

Industry Tip

Disposal Well Licence Question D39 and Following Questions

Date	Module/Application/Functionality	Notes
June 2, 2022	Well Licence Application - Disposal	Initial Release

Background

The original Disclosure Question D39 description only mentioned 3rd party water and did not ask for detailed information on 3rd party substances. To provide better clarity, this enhancement updated Disclosure Question D39's description and added follow-up questions for industry to provide detailed information on the well licence application:

- Disclosure Question D39 description for disposal wells has been updated to: **Are you requesting to take and dispose 3rd Party Substances?**
- New Disclosure Question D71: **Is this well associated with Waste Plant/Skim Oil/Reclaimer (Waste Processing Facility) in accordance with Directive PNG001: Facility Licence Requirements?**
- New Disclosure Question D72: **Is this well used for disposal of industrial wastes that are defined and regulated by the Environmental Management and Protection Act, 2010?**

Process

This enhancement will not change the current routine and non-routine application process. D71 and D72 will be displayed when D39 is answered "Yes" and/or when D36 is answered "Yes". Applicants will be required to answer D71 and D72, and attach applicable information on Attachment section:

- If D71 is answered "Yes", the *"Existing Associated Facility Licence # or Facility Licence Application #"* document is required. Applicants will have to provide the facility information to which the proposed disposal well is associated, or the facility licence application that is being applied for.
- If D72 is answered "Yes", the *"Summary of Permit Information"* document is required. Applicants will have to provide a general description of the Ministry of Environment issued permit.
- If D71 or D72 is answered "No", the *"Explanation as to why Waste Processing Facility Licence and/or Environmental Permit are not required from the respective regulatory authorities"* document is required. Applicants will have to describe why the above information can be excluded from the proposed disposal operation.
