

9.14 Release Notes

IRIS Version 9.14

Release Date: June 5, 2024

9.14 Release Notes Publication Date	Notes and Changes Made
June 5, 2024	Initial Release

About

IRIS Version 9.14 Release implemented 23 items. In addition to the changes detailed below, various enhancements and fixes to known defects were implemented to various IRIS Modules.

What's changed?

The highlights of what has changed in IRIS Version 9.14 release are noted below.

Note: Whether a user has access to the functionality, or enhancements outlined in these *9.14 Release Notes* will depend on the individual's security access and assigned permissions sets.

Infrastructure Functionality

- Facility Licence Application with an application type of Amendment will now allow the user to proceed with submitting the application for an existing site that already has that facility licence type if the existing facility licence meets the following conditions:
 - Has a Facility Licence Status of 'Issued' and Infrastructure Status Type of 'Decommissioned';
 - Has a Facility Licence Status of 'Suspended' and Infrastructure Status Type of 'Decommissioned'; or
 - Has a Facility Licence status of 'Cancelled' and Infrastructure Status Type of 'Proposed.'
- The Facility Licence Application in IRIS for a facility licence type of Waste Plant/Reclaimer/Skim Oil will now require the document type of Waste Processing Facility Application to be submitted.
- The Licence Transfer process has been enhanced for pipelines, where the Pipeline Disclosure questions and responses (when Schedule C is attached to the application) will be displayed in the

Preview Application tab and the Application tab in the Pipeline Licences section of Approved, Denied, Submitted and Submitted (Under Review) applications.

- The Well Completion Links tab has been enhanced with a new 'Unit Summary' table for wells crossing unit boundaries. This table combines and displays total percentage summaries derived from the Well Completion Drainage Unit/Area tab. It details the percentage splits between Unit and Non-Unit areas or, if the well is in two units, it provides the summarized percentages for each respective Unit.
- *Saskatchewan Critical Minerals Innovation Incentive (SCMII)* and *Critical Minerals Processing Investment Incentive (CMPII)*, two new Royalty Credit Program Types, are now available in IRIS. The application process for the new Royalty Credit Programs are similar to the sister programs of the *Saskatchewan Petroleum Innovation Incentive (SPII)* and the *Oil and Gas Processing Investment Incentive (OGPII)*. More information on the new Program Types can be found [here](#) for *SCMII* and [here](#) for *CMPII*. The IRIS Learning Centre module of Royalty Credit (under the Operational Applications and Information Reporting section) which can be found here has been updated to provide step by step instructions on how to apply for these programs.

Petroleum Tenure Module

- N/A

Energy and Resources Training Modules

Online Training courses for Integrated Resources Information System (IRIS) can be found [here](#). The Royalty Credit, Licence Transfer, Obligations, Well Reporting and Facility Licensing modules have been updated with this release.
