SCHEDULE

Short title 1. These regulations may be cited as "The Lucky Hills Viking Sand Voluntary Gas Unit Natural Gas Production Allowance Regulations, 1971".

Application 2. These regulations apply to natural gas deemed to be produced from Crown lands in The Lucky Hills Viking Sand Voluntary Gas Unit hereinafter called the "Unit".

Definitions 3. In these regulations:

(a) "capital costs" means the cost or value of the natural gas gathering lines, processing plant, machinery, equipment and buildings and may include all direct labour, including company and contract labour, direct on site technical personnel salaries and expenses necessary for the construction and installation of the natural gas gathering line, processing plant, machinery, equipment and buildings provided that such capital costs do not include the following:

(i) overhead charges, such as district office charges and head office administration expenses;

(b) "allocated net costs of production" means the operating and capital costs allocated to Crown lands in the Unit on a tract factor basis wholly, exclusively and necessarily incurred for the purpose of gathering and processing the natural gas for sale less all revenue derived from the sale of products other than natural gas produced or obtained from the processing of the natural gas;

(c) "operating costs" means the direct operating costs of the natural gas gathering lines, processing plant, machinery and equipment and may include the following:

- (i) operating labour;
- (ii) roustabout and maintenance labour;
- (iii) repairs and maintenance;
- (iv) supplies;
- (v) employee benefits;

provided that the operating costs do not include operating costs of the natural gas wells, land costs or any overhead charges, such as district office charges and head office administration expenses.

Natural Gas Royalty 4. The royalty shall be paid at the rate set forth in The Petroleum and Natural Gas Regulations, 1969, as amended or substituted from time to time, on natural gas allocated to Crown lands in the Unit after deducting the allocated net costs of production applicable to such natural gas pursuant to these regulations.

Net costs of production for 1971 5. Notwithstanding section 6, the Crown royalty on production of natural gas from the effective date of unitization to December 31, 1971, shall be paid after deducting the estimated allocated net costs of production at a rate of one cent per thousand cubic feet of natural gas sold, and no statement submitted under the provisions of these regulations shall include any operating costs incurred prior to the effective date of unitization.

Provisions for adjustment 6. At the end of each calendar year, commencing with the year 1971, and before the last day of February of each year next following, the producer of natural gas subject to royalty under these regulations shall prepare and submit to the minister a statement of the actual allocated net costs of production for each such calendar year and a statement of the estimated allocated net costs of production for the calendar year next following; and the difference between the actual allocated net costs of production and the estimated allocated net costs of production used for determining royalty for each such calendar year shall be adjusted, subject to section 8, by adding the excess of actual allocated net costs of production over estimated allocated net costs of production or by deducting the excess of estimated allocated net costs of production over the actual allocated net costs of production in determining the estimated allocated net costs of production for the purpose of calculating the royalty payable in the calendar year next following. Subject to section 8, any unrecovered allocated net costs of production, or portion thereof, may be recovered in a subsequent year or years.

Capital cost write-off 7. For the purpose of determining allocated net costs of production the capital cost write-off for each year shall be determined by dividing the balance of the undepreciated capital costs at the beginning of each year, less the estimated salvage value, by the estimated total volume of natural gas that remains to be produced and sold from the Unit and multiplied by the total volume of natural gas produced and sold in such year.

Provisions for payment of royalty on withheld portion of selling price 8. In the event that any portion of the selling price of the natural gas that is subject to these regulations is withheld by the purchaser thereof from payment to the Unit contingent on certain conditions being met under the terms of the contract between the Unit and the purchaser such withheld payments shall be subject to the royalty when paid.

Minimum sale price or value for calculating royalty 9. Notwithstanding anything contained herein but subject to section 5, the minimum sale price or value of natural gas shall, after deducting the allocated net costs of production, for the purpose of calculating the royalty, be not less than the price or value determined by the minister, having regard to the prevailing well-head price of natural gas in the area.

Interpretation of regulations 10. Any question pertaining to the interpretation of these regulations shall be referred to the minister for his final decision.

Section 57
of The Pet-
roleum and
Natural
Gas Re-
gulations,

apply
otherwise
