

9.16 Release Notes

IRIS Version 9.16

Release Date: October 2, 2024

9.16 Release Notes Publication Date	Notes and Changes Made
October 2, 2024	Initial Release

About

IRIS Version 9.16 Release implemented 22 items. In addition to the changes detailed below, various enhancements and fixes to known defects were implemented to various IRIS Modules.

What's changed?

The highlights of what has changed in IRIS Version 9.16 release are noted below.

Note: Whether a user has access to the functionality, or enhancements outlined in these *9.16 Release Notes* will depend on the individual's security access and assigned permissions sets.

Infrastructure Functionality

- A new *Notification Preference of Obligation Due Date Reminder* is available for Industry users to enable *Online and Email* notifications, for the areas identified below. Once enabled, Industry users will receive *Online and Email* notifications when an obligation due date is within 32 calendar days. A subsequent *Obligation Due Date Reminder* notification will be generated when an obligation due date is within 9 calendar days.

Note: The *Notification Preferences* available for selection will be dependent on the user's assigned permission sets.

- *Organization Subscribers > Shared > Environment*
- *Organization Subscribers > Infrastructure > Corporate Health Test*
- *Organization Subscribers > Infrastructure > Facility*
- *Organization Subscribers > Infrastructure > Inactive Liability Reduction Program*
- *Organization Subscribers > Infrastructure > Incident*
- *Organization Subscribers > Infrastructure > Pipeline*
- *Organization Subscribers > Infrastructure > Project*

- *Organization Subscribers > Infrastructure > Reporting Facility*
 - *Organization Subscribers > Infrastructure > Well Items and Licenses*
 - *Organization Subscribers > PRODUCTIONACCOUNTING > Emissions*
- To align with the requirements of *Directive PNG013 – Well Data Submissions*, the *Submit core analysis* obligation will now require a Core Analysis Test submission within 30 days of the *Core Analyzed Date*, if a core analysis has been completed. This is a correction from the previous submission requirement of 90 days after the *Drilling End Date*.
 - The correct association between a generated notification and its associated entity is now established. When a notification has been generated by the system, the notification will be displayed on the associated entity's *Notifications* tab. For detailed information about this change, please refer to the Notifications [TIP](#).
 - Segment data amendments made using latitude/longitude coordinates (rather than a shapefile) for retroactively licenced pipeline/flowline segments that were previously not reflected on the *IRIS Map Viewer* or *Saskatchewan GeoAtlas* are now available. Moving forward, changes to segments resulting in differences on the *Map Viewer* and *GeoAtlas* will be reflected the day after the application is approved.
 - Several Industry notification types are now automatically turned on for users upon the assignment of the affiliated permission sets. For detailed information about this change, please refer to the Notifications [TIP](#).
 - The *Report Cut and Cap* obligation is now retired and replaced with a new obligation: *Complete Cut and Cap Operation*. Functionality to fulfill any outstanding *Report Cut and Cap* obligations remains. For detailed information on finding and fulfilling the existing obligations, please refer to the [TIP](#).

The new *Complete Cut and Cap Operation* obligation, with a status of unfulfilled, is generated when the *Abandoned Date* is entered in IRIS for *Well Abandonment Type= Downhole Abandonment*. Industry has 12 months from the downhole abandonment date to complete cut and cap operations on the applicable well. The obligation status will update to fulfilled when the *Abandoned Date* is entered in IRIS for the *Well Abandonment Type = Cut and Capped*.

When the *Abandonment Date* for the *Well Abandonment Type = Cut and Capped* is entered in IRIS, a *Submit Cut and Cap Report* obligation, with a status of unfulfilled, is generated. Industry has 7 days from the cut and cap abandonment date to submit the cut and cap report document for the applicable well. The obligation status will update to fulfilled when the *Cut and Cap Report* document is submitted in IRIS.

Petroleum Tenure Module

- N/A

Energy and Resources Training Modules
