## Section 5: Impact of Cognitive Disability

\*This section should be completed by your team lead in conjunction with your team. For more assistance visit:

<http://publications.saskatchewan.ca/#/categories/222> for a list of CDC's in your area.

In the space below, please describe the impact of the cognitive disability on the individual in relation to each area listed below. Please give specific life examples and provide detail in each section. The Cognitive Disability Strategy is not diagnosis or IQ based (applicants do not require formal diagnosis or a specific IQ score), however, each area below must be met.

**Detail is required. Incomplete applications will result in a denial or requested funding due to insufficient information.**

<b>Impact of Disability</b>	<b>Examples and Description</b>
	Please keep typical developmental milestones in mind when completing these sections. <i>e.g.) Many children under 4 years of age may require some incontinence supplies to be purchased by their parents. Any 6 year old would require parental assistance to get dressed and ready for school in the morning.</i>
1. <b>Significant limitations in learning and processing information.</b> Individuals may be limited in areas such as: retaining knowledge, learning skills, making decisions, and/or communicating with others.	
2. <b>Behaviour Challenges</b> That result in limited interpersonal, social, and emotional functioning.	
3. <b>Developmental challenges</b> That limit capacity to adapt to daily living in areas such as self-care, independence at home, in the community, at work or leisure.	
4. <b>Limitations and impairments that are persistent and long-term</b> <i>i.e. have been observed from early childhood, or in the case of an Acquired Brain Injury (ABI), are not likely to improve over time.</i>  Please provide formal diagnosis, IQ information, etc., if available.	

## Section 6: Current Supports and Sources of Funding

This section should be completed by your team lead in conjunction with your team. For more assistance visit: <http://publications.saskatchewan.ca/#/categories/222> for a list of CDC's in your area. Your current supports and sources of funding will help your team identify unmet needs to better identify the services and support you can access through CDS.

Is there anything else that you think needs to be known about the applicant and their current circumstances to successfully evaluate this application?

# Appendix A: Cognitive Disability Strategy (CDS)

## Flexible Funding Eligibility/Non-Eligible Services List

Funding provided through this strategy is for individuals with unmet needs related to their cognitive disability. Funding levels are determined by an income test and needs assessment. Requests for flexible funding must be related to the cognitive disability and recommended by the professional/support team related to the specific request.

Existing systems and resources must be considered first. Funding requests must include how current services are insufficient to meet the individual's needs. CDS is not intended to replace existing programs and services.

\*\* CDS funding is not limited/exclusive to the below listed services.

### The following may be eligible for CDS funding if no other funding options are available:

**ASSISTIVE TECHNOLOGY** – Costs related to devices/software for the sole purpose of communication.

**BEHAVIORAL SUPPORT MATERIAL** – Material costs related to the implementation of a Comprehensive Behavioural Support Plan.

**CAMP** – Unsubsidized portion of costs for the applicant to participate in recreational/therapeutic/social activities with peers out of the family home.

**CHILD/ADULT CARE** – Care costs when there when no subsidized or alternate care available due to the child's or adult's support needs which exceed available options.

**DAY PROGRAM** – Costs related to day support for an individual not involved with Community Living Service Delivery (CLSD) to participate in work and leisure activities to develop related life skills.

**FAMILY SUPPORT** – Costs related to family support where the parent has a cognitive disability.

**INCONTINENT SUPPLIES** – Incontinent supplies for individuals over the age of 4.

**INDIVIDUAL SUPPORT** – Individual support directly related to the cognitive disability where all system options have been exhausted.

**MENTORSHIP** – Mentorship costs related to specific developmental goal(s) for the purpose of social, emotional and/or skill development. Mentoring programs must include clearly outlined objectives/goals and structured activities related to the individual's developmental stage. The mentorship plan must also include how, who, and when the plan will be monitored and evaluated.

**RESPIRE** – For the purpose if a break from the typical responsibilities of care giving.

**SPECIAL DIETS** – Only casein/gluten free or liquid diets may be considered.

#### THERAPY

- Therapeutic interventions recommended by a professional related to the field of expertise for example: occupational; speech and language; physical; massage; equine; music; art therapy; applied behavioural analysis; and counselling.
- Interventions/aids to implement the therapeutic programs listed above.
- Program supplies items directly related to the therapeutic or skills based intervention.

**TRANSPORTATION** – Some transportation related costs MAY be eligible if specifically related to an eligible CDS service.

### The following items are not eligible for CDS funding:

- **Basic needs** – Housing costs, bills, food etc.
- **Employment support** – Job coach, employment wage supplements
- **Medication** – Prescribed medication
- **Medical supplies and equipment** – Vitamins, supplements and medical equipment
- **Medical travel costs** – Mileage, meals, parking etc.
- **Property Damage** – Household repairs
- **Program costs and membership** – Recreational or sports and other program fees
- **Tutor services** – Education related support
- **Vacation**

\*Please note: this listing of eligible and non-eligible services is not exclusive. Please contact a CDC in your area for more information. <http://publications.gov.sk.ca/documents/17/81264-Cognitive-Disability-Strategy-Contact-Map.pdf>

## Appendix B: Unmet Need and Budget Examples

List Service/ Support Requested	Rational – Why is this an unmet need?	Identified Benefit	Plan	Implementation/ Review
<b>Occupational Therapy</b>	<p>Mary finished school 2 years ago and moved away from the family home for independence. Since the move, she has experienced some difficulties with her new environment and difficulty coping with the change. This is due to her cognitive disability and ASD diagnosis (sensory and processing delays). She is now engaging in self-injurious behaviors to cope.</p> <p>While Mary was in school she had access to OT and behavioral support which was helpful.</p> <p>Mary is not eligible for CLSD and the SHA in her community does not have an OT (see letter attached). Due to the seriousness of the behaviors, lack of intervention may lead to home breakdown and loss of independence.</p> <p>Mary and her team (listed in section 4) have met on several occasions to review her current support system to determine this is an unmet need. Please see attached case plan from team lead.</p>	<p>Mary will learn coping skills to manage the change in her life. Mary and her team will learn how to implement environmental modifications to address sensory issues.</p> <p>This will lead to improved coping skills and in turn improve quality of life and independence.</p>	<p>Mary will work with OT through an assessment/strategy implementation to determine environmental factors leading to sensory distress. OT will recommend environmental and sensory related strategies to fit Mary's needs and reduce stress. (Please see attached recommendation from an OT.)</p> <p>Month 1, 2, and 3: 3 sessions per month at \$120.00 per session.</p> <p>Month 4, 5, 6: 2 sessions per month at \$120.00</p> <p>Month 7- 12: Maximum of 6 sessions at \$120.00 per session.</p> <p>OT will provide 3 reports per year to the team lead to review with team.</p> <p>OT will attend 1 planning meeting mid-way through the year at \$120.00</p> <p>Total is 22 sessions @ \$120.00= \$2640</p>	<p>Mary and her support team will meet once every 4 months (arranged by the team lead) to review the progress report from the OT with Mary.</p> <p>Team lead to provide assistance to Mary to ensure appointments are kept with the OT and assist her in any strategy implementation.</p> <p>Mary's parents will also provide support. Progress will be reviewed at the quarterly meetings.</p> <p>At mid-point review (after 6 months) OT will make a recommendation if OT needs to continue.</p>
<b>Mentorship</b>	<p>As described above, Mary is struggling with self-regulation and coping in her environment though her goal is to live in her own home and be independent. She is not eligible for CLSD support. She does not have access to positive peer or formal support to practice the building her independence skills as such compromising her home placement.</p>	<p>Mary will practice skills related to increased independence such as meal preparation, social interaction, taking the bus and using her bank card. These skills will help build her confidence and learn new coping skills with day to day life.</p>	<p>The mentorship plan will include an initial goal setting session with Mary and her team. The mentor will work on setting small achievable goals each week. The team will monitor the progress each month. The mentor will spend 6 hours per week with Mary at \$15.00 per hour for a total of \$4,680.00 per year maximum.</p>	<p>The team will meet monthly for the first 3 months then every second month. The mentor and Mary will report progress and review how the mentorship plan is working. Adjustments will be made as necessary. The team lead will be responsible for calling the team meetings and being the key contact for the mentor.</p>

# Appendix C: Cognitive Disability Strategy (CDS) Team and Team Lead Role

The Cognitive Disability Strategy (CDS) was established in 2005 as a short-term intervention to support individuals with cognitive disabilities and their families. It was developed to provide supports where mainstream services/programs are not able to respond.

CDS has two service streams: Cognitive Disability Consultants (CDC's) support through service coordination and/or development of behavioral support plans and the Flexible Funding Benefit. This benefit is based on the individual's assessed level of need and income. Applicants should first consider whether the needed supports are available in their community, and if not, the Flexible Funding Benefit may be an option.

Requests for flexible funding must be related to the cognitive disability and be a part of a written, integrated case plan with measurable goals. There should be an emphasis on shared responsibility, accountability and integrated planning at the local CDS Intake Committees.

Existing systems and resources must be considered first. As such, CDS can be used to enhance services where available services are insufficient to meet the individual's needs or to supplement programming where no services exist. CDS is not intended to replace existing programs and services. Family and person-centred practice will be at the forefront of all requests.

## Application:

The application serves as a planning tool for teams to identify current supports and potential interventions or service options. It is meant to encourage an integrated plan with families and individuals.

Because it can be difficult to navigate systems and service options, applicants are encouraged to seek assistance when completing an application for CDS.

<https://publications.saskatchewan.ca/#/categories/222>

## Team Leads:

Team leads can be representatives from any system (Health, Justice, Social Services, Education, Advocate, or a Community-Based Organization) that helps the individual/family with service planning. Any team member may serve as team lead as determined appropriate by the applicant and team. Families can also choose to act as team lead. Team leads can help identify, coordinate and monitor services. CDCs can fill this roll if the individual/family does not already have a team lead.

## Team Lead Role and Team Function for CDS Application:

Service coordination and team work is essential to ensuring individuals have access to services to meet unmet needs. As such the team helps in identifying who will take the lead in the following tasks:

- Meet with individual/family to identify if there is a service gap.
- Review current supports (both formal and informal).
- Arrange an integrated planning meeting with individual/family and all the identified supports to:
  - Review the current support plan (if applicable);
  - Identify responses to any unmet needs in existing systems; and,

- Develop CDS application if there is an unmet need that can't be met by any existing system. This application must clearly identify why the need can't be met by any other system and include all supporting documentation.
- Ensure the application is complete with all required information. Incomplete applications will not be reviewed.
- Submit application to local CDC.
- Meet with applicant to review what was approved and how to keep track of services and invoices.
- Set up check-in meeting with team and applicant through the year to review services. Check ins can be identified by the at the initial team meeting. These will vary from case to case.
- Ensure applicants/families/service providers are aware invoices must align with approved amounts as noted in the approval letter. Invoices will only be paid if it is a part of the approved CDS plan and must be signed by the service provider and any team member to verify services.
- Lead the review process to ensure that:
  - The review is started at least 3 months prior to end date;
  - All team members are included; and,
  - The CDS application is completed and re-submitted in full 3 months prior to the end date if the need continues to be unmet.
  - Act as the key contact for any questions from Ministry of Social Services CDS staff.
