Median and 90th percentile waits (in days) for high risk cataract surgery Saskatchewan

Number of days by which 90% of patients had high risk cataract surgery By Service Area

Notes

- The results on this page include all cataract surgeries. In other words, the waits for both the first and the second eye. The wait for the second eye is usually shorter than the wait for the first eye.
- The wait for the second eye starts when the surgery on the first eye has been done.
- Results are based on the January 19, 2025 refresh of the Saskatchewan Surgical Patient Registry data mart.
