

# Industry Tip

## Changes Impacting the Enhanced Recovery Application

| Date             | Module/Application/Functionality | Notes         |
|------------------|----------------------------------|---------------|
| December 4, 2024 | Enhanced Recovery Application    | Informational |

### Background

The *Unit* field has been removed from the *Details* and *Confirm Application* screen of the *Enhanced Recovery Application*.

Changes introduced on the *Propose Well Completion Changes* tab of the application in the *Well Completion Changes Details* popup:

- A new Unit Information section is added. Unit Information includes disclosure question Does this well completion cross a unit boundary? and the new Unit field.
- The Drainage Unit/Area Land table now contains a new Unit column that automatically populates the unit information for each Land Description.

This Tip is to aid Industry in submitting *Enhanced Recovery Applications*.

### Process

When submitting an *Enhanced Recovery Application* that includes a reclassification or recompletion, on the *Propose Well Completion Changes* screen, select *Add Well Completion*.

The screenshot shows the 'Enhanced Recovery Application' interface. On the left is a navigation menu with options: Details, Propose New Wells, Propose Well Completion Changes (selected), Application Attachments, and Confirm Application. The main content area is titled 'Existing Well Completion - Enhanced Recovery Application - #349242'. Below the title is a 'Well Completion Change Summary' table with columns: Well Licence #, Industry Application Reference Number (Well), Drilling Trajectory, Boss Wellbore UWI, Proposed Well Completion Type, Proposed Pool, Top of Pool TVD, Proposed Drainage Unit/Area, and Actions. A red box highlights the 'Add Well Completion' button in the Actions column. At the bottom of the screen are buttons for 'Previous', 'Validate', 'Delete Draft', and 'Next'.

The *Add Existing Well Completion* screen now includes a *Unit Information* section and a *Unit* field.
