

## **Policy on Configuration of Mineral Disposition Parcels in Permit, Claim or Lease Subject to *The Mineral Tenure Registry Regulations***

An application to acquire, divide, or partially surrender a mineral disposition subject to *The Mineral Tenure Registry Regulations* will be denied if:

- a) the area subject to the application is less than one sixth of the area of the smallest box that can be drawn to contain the lands subject to the application; or,
- b) it is not in the public interest.

Explanatory Note: Use of the area ratio described in this policy reduces the risk that an application will be approved when the lands subject to the application do not, in fact, meet the regulatory requirement that their total length not exceed six times their total width.

Effective Date: August 13, 2021
