Benzo Testing Strips

1

Put drugs (equal to a few grains of sand) into 2-5mL or ½ teaspoon of hot water when testing benzos

2

Stir or shake contents until sample is dissolved completely

3

Dip the strip into the cup for **15 seconds**, no deeper than **the wavy line**

4

Wait 1 minute for red lines to appear

5

1 LINE:
YES benzos

2 LINES:
NO benzos

**Strips cannot detect all types of benzos,
such as etizolam.**

A NEGATIVE TEST RESULT DOES NOT MEAN THE SUBSTANCE IS SAFE
