9.9.5 Release Notes

Maximum Permissible Rate (MPR)

Release Date: August 30, 2023

9.9.5 Release Notes Publication Date	Notes and Changes Made
August 30, 2023	Initial Release

About

On August 30, 2023, Saskatchewan's Ministry of Energy and Resources (ER) implemented the Maximum Permissible Rate project into the Integrated Resource Information System (IRIS).

The Maximum Permissible Rate project brings functionality into IRIS that will authorize routine and non-routine applications thereby automating the approval process. This change will replace the current MPR application in IRIS.

What's changed?

The highlights of what's changed in IRIS as a result of this release are noted below.

Note: Whether a user has access to the functionality or enhancements outlined in these 9.9.5 Release Notes will depend on the individual's security access and assigned permissions sets.

MPR Functionality

- The MPR applications will be structured application to allow the industry to enter reservoir information in IRIS.

- The new functionality will automatically approve the routine application and the non-routine will be approved by the reviewer.

- The system will automatically generate a new Allowable Rate of Production (ARP) record in IRIS upon authorization and assign it to the well completion.

- For routine approved applications, the Ministry will have the ability to audit the application through a review item. These values will be maintained for future reference and data collection purposes.

Reservoir Data Submission and Application Review Time

- Reservoir data submission will support value-added analysis and enhance functionality.

- The application turnaround time will reduce significantly and save engineering hours.

Industry Release Notes – Maximum Permissible Rate

Security and Permission Sets

The following changes were made to listed IRIS permission sets. No changes were made to Industry Security and Permissions Sets.

*Note: If a user is already assigned to the below permission set, they will automatically receive access to the new function.

Maximum Permissible Rate (MPR)

<u>Industry</u>

Permissions **		
Permission Sets	**Permissions ADDED ****	**Function**
I.INF.ProductionAndMeasurement Applications.Administrator	• WFI.Application.MAX_PER_RATE.Administrator.Industry • WFI.Application.MAX_PER_RATE.Applicant	• Industry Administrator for 'MPR Application'. • Permission to create 'MPR Application'.
I.INF.ProductionAndMeasurement Applications.Applicant	WFI.Application.MAX_PER_RATE.Applicant	Permission to create 'MPR Application'.
