after every use.

Equipment and Rentals

- Equipment rentals (e.g. boats, all-terrain vehicles, helmets, blinds, fishing rods and tackle) are permitted, but must be thoroughly cleaned and disinfected after each rental.
- The rental of tents is not permitted. Clients must bring their own tents.

Transportation

Vehicles

- Please refer to the [Transportation Guidelines](#).

Boats

- Passengers must maintain as much separation as possible.
- Whenever possible, guides should stay with the same group and maintain physical distancing while operating or helping clients operate watercraft required for guiding services. This applies to fishing guides, as well as moose and bird hunting by boat.

All-Terrain Vehicles

- Each client and guide must ride on separate all-terrain vehicles, with the exception of those residing in the same household.

Aircraft

- Small aircraft can be used to access remote sites.
- Aircraft operators will need to ensure adequate safety protections are provided for all passengers.
- Two-metre distancing between individuals shall be maintained where possible. When unable to maintain two-metre distancing, safety protocols would include administrative and engineered controls, frequent handwashing and frequent cleaning and disinfection of common surfaces. Where administrative and engineered controls are not possible, a mask would provide an additional measure of protection for aircraft occupants.
- More information [on pandemic supplies, including administrative and engineered controls for businesses](#), is available.

Libraries, Museums, Art Galleries and Animal Exhibits Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). The information below provides specific guidance for libraries, museums, art galleries, animal exhibits, interpretive centres and similar facilities. Operators of these facilities must also continue to operate in compliance with all other applicable provincial regulations and standards.

Libraries, museums, art galleries, animal exhibits (e.g. petting zoos, agriculture exhibitions, horseback riding tours and other recreational activities that bring humans and animals together) and similar facilities are allowed to re-open.

General Operations

- Effective June 20, 2021, in Step Two of Saskatchewan's Re-Opening Roadmap, capacity limits will increase to 150 from 30 people. Occupancy must be maintained that allows staff and customers to maintain two metres of physical distance.
- Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#).
- Areas should be monitored to ensure patrons are following distancing and hygiene protocols.
- Timed admission ticketing should be implemented, where possible.
- Online admission ticketing should be used, where possible.
- Cashless or no-contact payment should be used as much as possible, with physical distancing being observed at all times.
- Employ the use of self-serve checkout and return services as much as possible.
 - Place hand sanitizer stations and sanitizing wipes near each station.
 - Monitor use and frequently disinfect high-touch surfaces.
- Consider supporting vulnerable populations with dedicated hours.
- Indoor playgrounds and recreation areas are permitted subject to the [Sports and Activities Guidelines](#). Outdoor playgrounds are permitted subject to the [Recreation Guidelines](#).
- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- Retail sales are subject to the [Clothing and Retail Guidelines](#).
- Restrict or limit personal items being stored in coatrooms, baggage holding areas, etc.
- Remove brochures and brochure racks from public access areas. Instead, distribute brochures and maps at staffed visitor check-in points.

- Facilities should post external and internal signs indicating distancing and hygiene protocols. Request patrons stay home if sick or symptomatic.
- A response plan should be in place in case a patron or staff member develops COVID-19 symptoms while at the venue.

Physical Distancing

- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres in all areas.
- Consider physical barriers (e.g. Plexiglas) at visitor contact points.
- One-way flow patterns should be established, where possible. Entrances and exits should be organized to support one-way traffic flow through the facility.
- Use markings or dividers in common areas to ensure physical distancing. Floor decals can be used.
- Elevator use protocols should be established to ensure distancing requirements.
- Remove or spread out seating to encourage two metres of physical distancing. Discourage gathering throughout the facility.

Cleaning, Disinfection and Sanitization

- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, pay stations, washrooms and other high-touch locations for customers.
- Increase cleaning and disinfection of commonly contacted areas, including doorknobs, handles, counters, railings, stations, display fronts, PIN pads and/or self-pay stations, and light switches. Common touch areas include those accessed by customers and employees.
- Equipment provided by the facility for accessibility purposes, such as strollers and wheelchairs, must be cleaned and disinfected between uses.
- Computers used by the public should be cleaned and disinfected frequently, and hand sanitizer should be located nearby.
- Where possible, remove common touch items from all areas.
- Ensure employee and public washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently.

Public Programming and High-Contact Areas

- Self-guided tours and app-based self-guided tours are recommended rather than providing shared headsets or guided tours. Items rented must be

cleaned and disinfected between each use. Live guided tours are subject to gathering and physical distancing requirements.

- Day camps must follow the [Child and Youth Camp Guidelines](#).
- One-on-one services may continue with appropriate physical distancing and barriers. Limited group programming is permitted.
- For in-person programming (e.g. book clubs, fundraisers, classes, workshops):
 - Physical distancing (two metres) must be applied for participants not from the same household.
 - Group sizes are limited to eight participants per group, not including facilitators or staff.
 - Consider hosting online or virtual activities.
- Where possible, use touchless audio-visual displays (triggered by physical distance, Radio Frequency Identification (RFID), or similar technology).
- High-touch displays and interactive objects require enhanced cleaning and disinfection. Provide hand sanitizer near displays.
- Facilities may install additional barriers to discourage patrons from touching fences or glass enclosures.
- Where possible, sensory play should be discontinued. If necessary, sensory play should be conducted as an individual activity.

Guidelines for Employees

- Employees are required to practise physical distancing at work. Avoid handshakes and any other physical contact with others. Remain two metres apart from others whenever possible.
- If staff are unable to maintain two-metre distancing from co-workers, other measures should be implemented, such as self-monitoring of personal health, supervision by Infection Prevention and Control Officers or Occupational Health and Safety in the workplace. Other appropriate measures include:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room whenever possible.
 - Altering break times to minimize the number of staff working in close quarters.
 - Wearing personal protective equipment and mask per [Public Health Order - Face Coverings](#).
- Additional information is available on the [appropriate use of personal protective equipment \(PPE\)](#).
- Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:

- Washing hands often with soap and water for at least 20 seconds.
- Using hand sanitizer approved by Health Canada (DIN or NPN number) when hands are not visibly dirty and handwashing isn't available.
- Avoiding touching their face, mouth, nose and eyes.
- Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing their hands. If a tissue is not available, they should cough or sneeze into their elbow, not their hands.
- Additional glove use for COVID-19 transmission mitigation is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions. Facilities should review their employee illness policies to ensure staff are able to remain home when ill (as is required).
- Stagger staff arrival and departure times, lunch times, breaks and meetings to reduce the number of individuals in one place at a given time. Designate lockers and storage spaces for individual workers.
- Ensure staff are adequately trained in new policies and protocols.
- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.
 - Sick employees use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
 - If an employee has gone home sick, their work areas should be cleaned and disinfected.

Libraries

- Encourage patrons to consider other options for borrowing materials, such as:
 - Accessing e-books and other virtual library borrowing services.
 - Browsing library catalogues online at home.
 - Using holds to reserve materials, reducing the amount of time people spend in the library.
- Consider offering curbside pickup for on-hold and check-out items or, if available, consider delivery or drop-off services.

- For information on community programming, please refer to the [Recreation Guidelines](#).
- Maintain physical distancing during interlibrary book deliveries. This might include identifying a drop zone.
- For item returns:
 - When possible, clean and disinfect all surfaces of the returns.
 - If items cannot be cleaned and disinfected, isolate items in a separate bin (labelled with return date) for at least 24 hours before being returned to circulation shelves. Employees must wash their hands after handling returns.
- Public sit and stand work stations should be rearranged to ensure physical distancing. For example, leave every other terminal empty.

Animal Exhibits

- When planning events involving animals, organizers should consider the potential for COVID-19 to spread from person to person, person to animal and possibly from animal to animal. While the virus that causes COVID-19 can likely infect certain animals, evidence to date indicates the risk of animals spreading COVID-19 to people is considered low. The pandemic is primarily driven by human-to-human transmission.
- The following animal species are or may be susceptible to infection and should not be allowed contact with the public and other animals in petting zoos and other public events:
 - Felines (domestic cats, tigers and lions)
 - Mustelids (ferrets, minks)
 - Hamsters
 - Dogs (somewhat susceptible)
 - Bats
 - Non-human primates (Macaque, marmoset and baboon)
 - Rabbits
- Organizers should use facilities that provide adequate ventilation for animals and people.
- Limit personal items allowed in the animal area. Do not allow food or bulky items, such as strollers and backpacks, in the animal area.
- Include hand hygiene stations at the entrance and exit to petting zoos and other exhibits where people will be interacting with animals. Visitors should wash their hands before and after entering the area, even if they didn't touch animals. If soap and water are not readily available, provide hand sanitizer approved by Health Canada (DIN or NPN number). If possible, staff should be assigned to the exit to actively encourage hand-washing.
- Limit visitor contact with animals to feeding and petting. Visitors should not be allowed to kiss or snuggle with animals.

- Do not allow visitors to share their food with animals.
- Do not use common feed dispensers and other shared surfaces that cannot be cleaned and disinfected effectively and frequently.
- Monitor animals for signs of illness. Do not allow any sick animals.

Movie and Live Theatre Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). Operators of theatres in Saskatchewan must be in compliance with these guidelines. The information below provides guidelines for operators of movie and live theatres.

These guidelines have been developed to support theatre operators in reducing the risk of transmission of COVID-19 among attendees, including workers, volunteers, patrons and the general public. The guidance provided outlines public health and infection prevention and control measures specific to movie theatres.

Capacity Requirements

- Effective June 20, 2021, in Step Two of Saskatchewan's Re-Opening Roadmap, capacity limits will increase to 150 from 30 people. Occupancy must be maintained that allows staff and customers to maintain two metres of physical distance.

General Operations

- Maintain an occupancy level in lobby and other common areas to allow staff and customers to maintain adequate physical distancing.
- Encourage patrons to come near the scheduled show time and go directly to their seats, and leave immediately following the show to discourage gathering in common areas.
- To prevent gatherings and close contact between individuals, avoid the use of intermissions at this time.
- Areas should be monitored to ensure people are following distancing and hygiene protocols.
- Online admission ticketing should be used, where possible.
- Cashless or no-contact payment should be used as much as possible, with physical distancing being observed at all times.
- Employ the use of self-serve checkout as much as possible.
 - Place hand sanitizer stations and disinfecting wipes near each station.
 - Frequently disinfect high-touch surfaces
- Consider supporting vulnerable populations with dedicated showings or performances.
- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.
- Retail sales must follow the [Clothing and Retail Guidelines](#). Food and beverage services are subject to the [Restaurants and Licensed](#)

[Establishments Guidelines](#). Where any of these facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be in the activity area. Movie theatres that can properly maintain physical distancing while seated during the film are exempt.

- Arcades and electronic games (e.g. pinball) are permitted and must follow the [Casino and Bingo Hall Guidelines](#).
- Remove magazines and racks from public access areas. Instead, distribute at staffed visitor check-in points.
- A response plan should be in place in case a patron or staff member develops COVID-19 symptoms while at the venue.

Physical Distancing

- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres in all areas.
- Theatres must set up processes and infrastructure to support two metres of distance to be maintained between patrons in all areas, including the lobby, concession area, washrooms and theatre rooms.
- Consider physical barriers (e.g. Plexiglas) at visitor contact points as an additional measure to physical distancing requirements.
- Use markings or dividers in common areas and lineups to ensure physical distancing. Floor decals can be used.
- One-way flow patterns should be established, where possible. Entrances and exits to buildings should be organized to support one-way traffic flow through the facility.
- Promoting physical distancing of two metres between groups can be done by:
 - leaving alternating rows empty;
 - leaving one or more seats empty between parties;
 - blocking off unavailable rows; and
 - signage and communication to patrons reminding them to leave the appropriate number of seats between parties.
- Manage crowds as they exit the theatre so that physical distancing can be maintained. This may be done through visual markings and calling row numbers to limit the numbers of persons exiting at a time.
- Assign seats to each patron and avoid general admission seating wherever possible.
- Stagger show start and end times to promote physical distancing.
- Elevator use protocols should be established to ensure distancing requirements.

Cleaning, Disinfection and Sanitization

- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near doors, pay stations, washrooms and other high-touch locations for customers.
- Increase cleaning and disinfection of commonly contacted areas, including doorknobs, handles, counters, railings, stations, display fronts, PIN pads and/or self-pay stations, and light switches. Common touch areas include those accessed by customers and employees.
- Ensure that arm rests and common touch areas within the theatres are cleaned and disinfected frequently.
- Where possible, remove common touch items from all areas.
- Ensure employee and public washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently.

Guidelines for Employees

- Dedicate separate tasks for workers (e.g. separate the role of taking orders from those who fill/deliver the order). Hand hygiene must be performed between tasks.
- Encourage staff to launder uniforms between shifts.
- If staff are unable to maintain two-metre distancing from co-workers, other measures should be implemented, such as self-monitoring of personal health, supervision by Infection Prevention and Control Officers or Occupational Health and Safety in the workplace. Other appropriate measures include:
 - Staggering activities to limit the number of staff in a confined area during the same period.
- Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer approved by Health Canada (DIN or NPN number) when hands are not visibly dirty and handwashing isn't available.
 - Avoiding touching their face, mouth, nose and eyes.
 - Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing their hands. If a tissue is not available, they should cough or sneeze into their elbow, not their hands.
- Additional glove use for COVID-19 transmission mitigation is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).

- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions. Facilities should review their employee illness policies to ensure staff are able to remain home when ill (as is required).
- Stagger staff arrival and departure times, lunch times, breaks and meetings to reduce the number of individuals in one place at a given time. Designate lockers and storage spaces for individual workers.
- Ensure staff are adequately trained in new policies and protocols.
- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.
 - Sick employees use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions.
 - If an employee has gone home sick, their work areas should be cleaned and disinfected.

Performing Arts Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). The information below provides guidelines to reduce the risk of transmission of COVID-19 in activities including, but not limited to, music, dance and theatre, and apply to all individuals involved, such as performers, instructors/directors, staff, assistants, volunteers and members of the general public.

The COVID-19 virus is mainly spread between individuals from exposure to droplets and aerosols generated in an individual's respiratory system (mouth, nose, throat, lungs, etc.). Droplets are created when talking, singing, playing instruments that require air to be blown into them, and through activities that require physical exertion, resulting in heavier breathing. The greater the force that droplets are expelled from the respiratory system, the greater the distance they can travel.

These guidelines provide specific guidance for safe return to performing arts activities. The Performing Arts Event Guidance section of these guidelines contains information for a limited return to public performances in large public venues. If COVID-19 activity increases in your area, responsible person(s) must be prepared to cancel and/or scale back events. All guests are responsible for assessing personal risk when attending any type of gathering.

For the purpose of their operations, dance schools and students should refer to the [Sport and Activities Guidelines](#) for current guidance on restrictions.

Responsible Person(s) – The organizer(s) of the event and/or the owner/operator of the facility that is responsible for ensuring these guidelines are followed. This person(s) must make themselves known to all attendees and, when required, to the Saskatchewan Health Authority. All attendees, staff and volunteers need to be familiar with the guidelines.

General

- All requirements of the public health order(s) must be observed.
- Participating individuals must self-monitor for illness and stay home when sick. Those who become unwell with symptoms related to COVID-19 must immediately return home and call HealthLine 811.
- One-on-one lessons must follow the relevant guidelines in this document as they relate to the specific activity (i.e. private vocal, instrumental, theatre, dance lessons).
- Effective June 20, 2021, in Step Two of Saskatchewan's Re-Opening Roadmap, capacity limits will increase to 150 from 30 people. Occupancy

must be maintained that allows staff and customers to maintain two metres of physical distance.

- Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#).
- Unless otherwise indicated in these guidelines, physical distancing of two metres must be maintained between individuals.
 - Visual cues for distancing, directional flow of movement through areas, and cordons or other barriers are recommended in common areas.
 - Signs and warnings about the risk of COVID-19, including mandatory masks and frequent handwashing, must be posted.
 - Commonly touched surfaces and shared equipment must be cleaned and disinfected after contact between individuals, even when not visibly soiled. Special attention should be paid to commonly touched surfaces, such as doorknobs, light switches, rails, etc.
- Follow proper hand hygiene and coughing/sneezing etiquette:
 - Wash your hands frequently with soap and water. Scrub for 20 seconds.
 - If soap and water are not available, use hand sanitizer approved by Health Canada (DIN or NPN).
 - Avoid touching your face, mouth, nose and eyes.
 - Cough/sneeze into the bend of your elbow and then wash your hands with soap and water.
- Designate one or more people to be responsible for ensuring compliance with these guidelines. All organizers/participants/videographers must self-monitor for symptoms and use the self-assessment tool at [saskatchewan.ca/COVID19](#)
- Attendee lists must be collected and kept for a minimum of 30 days. Contact details must include date, time, name, address and phone number or email address.
- At-risk populations, such as seniors and people with underlying health conditions, should avoid activities that increase the risk of exposure to the COVID-19 virus.
- Whenever possible, performing arts activities should be moved outdoors due to the lower risk of spreading the virus.
- All participants in performing arts must wear a mask per the requirements in the public health order.

Choir/Group Vocals

Caution: multiple confirmed and suspected outbreaks of the COVID-19 virus have been linked to choirs.

- Choirs should be broken into smaller vocal ensembles wherever possible. However, they must not exceed 150 people.

- Choirs are permitted to hold public performances provided performers are separated from patrons by four metres.
- Audiences should be advised to avoid singing along with the choir.
- Please refer to the [Public Health Order related to Face Coverings](#) for masking requirements.
- Singers must be positioned in a staggered manner to avoid standing front-to-back or face-to-face.
- The conductor must wear a non-medical or procedure mask and maintain at least three metres of separation from other participants.

Orchestras

Air blown into woodwind instruments follows a relatively short and direct path through the instrument. As such, respiratory droplets can be ejected from the instrument. Brass instruments require blown air to follow a more convoluted path, which reduces the risk of ejecting droplets. However, moisture accumulates in the instrument and can be manually ejected through the water key or spit valve, which can create droplets.

- Live music – including singing – should be separated from patrons by a distance of four metres.
- When indoors, all musicians must wear a non-medical mask at all times during the performance, except for musicians playing a woodwind, brass or other instrument operated by breath. All musicians must maintain a distance of three metres from others while playing.
- Instrument bell covers made of a tightly woven fabric with at least two layers are recommended.
- Instruments, drum sticks/mallets, music stands and other items must not be shared between participants, unless cleaned and disinfected between uses. Items that can't be disinfected (e.g. sheet music) must not be shared, laminated to allow for disinfection, or held for 24 hours before sharing. Hand hygiene must be completed prior to handling common items.
- Instruments should be cleaned and maintained at home or off site.
- A designated area must be established where onsite cleaning or maintenance is necessary. This area must be used individually and cleaned/disinfected frequently. Liquid expelled from water keys must be captured on an absorbent, disposable material.
- While 70 per cent isopropyl alcohol can often be used for disinfecting instruments, musicians should consult manufacturers or other professionals to ensure they aren't damaged.

Bands

Air blown into woodwind instruments follows a relatively short and direct path through the instrument. As such, respiratory droplets can be ejected from the instrument. Brass instruments require blown air to follow a more convoluted path, which reduces the risk of ejecting droplets. However, moisture accumulates in the instrument and can be manually ejected through the water key or spit valve, which can create droplets.

- Live music (i.e. bar/pub) – including singing – should be separated from patrons. People in the band must be four metres from patrons.
- When indoors, all musicians must wear a non-medical mask at all times during the performance, except for musicians playing a woodwind, brass or other instrument operated by breath. All musicians must maintain a distance of three metres from others while playing.
- Instrument bell covers made of a tightly woven fabric with at least two layers are recommended.
- Instruments, drum sticks/mallets, music stands and other items must not be shared between participants, unless cleaned and disinfected between uses. Items that can't be disinfected (e.g. sheet music) must not be shared, laminated to allow for disinfection, or held for 24 hours before sharing. Hand hygiene must be completed prior to handling common items.
- Instruments should be cleaned and maintained at home or off site.
- A designated area must be established where onsite cleaning or maintenance is necessary. This area must be used individually and cleaned/disinfected frequently. Liquid expelled from water keys must be captured on an absorbent, disposable material.
- While 70 per cent isopropyl alcohol can often be used for disinfecting instruments, musicians should consult manufacturers or other professionals to ensure they aren't damaged.

Theatre (including Musical Theatre)

- Requirements apply to all 'front of house' and 'back of house' operations.
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- When performances involve singing or projecting voice, performers must be separated from patrons and other performers by a distance of four metres.
- Performances that require close contact between individuals must be avoided, where possible. Adjust performances or select performance options with limited participants, such as solos, spoken word, etc.
- Carefully manage the use of dressing rooms, makeup areas, etc. to ensure proper distancing.
- Makeup should not be shared at this time.

- Shared items, such as costumes and props, should be avoided where possible. Shared items must be laundered or cleaned and disinfected after each performance.
- Masks, microphones or other items likely to be exposed to respiratory droplets must not be shared.
- Where possible, auditions and rehearsals should be conducted remotely using video conferencing systems.

Dance

- Dance competitions and recitals are permitted for all age groups and must abide by the required mask use indoors and at least three metres of physical distancing between participants at all times.
- Interprovincial competitions are not permitted at this time.
- Effective June 20, 2021, maximum capacity per facility is 150 not including staff, coaches and building staff.
- Discourage spectator mingling between non-household/close contact groups (e.g. posters, announcements, directional signage, etc.)
- Consider remote rehearsals/practices using video conferencing systems.
- Areas for dancers should be marked, and dancers should be instructed to remain within their designated areas.
- Dance styles, forms and moves that require direct physical contact must be avoided at this time.
- Props and other items must not be shared between dancers, and they must be cleaned and disinfected between uses.
- Dancers should be encouraged to arrive and depart in their dance clothing to minimize crowding in change areas.

Performing Arts Event Guidance

General

- Effective June 20, 2021, venues are permitted to have 150 individuals (not including event staff, volunteers) for performances where assigned seating is in place and two metres of distancing is managed and maintained. A checklist submission or COVID preparedness plan is required for all public entertainment and performance events (see: [COVID-19 Large Public Venue Event Preparedness Checklist](#)).
- A COVID-19 checklist or COVID preparedness plan is to be completed by event organizers for events that will welcome up to 30 people.
- Any business, community group or other organization hosting an event must designate one or more people to be responsible for ensuring compliance with these and any other applicable guidelines.

- Attendees must be made aware of the name and contact number of the person(s) responsible for the event.
- Attendees must be notified upon entry of the necessary measures to reduce the risk of COVID-19 transmission within the event area. Signage should be posted in visible locations at entrances and throughout the event areas.
- The organizer shall establish a response plan should a patron or staff/volunteer become ill and display COVID-19 symptoms while at the venue. The plan shall be made available for review upon request by local public health officials.
- Where possible, the organizer should provide attendees with the option to attend events virtually using online/social media platforms and consider supporting vulnerable populations with dedicated showings or performances.
- Online admission ticketing should be used, where possible.
- Cashless or no-contact payment should be used as much as possible, with physical distancing being observed at all times.
- Limit the duration of the event. Organizers should provide attendees with a suitable timeframe for arrival to the event to ensure crowds/line-ups are minimized. Attendees should leave immediately following the event/gathering to discourage gathering in common areas.
- Seating areas are subject to the following:
 - Physical distancing is required between individuals with the exception of household.
 - In stadium or bleacher-type seating areas, leave rows empty and provide signage where necessary.
 - Use assigned seating.
- Where food and beverage is offered, the [Restaurants and Licensed Establishments Guidelines](#) must be followed. Where any of these facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be in the activity area.

Contact Tracing

- Responsible persons are strongly encouraged to collect attendee names and contact information, such as a phone number and/or email address. Where possible, this information should be collected prior to the event to prevent line-ups. Information will be requested by the Saskatchewan Health Authority only for the purposes of contact tracing if a COVID-19 exposure is linked to the event.
- Attendee records should be retained for at least 30 days after the event.
- Downloading and using the COVID Alert tracing app is recommended.

Crowd Management

- Responsible persons for the event must:
 - Manage crowds in common areas, especially during breaks in ceremonies, entertainment, etc.
 - Manage crowds as they exit an event area so physical distancing can be maintained. This may be done through visual markings and calling areas/sections to limit the numbers of persons exiting at a time.
 - Limit the duration of an event and/or limit participants.
 - As an additional safety measure, install barriers (e.g. Plexiglas window at a booth/kiosk/cubicle higher than head-height).
- Where possible, event access areas should also be controlled (e.g. parking areas, erect barriers, set maximum occupancy, signage).
- Avoid activities that do not allow physical distancing, such as party games or crowding together for photographs.
- Ensure processions have adequate space to move while maintaining physical distancing.

Food and Beverage Service

- Food services that are licensed under *The Food Safety Regulations* (i.e. restaurants, mobile food vendors) are subject to the requirements contained in the [Restaurants and Licensed Establishments Guidelines](#).
- Where any of these facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be in the activity area.
- For all other food service, see the [Temporary Food Vendor Guidelines](#).
- For events that are not considered a temporary food event, but still intend to provide food and beverages:
 - No buffet style or self-service foods or beverages permitted.
 - Single portions and pre-packaged foods may be provided.
 - Common touch items are not permitted. This includes self-serve beverages (including mix and ice), napkins, utensils and condiments. The exceptions are single-use items that are wrapped (e.g. ketchup, mustard).
 - Provide single-serve refreshments only.
 - Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.

Appendix - COVID-19 Large Public Venue Event Preparedness Checklist

COVID-19 Large Public Venue Event Preparedness Checklist

The responsible person(s) must complete this checklist and submit it to the COVID-19 Response Unit (CRU@health.gov.sk.ca) at least 14 days prior to the event. You will only be contacted if more information is required.

Name of Event Organizer: <insert text field>

Event Organizer Phone Number: <insert text field>

Event Organizer email address: <insert text field>

A. Event Details

Date of the event < insert text field>

Description of Event Type (e.g. Concert, Live Theatre, etc.):

< insert text field>

Name and contact information of event venue owner/operators (where applicable):

<insert text field>

Location of Event:

Venue Name: <insert text field>

Venue Owner/Operator Name: <insert text field>

Venue Address: <insert text field>

Expected Number of Attendees: <insert text field>

Expected Number of Staff/Volunteers: <insert text field>

B. Public Health Measures

- ☐ I have reviewed the **Performing Arts Guidelines** and all other applicable guidelines in the Re-Open Saskatchewan Plan and understand all requirements necessary for my event.
- ☐ Measures have been taken to accommodate **two metres** of physical distancing between individuals and household groups.

- ☐ Supplies and/or equipment for proper hand hygiene are available for all attendees, including, but not limited to, two hand sinks with soap and running water, Health Canada approved hand sanitizer (DIN or NPN number).
- ☐ Enhanced cleaning and disinfection will be performed prior to and during the event using an approved Health Canada disinfectant.
- ☐ The number of attendees will not exceed the amount permitted per the **Performing Arts Guidelines** contained in the Re-Open Saskatchewan Plan.
- ☐ A response plan has been developed in the event someone becomes ill with COVID-19 symptoms during the event.
- ☐ In the event a COVID-19 case is linked to the event, attendee information, including names and contact information, will be collected and held by the event organizer for a minimum period of one month after the event for the purposes of contact tracing.
- ☐ Self-serve food (i.e. buffet, snack tables) and beverage areas (i.e. open bars) will not be setup at this event.
- ☐ I declare that the above information is accurate and agree to provide more information if needed.

Casino and Bingo Hall Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). The information below provides guidelines to reduce the risk of transmission of COVID-19 in casinos and bingo halls. Operators of these facilities must also continue to operate in compliance with all other applicable provincial regulations and standards.

Effective June 20, 2021, casino and bingo halls are permitted to re-open. Capacity limits cannot exceed 150 patrons. Occupancy must be maintained that allows staff and customers to maintain two metres of physical distance. VLTs in facilities outside of casinos and bingo halls are permitted.

- These guidelines are high-level practices for operators of casinos and bingo halls. Casinos are also expected to operate under the COVID-19 re-opening plans created by the Saskatchewan Indian Gaming Authority or SaskGaming, which address the specific operational guidelines for gaming facilities.
- Operators of licensed video lottery terminals (VLTs) are also expected to observe the Saskatchewan Liquor and Gaming Authority's (SLGA) operational guidelines for VLTs.
- Bingo halls should develop a risk mitigation strategy to manage operations in a safe and effective manner.

General

- All applicable requirements of the public health order must be observed.
- Effective June 20, 2021, casinos and bingo halls must maintain an occupancy level of 150 people that allows staff and customers to keep a physical distance of two metres, except for brief exchanges.
- Employees and guests must self-monitor for illness and stay home when sick or symptomatic. Those who become ill with symptoms related to COVID-19 must immediately return home and call HealthLine 811.
- Adults 65 and over, and those with compromised immune systems or other underlying medical conditions, are at a higher risk of developing severe COVID-19.
- A response plan should be in place in case a patron or staff member develops COVID-19 symptoms while at the venue.
- Facilities should post external and internal signs indicating physical distancing requirements, staying home when ill and hygiene protocols.
- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres in all areas.

- Physical barriers can be considered where areas cannot be adequately separated.
- Aisles must be wide enough to allow room for people to maintain two metres of physical distancing. Consider using one-way traffic flow to help maintain distancing.
- Visual cues for distancing, directional flow of movement through areas and cordons or other barriers are recommended in common areas.
- Other measures to ensure physical distancing should be considered, including:
 - Reducing the number of slot machines or VLTs available.
 - Repositioning seats or reducing the number of seats available.
- People should be discouraged from watching others play games. Physical distancing must always be maintained.
- Food and beverage service must be consistent with the [Restaurants and Licensed Establishments Guidelines](#). Where any of these facilities offer food or beverage service, they must keep the activity separate (i.e. cordoned off) from the food and beverage service. No food or drink may be in the activity area.
- Show lounges and performances are subject to the [Movie and Live Theatre Guidelines](#).
- Frequent and effective hand hygiene and respiratory etiquette must be practised and promoted.
- Coat checks and similar services are not permitted.

Table Games

- Table games with limited guest handling of cards (blackjack and single-use baccarat) and those without cards (roulette and craps) are permitted. Poker is not permitted at this time.
- Traffic flow around the tables should be designed in a way that allows two metres physical distance to be maintained between players, staff and those entering or exiting the area. Floor markers, signs or other visual aides are recommended.
- Reconfigure seating at table games to allow three metres distance between players or two metres with physical barriers.
 - The maximum number of players per table is three (with or without barriers).
- Guests and observers are not permitted to congregate, cheer, shout, back wager or stand in close proximity to players at table games.
- Hand hygiene must be performed before and after play. Hand sanitizer approved by Health Canada (DIN or NPN number) must be easily available for all players and dealers.
- All dealers should sanitize or wash their hands prior to starting their shifts,

prior to returning to tables from breaks and in between any deck or card shoe changes.

- Please refer to the [Public Health Order related to Face Coverings](#) for masking requirements.
- Verbal and non-contact signals should be given rather than physical contact, such as when changing shifts or placing bets.
- Cards should be replaced regularly. Any common touch items, such as card shoes, shufflers, money paddles, dice, tokens and token boxes, chips and chip trays, barriers, tables, chairs and rails, must be frequently cleaned and disinfected.
- Chip trays may be used by guests to transfer chips to the cage or between tables.
- Food and beverage service is not permitted at tables.

Guidelines for Employees

- Employees are required to practise physical distancing at work. Avoid handshakes and any other physical contact with others. Remain two metres apart whenever possible.
- Consider modifying or eliminating in-person meetings and shift huddles to maintain physical distance.
- If staff are unable to maintain two-metre distancing from co-workers, other measures should be implemented, such as self-monitoring of personal health and supervision by Infection Prevention and Control Officers or Occupational Health and Safety in the workplace. Other appropriate measures include:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room whenever possible.
 - Altering break times to minimize the number of staff working in close quarters.
- It is recommended that vulnerable staff, such as those over 65 and those with underlying health conditions, wear a procedure/surgical mask.
- Additional information is available on the [appropriate use of personal protective equipment \(PPE\)](#).
- Limit the sharing of objects and tools by staff (e.g. cards, chips, etc.) or disinfect between uses.
- Dedicate separate tasks for workers (e.g. separate the role of cashier handling money from those handling chips/tokens). Hand hygiene must be performed between tasks.
- Encourage staff to launder uniforms/work clothes between shifts.
- Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:

- Washing hands often with soap and water for at least 20 seconds.
- Using hand sanitizer when hands are not visibly dirty and handwashing isn't available.
- Only using hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoiding touching face, mouth, nose and eyes.
- Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing hands. If a tissue is not available, cough or sneeze into the elbow, not hands.
- Additional glove use for COVID-19 transmission mitigation is not required. If staff are using gloves, they should be changed after every interaction and when changing tasks. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool for COVID-19](#) and follow the subsequent directions. It is recommended that facilities review their employee illness policies to ensure staff are able to remain home when ill.
- Ensure staff are adequately trained in new policies and protocols.
- Workplaces are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure the following:
 - Sick employees should stay home or are sent home from work if symptoms present.
 - Sick employees use the Government of Saskatchewan's [self-assessment tool for COVID-19](#).
 - If an employee goes home sick, their work areas should be cleaned and disinfected.

Cleaning, Disinfection and Sanitization

- The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent the spread of the disease.
- Maintain a cleaning schedule and ensure staff are adequately assigned and trained for additional cleaning, sanitizing and disinfection duties.
- Place hand sanitizer approved by Health Canada (DIN or NPN number) in dispensers or soap and water handwashing stations near entrance/exit points, token dispensers, pay stations, washrooms and other high-touch locations for customers and staff.

- Customers should be encouraged to wash or sanitize their hands prior to and following use of VLTs and playing bingo.
- Increase cleaning and disinfection of commonly contacted areas, including doorknobs, handles, counters, PIN pads, elevator buttons, railings and light switches. Common touch areas include those accessed by customers and employees, including back of house.
- Increase the frequency of cleaning and disinfection of slot machines, VLTs and common touch surfaces.
- Increase cleaning and disinfection of commonly touched items, such as chips.
- Where possible, remove common touch items from all areas.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses and approved by Health Canada (DIN).
- Ensure employee and public washrooms are cleaned with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Garbage bins should be emptied frequently.
- Microphones cannot be shared between individuals due to the difficulty of cleaning and disinfecting these devices. Minimize the number of persons providing readings or performing other activities requiring the use of a microphone.

Temporary Food Vendor Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). Temporary food service vendors are food services that operate at events for a temporary/limited period of time, and are permitted to operate in accordance with the guidelines below. Temporary food vendors must contact their local public health inspection office prior to operation.

Vendors operating within markets must follow the [Public and Farmers Market Guidelines](#). In addition to these guidelines, all other applicable requirements contained in *The Food Safety Regulations*, *The Provincial Public Eating Establishment Standards* and provincial technical guidance must be followed.

Physical Distancing

- Physical distancing of two metres must be maintained by all patrons and food vendors with the exception of household members.
- Operators should use physical line controls when possible, such as crowd control cordons at entrances and pick-up areas. Place markers (e.g. tape or cones) every two metres as visible cues to support physical distancing, widen aisles and encourage one-way directional flow of traffic.
- Gathering numbers are limited to the [public health order](#).
- If seating is provided, it should be arranged in a way that ensures:
 - Two metres of physical distancing must be maintained between the seats of patrons at adjacent tables/booths or a structural barrier must be in place between tables when two metres of distance is not possible.

Hand Hygiene, Cleaning and Disinfection

- Hand hygiene supplies must be available. This can be hand sanitizer or a handwashing station stocked with soap and paper towels. Customers should be encouraged to wash or sanitize their hands before and after eating.
- Anyone handling, preparing or serving food must have access to a handwashing station with running water, soap and paper towels.
- Proper and frequent hand hygiene is a vital component in preventing the transmission of illnesses. Ensure all persons are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer only when appropriate in a food service situation.

- Only using hand sanitizer approved by Health Canada (DIN or NPN number).
- Avoiding touching their faces, mouths, noses and eyes.
- Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing hands. If a tissue is not available, cough or sneeze into the elbow – not the hands.
- Increase cleaning and disinfection of commonly contacted areas, such as cashier table, volunteer/staff chairs, cooler handles and payment machine terminals. Common touch areas include those accessed by customers, volunteers and employees.
- Ensure the disinfectant used in the facility is adequate for the elimination of viruses and approved by Health Canada (DIN).
- Where seating is provided:
 - Tables must be cleaned and sanitized, and table coverings must be removed and discarded or laundered between customers;
 - Food contact surfaces (food preparation surfaces, tables, food trays, etc.) must be sanitized frequently using sanitizer strengths as described in section 3.1 of the [Provincial Public Eating Establishment Standards](#) (e.g. 100 ppm bleach-water solution, 200 ppm quaternary ammonium solution); and
 - If using a strong disinfection strength solution instead of a sanitizer, any food contact surface must be immediately rinsed thoroughly using fresh water.

General Operations

- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- Common touch items are not permitted. This includes self-serve beverages, napkins, utensils and condiments. Single portions, beverage dispensing machines and pre-packaged foods may be provided by volunteers/staff with each order.
- Buffets and self-serve food lines remain closed at this time.
- Ensure employee and public washrooms are cleaned and disinfected with increased frequency, are always well stocked with liquid soap and paper towels, and warm running water is available.
- Garbage bins should be accessible and emptied frequently.
- Post signage reminding customers of precautions to be taken (e.g. hand hygiene, physical distancing, etc.).

Volunteers/Staff

- Where volunteers/staff are unable to maintain a distance of two metres from volunteers/co-workers, other actions may be necessary, including self-monitoring of personal health, personal protective equipment or implementing other protective measures, including:
 - Staggering activities to limit the number of persons in a confined area during the same period.
 - Altering shift and break times to minimize the number of persons working in close quarters.
 - Where possible, scheduling shifts so persons from the same or household are working the same shift.
 - Using markings or dividers to ensure physical distancing.
 - Minimize movement by maintaining assigned positions for the entire shift (e.g. cashier, cook, servers, cleaners) and having contactless pick up.
 - Wearing personal protective equipment.
- Glove use may be needed for cleaning and disinfection, but it is not required nor recommended for food handlers or other volunteers for preventing the spread of COVID-19. If using gloves, they must be changed after every interaction, as well as when changing tasks. Hand hygiene must be performed between every glove change (handwashing with soap and water or hand sanitizer approved by Health Canada – DIN or NPN number).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool](#) for COVID-19 and follow the subsequent directions.
- All sick volunteers/workers must stay home or be sent home. Temporary food operations are encouraged to have plans in place for increased volunteer/worker absences due to illness or isolation.
- If a worker/volunteer develops symptoms consistent with COVID-19, the entire temporary food vendor area must be cleaned and disinfected.

Racing, Livestock Sales and Rodeo Guidelines

The guidelines below apply to indoor and outdoor venues hosting public racing and rodeo events and livestock sales, regardless of whether an admission fee is charged. Racing includes horse racing or any type of motorized racing.

Specific guidance contained in Re-Open Saskatchewan must be followed, where they apply. In addition to these guidelines, all other applicable federal and provincial legislation, regulations and standards must be adhered to in addition to local municipal bylaws. Organizers should always contact the [local public health inspection office](#) when planning an event.

Event Capacity Requirements

- All indoor public spectator events are limited to a maximum of 30 spectators, provided the space is large enough to accommodate physical distancing between all people/groups in attendance. Effective May 30, 2021, all outdoor public events increase to 150 spectators, provided the space is large enough to accommodate physical distancing of two metres between non-household groups. Facility staff, event organizing staff/volunteers and event contestants are not included in the total.
- Effective May 30, 2021, all outdoor sale/auction events are limited to a maximum total of 150 buyers and sellers, provided the space is large enough to accommodate physical distancing between all people/groups in attendance. Effective June 20, 2021, capacity for indoor events (e.g. rodeos, sales/auction) is limited to a maximum total of 150 buyers and sellers, provided the space is large enough to accommodate physical distancing between all people/groups in attendance. Facility staff, event organizing staff/volunteers are not included in the total.

General Guidance

- Any business, community group or other organization holding an event must designate one or more people responsible for ensuring compliance with these and any other applicable guidelines.
- Seating areas are subject to the following:
 - Physical distancing is required between individuals with the exception of household groups.
 - Leave alternating rows empty and provide signage where necessary.
 - Events should have assigned seating, where possible.

- Limit the duration of the event as much as possible. Encourage patrons to arrive close to the scheduled event time and proceed directly to their seats. Attendees should leave immediately following the event/gathering to discourage gathering in common areas.
- Fundraising activities (e.g. 50-50 sales) must be sold at kiosks or other areas where distancing can be managed.
- Online admission ticketing should be used, where possible.
- Cashless or no-contact payment should be used as much as possible, with physical distancing observed at all times.
- Consider supporting vulnerable populations with dedicated showings or performances.
- A response plan should be in place in case a patron or staff/volunteer develops COVID-19 symptoms while at the venue.

Guidance for Livestock Sale/Auction Events

- Virtual or online sales events should be organized wherever possible.
- International participants are subject to federal and provincial public health orders.
- Limit the number of people in viewing and sales areas.
- Facility staff and event organizing staff/volunteers are to be kept to a minimum.
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- Sales administration activities must be held in a manner that reduces the number of participants involved, congregation of people and promotes physical distancing.

Guidance for Racing and Rodeo Events

- International participants are subject to federal and provincial public health orders.
- Limit the number of people in participant areas.
- Team personnel are to be kept to a minimum.
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- Award ceremonies must be held in a manner that reduces the number of participants involved and promotes physical distancing. Where possible, prizes or trophies should be provided after the event and winners are announced through social media or email.
- Go-kart tracks or other venues that allow shared use of vehicles must implement a cleaning and disinfection program for high-touch areas of the vehicles and other shared equipment.

Hand Hygiene

- Organizers must promote and facilitate frequent and proper hand hygiene:
 - Provide handwashing facilities where possible.
 - Provide hand sanitizers approved by Health Canada (DIN or NPN number).
 - Ensure there are stations available to maintain hand hygiene.
- Staff and volunteers must wash hands frequently with soap and warm water or with hand sanitizer when soap and water is not available.
- In washrooms and other areas with handwashing facilities, adequate supplies must be available, including soap, paper towels and waste receptacles.
- Organizers are strongly encouraged to post information around the event area that remind attendees to practise respiratory etiquette and hand hygiene (e.g. entrances, washrooms and staff rooms).

Physical Distancing

- Public and staff, with the exception of household contacts, must maintain a physical distance of two metres from others in all areas.
- Event organizers must establish facility/area plans that include visual markers, such as cordons, floor markers, signage, etc., to encourage and support proper physical distancing. Areas of concerns include common areas, food and beverage service areas, seating, walkways and washrooms.
- Lineups at washrooms and food and beverage service areas during breaks in public events pose a serious challenge. Event organizers must manage these areas to mitigate risks to attendees.
- Event organizers are responsible for:
 - Managing crowds in common areas, especially during breaks in entertainment;
 - Managing crowds as they exit so physical distancing can be maintained. This may be done through visual markings or calling areas to limit the numbers of persons exiting at a time;
 - Limiting the duration of an event and/or limiting participants; and
 - As an additional safety measure, install barriers (e.g. Plexiglas window at a booth/kiosk/cubicle), where practical.
- Where possible, access to the event should be controlled and occupancy limited (e.g. limit parking, erect barriers, set maximum occupancy, signage).
- Avoid activities that do not allow physical distancing, such as crowding together for photographs.
- Ensure processions have adequate space to move while maintaining physical distancing.

Cleaning and Disinfection

- Develop and implement procedures for increasing the frequency of cleaning and disinfecting high-traffic areas, common areas, public washrooms and shower facilities. Refer to the [Environmental Cleaning and Disinfection Guidelines](#) for further information.
- Frequently touched surfaces (e.g. washrooms, door handles and counters) should be cleaned and disinfected frequently with an approved disinfectant.
- Disinfectants must be approved by Health Canada (DIN) and be used according to label instructions, including contact time.
- Promote increased environmental cleaning of participant's personal environment if appropriate (e.g. provide sanitizing wipes so gathering attendees can clean their own environment, such as arms of seats).
- Ensure disposable towels and spray cleaners, or disposable wipes, are available to workers, volunteers and (as necessary) patrons to regularly clean commonly used surfaces.
- Garbage bins should be emptied frequently.

Food and Beverage Service

- Food services that are licensed under *The Food Safety Regulations* (i.e. restaurants, mobile food vendors) are subject to the requirements contained in the [Restaurants and Licensed Establishments Guidelines](#).
- No food or beverages are permitted in the activity area. Facilities that offer food or beverage service must keep the activity separate (i.e. cordoned off) from the food and beverage service area.
- For all other food service, see the [Temporary Food Vendor Guidelines](#).
- For events that are not considered a temporary food event, but still intend to provide food and beverages:
 - No buffet style or self-service foods or beverages permitted.
 - Single portions and pre-packaged foods may be provided.
 - Common touch items are not permitted. This includes self-serve beverages (including mix and ice), napkins, utensils and condiments.
 - Provide single-serve refreshments only.
- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.

Banquets and Conference Facilities Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). The guidelines below are intended to provide information on banquet, meeting or social gatherings taking place in community halls, private rooms in restaurants, convention centres, conference and hotel meeting rooms, and other indoor venues.

General Guidance

- Effective June 20, 2021, in Step Two of Saskatchewan's Re-Opening Roadmap, capacity limits will increase to 150 from 30 people. Occupancy must be maintained that allows staff and tables of customers to maintain two metres of physical distance.
 - Seating for the event must be static and pre-assigned, and arranged so that two metres of physical distancing is maintained between households.
- Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#).
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- COVID-19 spreads from person to person, most commonly through respiratory droplets (generated by coughing, sneezing, laughing, singing, shouting or talking) during close interactions that are within two metres. The virus can also spread when people touch surfaces containing the virus and then touch their mouth, nose or eyes without washing their hands.
- Individuals who are ill or displaying symptoms of COVID-19, even if mild, must stay home and not participate in gatherings or events.
- Seniors and those who have compromised immune systems or other underlying medical conditions are at a higher risk of developing severe COVID-19. Anyone who belongs to a higher risk group should consider joining gatherings remotely (e.g. via video calls, live streams) or take extra precautions for in-person gatherings.
 - Seating for the event must be static and pre-assigned, and arranged so that two metres of physical distancing is maintained.
 - Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#).
- Attendees are to remain seated except to use the washroom or enter/exit the premises.
- The person organizing the gathering or the owner/operator of the facility is responsible for ensuring these guidelines are followed. It is strongly

encouraged that attendees, staff and volunteers be familiar with the guidelines.

- Limit the duration of the event. Encourage patrons to arrive as close to the scheduled event time and, where possible, proceed directly to their seats. Attendees should leave immediately following the event/gathering to discourage gathering in common areas.
- Greetings that require close physical contact, such as handshakes, high fives, fist bumps and hugs, should be discouraged.
- Microphones should not be shared by multiple people and must be cleaned and disinfected between uses.
- Coat checks are not recommended at this time.
- Dance floors and karaoke are not currently permitted.
- Live DJs are permitted, but must ensure physical distancing at all times. Written requests cannot be accepted at this time.
- Singing and shouting can spread droplets further than regular conversation and present an increased risk.

Live entertainment:

- Live DJs are permitted, but must ensure physical distancing at all times. Written requests cannot be accepted at this time.
- Singing and shouting can spread droplets further than regular conversation, so they present an increased risk.
- Singers and performers must wear masks.
- All musicians must wear a non-medical mask at all times during the performance, except for musicians playing a woodwind, brass or other instrument operated by breath, but only if they can maintain a distance of three metres from others while playing.
- People in the band/orchestra must be four metres from patrons.
- Everyone else in the band that is not a woodwind or brass must be two metres apart or utilize a barrier (i.e. Plexiglas) if distancing cannot be maintained.
- Musicians within the same household are not required to maintain physical distance, but must be separated from patrons and other performers from outside of their household.
- Instrument bell covers made of a tightly woven fabric with at least two layers are recommended but not required.
- Performers must use their own microphones. Instruments, drum sticks/mallets, music stands and other items must not be shared between participants, unless cleaned and disinfected between uses. Items that can't be disinfected (e.g. sheet music) must not be shared, laminated to allow for disinfection, or held for 24 hours before sharing. Hand hygiene must be completed prior to handling common items.

- Music, televisions and other background sounds should be played at a volume that allows patrons and staff to speak at the volume of a normal conversation (about 80 decibels).
- The facility must be equipped with adequate ventilation to minimize risks associated with indoor environments.
- Adequate handwashing and washroom facilities must be available.
- Cashless or no-contact payment should be used as much as possible, with physical distancing being observed at all times.
- A response plan should be in place in case a patron or staff/volunteer develops COVID-19 symptoms while at the venue.

Physical Distancing

- Groups from different banquet/conference rooms must not mingle with each other.
- Public and staff, with the exception of household contacts, must maintain a minimum physical distance of two metres from others in all areas.
- Seating areas are subject to the following:
 - Seating must be static and pre-assigned.
 - Physical distancing is required between individuals with the exception of household groups.
 - Leave alternating rows empty and provide signage where necessary.
 - Events and gatherings with seating should have assigned seating, where possible. Where table seating is provided, limit seating to four individuals per table, with three metres between tables or two metres with an impermeable barrier between tables.
- Event and gathering organizers must establish facility/area plans that include visual markers, such as cordons, floor markers, signage, etc., to encourage and support proper physical distancing. Areas of concerns include common areas, seating, walkways and washrooms.
- Avoid activities that do not allow physical distancing, such as party games or crowding together for photographs.
- Health officials strongly recommend wearing a non-medical mask anywhere outside the home.

Cleaning, Sanitization and Disinfection

- Maintain a cleaning schedule and ensure staff are adequately assigned and trained for additional cleaning, sanitizing and disinfection duties to help reduce transmission of COVID-19.
- Develop and implement procedures for increasing the frequency of cleaning and disinfecting of high traffic areas, common areas, and washrooms. Refer

to the [Environmental Cleaning and Disinfection Guidelines](#) for further information.

- Frequently touched surfaces (e.g. washrooms, door handles, chairs and counters) should be cleaned and disinfected frequently with an approved disinfectant.
- Disinfectants must be approved by Health Canada (DIN) and be used according to label instructions, including contact time.
- Ensure disposable towels and spray cleaners, or disposable wipes, are available to workers and (as necessary) patrons to regularly clean commonly used surfaces.
- Garbage bins should be emptied frequently.

Hand Hygiene

- Event/gathering organizers must promote and facilitate frequent and proper hand hygiene:
 - Provide handwashing facilities where possible.
 - Provide hand sanitizers approved by Health Canada (DIN or NPN number).
 - Ensure there are stations available to maintain hand hygiene.
- Staff and volunteers must wash hands frequently with soap and warm water or hand sanitizer when soap and water is not available.
- Ensure washrooms are cleaned and disinfected with increased frequency, always well stocked with liquid soap and paper towels, and that warm running water is available.
- Organizers are strongly encouraged to post information around the event/gathering area that remind attendees to practise respiratory etiquette and hand hygiene (e.g. entrances, washrooms and staff rooms).

Food Services

- Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#). In addition to the requirements in the Restaurant and Licensed Establishment guidelines, food and beverage service must follow:
 - Self-service of food or beverage is not permitted.
 - Attendees are to remain seated except when obtaining food or beverage, using washroom facilities or entering/exiting the premises.
- Close drinking fountains. Water bottle filling stations are acceptable if appropriately and frequently sanitized.

Guidelines for Employees

- Whenever possible, staff must maintain two metres of separation from other staff and customers. However, physical distancing in certain work environments may be difficult, such as kitchens. If staff are unable to maintain two metres away from co-workers, other actions may be necessary, including self-monitoring of personal health, supervision by Infection Prevention and Control or Occupational Health and Safety staff in the workplace or implementing other protective measures, such as:
 - Staggering activities to limit the number of staff in a confined area during the same period.
 - Moving activities to another room, whenever possible. For example, separating duties into unused spaces may be an option for preparation and packaging.
 - Altering shift and break times to minimize the number of staff working in close quarters.
 - Using markings or dividers in the kitchen to ensure physical distancing.
 - Considering directional arrows on the floor in the kitchen to control the flow of traffic, and clearly mark exit and entrance doors from the kitchen to service areas.
 - Wearing personal protective equipment.
- Proper and frequent hand hygiene by staff is a vital component in preventing the transmission of illnesses. Ensure staff are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Washing hands often with soap and water for at least 20 seconds.
 - Using hand sanitizer only when appropriate in a food service situation.
 - Only using hand sanitizer approved by Health Canada (DIN or NPN).
 - Avoiding touching their faces, mouths, noses and eyes.
 - Coughing or sneezing into a tissue, then immediately disposing of the tissue and washing hands. If a tissue is not available, cough or sneeze into the elbow – not the hands.
- Servers, hosts and other staff must wear a non-medical mask (e.g. cloth or other materials) or procedure/surgical mask.
- It is recommended that older staff/seniors or those with a weakened immune system wear a procedure/surgical mask.
- Glove use is not required nor recommended. If staff are using gloves, they must be changed after every interaction, as well as when changing tasks. Hand hygiene must be performed between every glove change. This includes handwashing with soap and water or hand sanitizer approved by Health Canada – (DIN or NPN number).
- All workers, especially those in constant contact with the public, should self-monitor for symptoms and use the Government of Saskatchewan's [self-assessment tool](#) for COVID-19 and follow the subsequent directions.

- It is recommended that facilities review their employee illness policies to ensure staff are able to remain home when ill (as is required). Facilities are encouraged to have plans in place for increased worker absences due to illness or isolation.
- Workplaces should have a workplace illness policy. If policies do not exist or are not in line with COVID-19 recommendations, workplaces should ensure that all sick employees must stay home or be sent home from work.
- If employees go home sick, their work areas and any areas they had contact with must be cleaned and disinfected.

Car Show and Trade Show Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). The guidelines below apply to indoor and outdoor venues hosting car shows and trade show-type events, such as home and garden shows, regardless of whether an admission fee is charged.

Specific guidance in the Re-Open Saskatchewan Plan must be followed. In addition to these guidelines, all other applicable federal and provincial legislation, regulations and standards must be adhered to in addition to local municipal bylaws. Organizers should always contact the [local public health inspection office](#) when planning an event.

Event Capacity Requirements

- Effective June 20, 2021, indoor events operating under these guidelines are limited to 150 individuals (not including staff, volunteers, participants and contestants), provided the space is large enough to accommodate physical distancing between all people. Effective May 30, 2021, outdoor events operating are limited to 150 individuals (not including staff, volunteers, participants and contestants), provided the space is large enough to accommodate physical distancing between all people.
- Members of the same household group are not required to physically distance.
- Attendance at events must be monitored by tracking the number of attendees entering and exiting. Once the maximum number is reached, as per the maximum number of individuals allowed based on physical space, one person may be allowed to enter for every person who exits.

Physical Distancing

- Public and staff, with the exception of household contacts, must maintain a physical distance of two metres from others in all areas.
- Lineups at washrooms during breaks in public events pose a serious challenge. Event organizers must manage these areas to mitigate risks to attendees.
- Event organizers are responsible for:
 - Managing crowds and physical distancing in common areas, especially during breaks in entertainment;
 - Installing barriers where distancing is not possible (e.g. Plexiglas window at a booth/kiosk/cubicle), where practical.

- Ensuring the number of people entering the event are counted to comply with the Event Capacity Requirements above;
- Identifying and marking the event space to discourage entry from anywhere around the event perimeter. This is particularly important for outdoor events in open spaces;
- Identifying entrances and exits to ensure they are not located in the same immediate area;
- Using physical line controls, such as crowd cordons, at entrances and anywhere lines can form;
- Placing markers (e.g. tape or cones) every two metres as visible cues to support physical distancing;
- Implementing one-way aisles or walkways to promote physical distancing; and
- Posting information to inform attendees of COVID-19 precautions for the event.
- When spectators are involved, appropriate distancing and cordoning measures must be in place to separate the audience from the entertainment.
- Seating areas, where available, are subject to the following:
 - Physical distancing is required between individuals, with the exception of household groups;
 - Leave alternating rows empty and provide signage, where necessary; and
 - Events should have assigned seating, where possible.
- Avoid activities that do not allow physical distancing, such as games or group photographs.

General Guidance

- Venues that offer in-house dining must follow the [Restaurants and Licensed Establishments Guidelines](#).
- International participants are subject to federal and provincial public health orders.
- Any business, community group or organization holding an event must designate one or more people to be responsible for ensuring compliance with these and any other applicable guidelines.
- Mask use is required for all staff and attendees as per the current [public health order](#).
- A response plan should be in place in case a patron or staff/volunteer develops COVID-19 symptoms while at the venue. All patrons, staff, volunteers and vendors must be denied entry if they are sick or symptomatic.
- Attendees, staff, vendors and volunteers should be provided with a sign-in on arrival option, including name, phone number and/or email to facilitate

contact tracing, if necessary. Records of attendance must be retained for a minimum of one month. Where possible, do not use a common pen. Providing this information is voluntary for attendees and can only be used for the purposes of COVID-19 contact tracing.

- Encourage patrons to limit their time spent at the event. Unnecessary loitering should be discouraged.
- Online admission ticket sales should be used, where possible. Consider using a booking system that allows a limited number of patrons to book and attend a specified time slot.
- Fundraising activities (e.g. 50-50 sales) and other similar services must be sold at kiosks or other areas where distancing can be managed.
- Cashless or no-contact payment should be used as much as possible.
- No shared use/common touch items, such as pens or interactive displays, are permitted at this time.
- Facilities must be equipped with adequate ventilation to minimize the risk associated with indoor environments.

Specific Guidance for Car Shows

- Vehicle owners are included in the event capacity requirements unless they are required to remain with their vehicles for the duration of the event.
- At this time, 'rolling' car shows or car parades, where vehicles are displayed while driving on public roads at specified times, are encouraged. If gathering or staging of vehicles in a single location, the organizer must be able to carefully control attendance of participants and the public.
- Organizers, vehicle owners and members of the public must maintain two metres of physical distance during all interactions.
- Award ceremonies must be held in a manner that reduces the number of participants involved and promotes physical distancing. Where possible, prizes or trophies should be provided after the event and winners are announced through social media or email.
- Grab bags, dash plaques and other items must be provided directly to each attendee from the event staff.

Specific Guidance for Trade Shows

- Organizers should encourage local vendors to attend.
- A maximum of two people, not including attendees, can occupy each vendor space. Physical distancing of two metres between vendors and attendees and among attendees should be maintained as much as possible.
- Vendors must set up with adequate distance between booths to ensure physical distancing can be maintained and promote physical distancing between attendees visiting their booths.

- Vendor spaces/displays cannot contain self-serve items or materials such as printed products and items to be given away. However, vendors can provide items individually to attendees while maintaining physical distancing and practising effective hand hygiene.
- Vendors are encouraged to have hand sanitizer approved by Health Canada (DIN or NPN number) available at their booths.
- Vendors must discontinue all food sampling, including by-the-glass sales of wine and other alcohols.

Hand Hygiene

- Organizers must promote and facilitate frequent and proper hand hygiene:
 - Provide handwashing facilities, where possible.
 - Provide hand sanitizers approved by Health Canada (DIN or NPN number).
 - Ensure there are stations available throughout the venue to maintain hand hygiene.
- Staff and volunteers must wash their hands frequently with soap and warm water or hand sanitizer when soap and water are not available.
- In washrooms and other areas with handwashing facilities, adequate supplies must be available, such as soap, paper towels and waste receptacles.
- Organizers are strongly encouraged to post information around the event area that remind attendees to practise respiratory etiquette and hand hygiene (e.g., entrances, washrooms and staff rooms).

Cleaning and Disinfection

- Develop and implement procedures for increasing the frequency of cleaning and disinfecting high-traffic areas, common areas and public washrooms. Refer to the [Environmental Cleaning and Disinfection Guidelines](#) for further information.
- Frequently touched surfaces (e.g. washrooms, door handles and counters) should be cleaned and disinfected frequently with an approved disinfectant.
- Disinfectants must be approved by Health Canada (DIN) and be used according to label instructions, including contact time.
- Promote increased environmental cleaning of vendor areas.
- Garbage bins should be emptied frequently.

Yard and Garage Sale Guidelines

For general workplace guidelines, please refer to [COVID-19 Workplace Information](#). Operators of yard and garage sales in Saskatchewan must be in compliance with the mandatory requirements in these guidelines. The information below provides guidelines for operators and individuals involved in yard and garage sales.

General

- Gathering limits cannot exceed what is allowable in the current public health order.
- Where possible, online garage sales are recommended at this time.
- People from different households must maintain two metres of physical distancing at all times.

Information for Sellers

- Do not host an event if you are feeling sick/unwell.
- Sales should be held outdoors (e.g. driveway or yard).
- Garages, sheds and quonsets are considered to be outbuildings and are restricted to the same indoor occupancy limit as private dwellings. (see: [public health order](#)).
- Wash hands often and consider providing Health Canada approved (DIN or NPN) hand sanitizer for all attendees.
- Glove use is not required. If sellers are using gloves, they should be changed after every interaction and when changing tasks after coming into contact with commonly touched areas/surfaces. Hand hygiene must be performed between every glove change (hand sanitizer or handwashing with soap and water).
- Avoid touching your face, mouth, nose and eyes.
- Sales are to be hosted by a single family. Group events are not permitted at this time.
- Do not provide food and beverages – complimentary or for sale.
- Clean and disinfect tables and sale items prior to the sale. Tables and other frequently touched items, including sale merchandise, should be cleaned and disinfected throughout the day.
- Clothing or other fabric items should be laundered prior to sale.
- Minimize physical contact with attendees.
- If providing bags for purchases, ensure they are clean.

- For cash transactions, ensure hands are washed or sanitized after handling money. Accept cashless payment if possible.
- Where the seller agrees with the buyer to have an item picked up (i.e. larger items needing a larger vehicle for transport) outside the hours of the garage sale, the same precautions are to be taken at the time of the pickup.
- Signs that promote two-metre physical distancing between attendees should be posted.

Information for Buyers

- Do not visit garage or yard sales if you are feeling unwell.
- When picking up items purchased electronically, maintain distance, practise hand hygiene, and do not pick up or offer items if you or anyone in your household is sick or has COVID-19 symptoms.
- Bring Health Canada approved (DIN or NPN) hand sanitizer and practise frequent hand hygiene.
- People should visit sales individually, whenever possible. Always maintain a physical distance of two metres between yourself and other non-household members.
- Avoid handling items and objects for sale, unless necessary.
- Clean and disinfect purchased items. Launder clothing and fabric items.

Door-to-Door Canvassing and Sales Guidelines

While permissible following the guidelines, salespeople/canvassers must understand that the public may not be comfortable with this type of activity at their place of residence.

- No door-to-door activities should occur if salesperson/canvasser is ill or experiencing COVID-19-like symptoms. Two metres of distance must be maintained at all times. No direct contact between canvassers and public, including handing of fliers, papers, pens, etc. Fliers may be placed in mail boxes ahead of time.
- Staff/volunteers should be provided with their own pen/pencil and limit sharing items or equipment with colleagues and the public. If items must be shared, they should be cleaned or disinfected between clients (i.e. payment terminals).
- Whenever possible, use contactless forms of payment.
- Charitable organizations accepting cash donations should consider using an enclosed container with a slot to avoid handling cash.
- Consider the needs of staff and volunteers who may be part of a vulnerable group and may be less able to protect themselves from potential risk. It is recommended that older staff or volunteers, or those with a weakened immune system, wear a procedure/surgical mask.
- If canvassing in groups, only those from the same household should share vehicles. See [Transportation Guidelines](#).
- Ensure staff/volunteers are practising proper hand hygiene and coughing/sneezing etiquette, including:
 - Using hand sanitizer when hands are not visibly dirty and handwashing isn't available.
 - Only using hand sanitizer approved by Health Canada (DIN or NPN number).
 - Avoiding touching your face, mouth, nose and eyes.
 - Coughing or sneezing into a tissue, then immediately disposing of the tissue and wash hands. If a tissue is not available, cough or sneeze into your elbow, not your hands.
- Encourage online or phone canvassing and sales.

Collection of Donated Items

- Organizations doing collections (such as bottle/food drives; household donation pick-ups) should consider advising neighbourhoods of the drives in advance through fliers, newsletters and/or social media and online

advertising. Collection of donations must be through curbside pickup where possible.

- If door-to-door collection is being conducted by groups, individuals from the same household should occupy the same vehicle. If this is not possible, individuals should wear non-medical masks (e.g. cloth or other materials) or surgical/procedure masks.
- Anyone who is unwell or symptomatic must remain home.
- Observe appropriate physical distancing practices between persons who need to leave the vehicle to collect donations.
- Clean and disinfect vehicle following activities.
- Practise frequent hand hygiene throughout the collection period with hand sanitizer and wash hands upon completion.
- Food and beverage consumption during collection/sorting is discouraged. If food and beverages are consumed, individuals must wash hands or use hand sanitizer prior to consuming.
- Collectors may wish to wear disposable gloves while collecting donations. Sanitize hands between glove changes.
- Maintain two-metre physical distancing when sorting donations.
- Sorting area for collected materials must be cleaned and disinfected after use.

Fall Activity Guidelines

These guidelines provide information on how to safely enjoy fall celebrations and honour Remembrance Day while reducing the potential spread of COVID-19. Events that exceed allowable gathering sizes and do not follow public health protocols have been a major source of COVID-19 transmission.

General Guidelines

- People should not participate in any fall activities or ceremonies listed below if they are sick or experiencing COVID-19 symptoms. If you think you may be sick, use the [online Saskatchewan COVID-19 self-assessment tool](#) and follow the directions.
- Limit holiday gatherings to household groups only.
- Where possible, consider virtual gatherings.
- Where possible, plan for all or part of the celebration to be held outdoors and ensure two metres of physical distancing between participants who are not a part of the same household.

Fall/Fowl Suppers and Similar Events

- Indoor public gatherings held in public venues with food or beverage service are not permitted at this time. Please refer to the [public health order on public and private gatherings](#).

Trick-or-Treating

Trick-or-treating is permitted with the following measures in place:

Neighbourhood Trick-or-Treating

- Two metres distance must be maintained between individuals who are not in the same household/extended household at all times.
- No direct physical contact should occur between trick-or-treaters and people distributing Halloween treats.
- Participants should consider using tools (e.g. tongs) to distribute candy at a distance.
- Physical distancing must be used when approaching houses (i.e. wait until group ahead is gone, take turns). For houses or neighbourhoods anticipating a high volume of trick-or-treaters, people distributing candy are encouraged to place tape markers every two metres between doorways and sidewalks/driveways to promote physical distancing.

- Due to the number of people potentially touching the treats prior to being handed out, consider cleaning candy wrappers with disinfectant wipes or holding the treats for 72 hours before consuming.
- Only wrapped, store-bought treats should be distributed.
- Common touch areas (e.g. handrails, doorbells, doorknobs, etc.) should be frequently cleaned and disinfected while distributing candy.
- Trick-or-treaters should practise frequent hand hygiene by carrying portable hand sanitizer approved by Health Canada (DIN or NPN number).
- People distributing candy should practice frequent hand hygiene while handing out Halloween treats.
- Trick-or-treaters should consider incorporating non-medical masks (e.g. cloth or other materials) into their costumes, while ensuring their eyes are not covered for safety reasons.
- Individuals handing out candy should consider wearing [non-medical masks](#) (e.g. cloth or other materials) where two metres of physical distance cannot be maintained.
- Where possible, only one household member should hand out candy.
- Alternatives to trick-or-treating may be considered, such as:
 - Costume viewing from windows/virtual/photos.
 - Decorating households and yards for viewing from afar.
 - A costume parade where physical distancing can be maintained.

Mall/Retail Trick-or-Treating

- Retail outlets must follow the [Clothing and Retail Guidelines](#) as part of their operations.
- Outlets handing out candy must ensure they comply with all guidelines specified above for private trick-or-treating.

Haunted Houses

- Organizers must implement one-way traffic flow to promote physical distancing (i.e. enter through one door and exit through another).
- Use markings or dividers and visual cues in common areas to ensure physical distancing between non-household/extended household members.
- Please refer to the [Public Health Order - Face Coverings](#) for masking requirements.
- Ensure frequent hand hygiene is available for everyone before, during and after visiting the haunted house with hand sanitizer approved by Health Canada (DIN or NPN number).
- Expand cleaning and disinfection of common/high-touch surfaces with the use of a Health Canada-approved product.

- Walk-through times between groups must be a minimum of 10 minutes apart to avoid congestion in the haunted house.

Pumpkin Patches

Pumpkin patches are permitted to operate under the following conditions:

- People not from the same household or extended household should maintain two metres of physical distancing at all times. Limit gathering with other people when entering and leaving the pumpkin patch, and always supervise children playing.
- Limit entry to the pumpkin patch to allow for physical distancing of two metres between individuals and household/extended household groups. Block off areas to control access.
- Minimize the number of entrances and exits to control the number of participants.
- Manage lineups into the pumpkin patch to meet physical distancing requirements of two metres between people not from the same household or extended household.
- Direct traffic flow through the patch using chalk or tape markings on the ground, ropes, barriers or other markers as required. Where possible, implement one-direction traffic flow to promote physical distancing.
- Ensure frequent hand hygiene is available for everyone before, during and after pumpkin picking with hand sanitizer approved by Health Canada (DIN or NPN number).
- Expand cleaning and disinfection of common/high-touch surfaces with the use of a Health Canada-approved product.
- If photo stations are available, two metres of physical distancing must be maintained between household/extended household groups lining up to take photographs.
- Photographers must maintain two metres of physical distance from groups or individuals being photographed.
- The photo station must be disinfected between each group being photographed.
- Any outdoor play areas in pumpkin patches must follow the [Recreation Guidelines](#).

Remembrance Day Ceremonies

In recognition of the importance of observing Remembrance Day, the following guidelines have been developed for event organizers and participants to help ensure the safety and well-being of everyone involved.

General Guidelines

- Wherever possible, organizers should provide an option for virtual attendance using online streaming services.
- Organizers are responsible for managing the positioning and directional flow of attendees to encourage physical distancing and minimize crowding.
- Provide enough time for attendees to arrive prior to the ceremony in order to minimize lineups. Where lineups may form, provide markings to ensure physical distancing while waiting in line.
- Attendees should be provided instructions for safe entry and exit from the event using public address systems, where possible.
- Provide hand sanitizer approved by Health Canada (DIN or NPN number) at entrances and outside of washrooms.
- Non-medical masks (e.g. cloth or other materials) are recommended where two metres of physical distancing is unpredictable or cannot be maintained, including organizers, event staff, volunteers and those participating in the ceremonies.
- Contactless payment options for poppy sales should be considered, where possible.
- Enhanced cleaning and disinfection of any common touch items is required.
- Food service, where provided, must follow the [Restaurant and Licensed Establishments Guidelines](#).
- Musical performances, including The Last Post, must follow the [Performing Arts Guidelines](#).

Winter Activity Guidelines

These guidelines provide information on how to safely enjoy holiday celebrations while reducing the potential spread of COVID-19. To reduce the spread of COVID-19, consider how you can modify your holiday plans to keep your friends, families and communities healthy and safe.

General Guidelines

- People should not participate in any winter activities if they are sick or experiencing COVID-19 symptoms. If you think you may be sick, use the [online Saskatchewan COVID-19 self-assessment tool](#) and follow the directions.
- Shopping malls, box stores and retail facilities planning holiday-based events must do so in compliance with the public health order. Please refer to the [Clothing and Retail Guidelines](#). Events that typically involve close contact between individuals not from the same household (i.e. photos with Santa, Santa's workshop, gift wrapping, interactive displays, charitable collections) must be modified to occur in a manner so that physical distancing can be maintained.
 - This may include having barriers around Santa, having Santa in the background (i.e. on a stage) that people walk by and have photos taken, etc.
 - All transactions or interactions should be contactless wherever possible.
