

Industry Tip

IRIS User Experience Survey

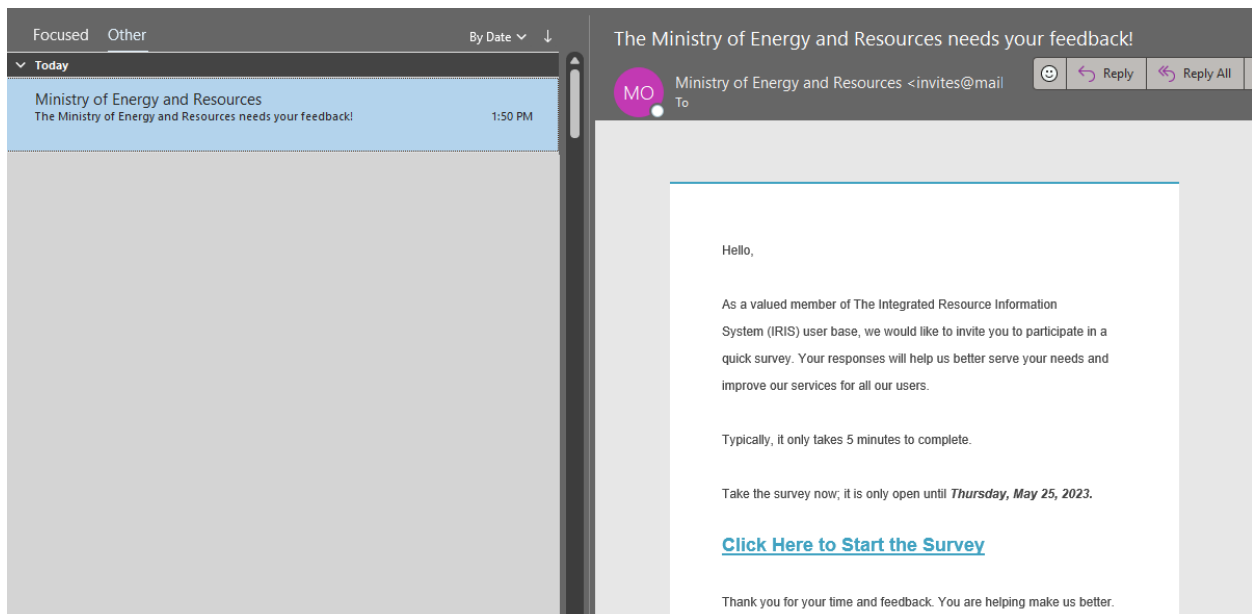

Date	Module/Application/Functionality	Notes
May 8, 2023		Informational

As part of the Ministry of Energy and Resources' commitment to continually improve Integrated Resource Information System (IRIS) and its customer service to industry, we are conducting an online IRIS user experience survey between May 11, to May 26, 2023 to:

- Gauge industry's perspective on how well IRIS is assisting them to meet their regulatory requirements with the Government of Saskatchewan; and
- Measure industry's level of satisfaction with the services provided.

On **Thursday, May 11** an email will be sent to active IRIS users of companies that currently hold a well, facility or pipeline licence, with a link to complete the survey. This email will be sent using an online survey tool called Alchemer. For your reference, a screen shot of how it will appear in your inbox is included below.

If you did not receive the email with the link but would like to participate in the online survey, please check your junk/spam folder before you contact the ER Service Desk.
