

## Industry Tip

---

### Enhancement to Annual Estimates and Actuals Notification

Date	Module/Application/Functionality	Notes
June 2, 2022	Petroleum Tenure Module	Initial Release

#### Background

Permittees and Confidential Designated Representatives (CDRs) who are subscribed to the 'Annual Estimate and Actuals Notice' notification currently receive the notification 4 months before the actual submission is due unless the permit's excess available credits value exceeds the annual expenditure amount. After June 2, 2022, this notification will be sent even if the permit's excess available credits value exceeds the annual expenditure amount. A second notification will also be sent 3 months after the permit anniversary date as another reminder that Actuals must be submitted in IRIS.

For those who are already subscribed to this notification type, no change is required. For those who would like to sign up for this notification type, the permission set I.PETT.Disposition.Obligations is required for the user's security profile. Once that has been granted, locate the Notification Preferences Screen and subscribe:

1. Go to Support > Notifications > Notification Preferences;
2. Scroll down and click on the 'Edit Notification Preferences' button;
3. Scroll down to Petroleum Tenure – Disposition and select either 'None', 'Online' or 'Online and Email'; and
4. Click the Save button.

#### IRIS Permission

In order to use this feature, please contact your System Administrator to apply the permission set **I.PETT.Disposition.Obligations** to your IRIS account.
